Large Local Vote Expected Nov. 3 In 'Nickels' Drive

A large vote is expected Saturday in Zebulon when fertilizer and feed users flock to the polls to vote on the "Nickels for Know-how" proposal. The program, if adopted, will add five cents per ton to the price of feed and fertilizer for a period of three years for supplementing an expanding agricultural research and educational program in North Carolina.

Dr. L. M. Massey and Robert Ed Horton, both leaders in the campaign to acquaint the farmers with the proposal, stated that they believe the voters will give the measure their overwhelming approval.

All persons who use feed or fertilizer, including wives and husbands as well as 4-H, FFA and NFA members with crop or livestock projects, are eligible to vote.

This includes, Dr. Massey said, even the small gardeners who buy small amounts of fertilizer for their home use.

The plan must be approved by two-thirds of those voting to become effective.

Proceeds will be turned over to the Agricultural Foundation Inc., at State College to promote research, education and extension work for the benefit of farm people.

Included in the organization of solicitors are Willie B. Hopkins, Worth Hinton, and Gilmer Parrish, all of whom will have assistants to help them contact people in Zebulon.

In Wakefield, Mrs. Harold Pippin will conduct the drive, according to Chairman Beck.

Harold Taylor is the colored representative and will solicit contributions from the colored people in the community. Funds from the Chest will be used to assist with the colored Boy and Girl Scouts Troops and a colored recreation program as well as the white program.

Farm Bureau Backing Research Fund Move

The North Carolina Farm Bureau strongly recommends and urges that every eligible person to vote in the November 3rd. (Saturday) election on "Nickels for Know How."

If this election carries it will mean that the users of feeds and fertilizers will pay five (5c) cents extra per ton.

This money will be used to pay additional agricultural research scientists and engineers to develop new and more effective methods of combating the ever increasing horde of insect pests and crop disease against which the farmer must constantly be on the alert.

Cost 50c per Year

The average farmer will not have to pay more than about fifty (50c) cents per year to support this program — it is truly "Nickels for Know How."

Without more agricultural research, there is a great possibility that the insects and crop diseases will eventually win in their ceaseless struggle to destroy all profitable agricultural productivity; So let's all turn out and vote for "Nickels for Know How."

Poles for White Way Set on Main Avenue

The poles for the brilliant new lights to be used for Zebulon's White Way are being erected this week by Carolina Power and Light Company on Arendell Avenue. The business section of the town will have an entirely new system which will provide unsurpassed illumination.

The old poles and wires which have cluttered up the streets will be moved to the alleys behind the stores, according to Mayor Worth Hinton.

The White Way plan has been successfully employed in several other North Carolina towns, including Nashville, where lavish compliments have been heard from townspeople and visitors.

TOMORROW IS A BIG DAY FOR FARMERS

Saturday, November 3, is an important day for North Carolina farm people. On that date they will vote on the "Nickels for Know-How" proposal to assess themselves five cents per ton on

feed and fertilizer, the proceeds to be turned over to the Agricultural Foundation, Inc., at State College to promote agricultural research and education. Polls will be open from 6:30 a. m. to 6:30 p. m., and regular PMA polling

places will be used. All persons who use feed or fertilizer, including women as well as 4-H, FFA, and NFA members with crop or livestock projects, are eligible to vote. Two-thirds approval is required to make the plan effective.
