

THE ZEBULON RECORD

Volume XXVII. Number 21.

Zebulon, N. C., Tuesday, Nov. 27, 1951

Theo. Davis Sons, Publishers.

"JOE BEAVER"

By Ed Nofziger

Forest Service, U. S. Department of Agriculture

"Yes, autumn turns the leaves to gold—but careless folks can turn the leaves to flame!"

Attention, Ladies: Here Is Information on Bulbs

By Robert Schmidt

Spring flowering bulbs are now much in evidence in seed stores, hardware stores and chain stores. October and November are the best months to plant these in most sections of the State, but make your selections and buy your bulbs early before they are picked over. There are many kinds and varieties to choose from, the older ones being as a rule cheaper than new varieties and in many cases more reliable.

Double-nosed narcissus bulbs will give more blooms than will round bulbs, and if you haven't grown it before, be sure to include a few bulbs of the "Golden Harvest" variety. It is one of the best of the moderately priced large trumpet daffodils and is fragrant too.

How to Plant Them

All of these bulbs should be planted in well-drained soil. Sometimes it helps to put a layer of sand or fire cinders under the bulbs. Fertilization is important but no fertilizer should come into contact with the bulbs. Bone meal is often recommended because it is slowly utilized and, therefore, seldom causes damage even where it comes in direct contact with the bulbs. However, a complete garden fertilizer is preferable, if care is used to keep it from coming in-

to contact. Depth of planting varies with the kind of bulb and type of soil. In sandy soil bulbs may be planted deeper than in heavy clay soils. Lilies should be planted 8 to 10 inches deep, except Madonna or Ascension lilies which must be only about 2 inches below the surface. Narcissi (daffodils) should be 6 to 7 inches deep, tulips 4-5 inches, Hyacinths 5 inches, Dutch Iris 4 inches and Crocus 2 inches deep. Dutch and Spanish iris will come up this fall. Don't be alarmed; it is their natural habit to do this. They are usually not damaged by the winter weather.

25th Infantry Division Promotes Local Man In Struggle in Korea

Theodore Medlin, son of Mr. and Mrs. Richard Medlin, Route 2, Zebulon, recently was promoted to sergeant first class while serving with the 25th Infantry Division on the fighting front in Korea.

The division, a veteran unit of the war in Korea, has been in action since July of 1950.

Sergeant Medlin is a mess sergeant in the 25th Division's 27th Infantry Regiment.

He has been in Korea seven months and has been awarded the Combat Infantryman's Badge.

Chamber to Give Prizes for Best Yule Decorations

Cash prizes for the best decorated homes and businesses will be offered this Christmas by the Zebulon Chamber of Commerce to promote more beauty in the Zebulon Community. Prizes of \$10 and \$5 will be given for home decoration and \$10 for the businesses.

The prizes were proposed at a special meeting Friday night of the directors of the Chamber of Commerce, meeting with representatives of the Zebulon Garden Club.

Garden Club members attending the meeting included Mrs. Norman Screws, Mrs. Lucille Pippin, and Miss Gladys Baker.

Miss Baker offered a nice fir tree to the town to be planted in front of the Municipal Building to be used in future years as a community Christmas tree.

To Buy Records

The Chamber of Commerce voted to purchase several records for the Methodist Church chimes, to be played throughout the Christmas season for the enjoyment of the entire community.

On Tuesday, November 10, a committee representing the Zebulon Chamber of Commerce, including Mayor Worth Hinton, Pat Farmer, and Ed Hales, met with members of all Wake County Chamber of Commerce committees in Raleigh to discuss the means of getting more manufacturers interested in establishing factories here.

Chamblee, Hopkins Speak to Rotarians

D. D. Chamblee, local insurance agent, and Willie B. Hopkins, town clerk and chief of police, addressed the Zebulon Rotary Club last Friday night on community service. The program was under the direction of Pat Farmer, community service chairman for the club.

I want to measure my timber. Can you tell me how to use a tree scale stick to measure the timber?

A simple illustrated folder on "How to Use the Log and Tree Scale Stick" has just been published by the State College Extension Service. It is issued as Extension Folder No. 85. You can get a free copy from your county agent or by writing the Department of Publications, N. C. State College, Raleigh.

In the past I have had some trouble with my milk cow's feeding; how should she be fed immediately after calving?

Dairy specialists say a warm bran mash given just after calving may help to keep the digestive system functioning properly. Unless complications interfere, it is important to get the cow on full feed as soon after calving as is reasonably possible.

After the calving day, increase the grain gradually. Be careful not to throw the cow off feed. About three weeks is required to get high producers on their required feed allowance.

It's very important, say the specialists, that the calf receive colostrum milk for the first three days. However, it's a good practice to remove the calf from the cow's stall about 24 hours after birth to prevent the calf from getting too much milk. The calf's navel should be disinfected with tincture of iodine soon after birth to guard against infection.

I have some cut-over land I would like to put into trees again, but I want a faster tree crop than pines. Is there one?

The state nursery at Clayton offers many varieties of pine other than long leaf; but practically all native varieties produce pulpwood in a relatively short time. Many farmers have had good luck taking the cedar seedlings offered at Clayton and growing them for sale as Christmas trees. The cedar is growing in popularity as a Yule tree, and can often be harvested in three to four years.

BLUSHING BRIDE

Joe Tonkel

If this bride isn't the daintiest morsel you ever laid eyes on, she will have to do until a daintier one comes along! Gorgeous Joe Tonkel, who never said "I will" to anybody before (except the Louisville draft board), is going to say mock marital vows at Thursday night's womanless wedding.

The H. G. Perrys Buried on Sunday

Double funeral services were conducted from Hopkins Chapel Baptist Church Sunday afternoon at 3 o'clock for Mr. and Mrs. H. G. Perry of Mitchell's Mill, who died at their home Saturday.

Following the services, which were conducted by the Rev. Fred Crisp and the Rev. A. D. Parrish, interment was in the church cemetery. The bodies were taken to the church at 2 o'clock, where they lay in state for an hour.

Mrs. Perry, 77, suffered a stroke about a week ago and died at 5:50 a.m. Saturday. Mr. Perry, who was 78, suffered a stroke in 1941, and died at 5:30 Saturday afternoon.

Survivors Are Named

Surviving are four children, Dr. D. R. Perry and Mrs. Lucy Rogers, both of Durham, Mack Perry and Austin Perry, both of Mitchell's Mill (Zebulon, Route 4).

Also surviving Mrs. Perry are one brother, Sid Arnold of Creedmoor; four sisters, Mrs. J. J. Powell of Zebulon, Route 4, Mrs. W. F. Kearney and Mrs. Alma Davis, both of Wake Forest, Route 3, and Mrs. Addie Strickland of Raleigh.

Mr. Perry is survived by two sisters, Mrs. J. F. Willis and Mrs. Nana Sasser, both of Raleigh.

Twelve grandchildren and 11 great-grandchildren also survive.

Gorgeous Joe Will Wed Wee William Thursday Evening

Citizens of the community who are not in the best physical condition are advised to stay away from the Wakelon auditorium Thursday night at 8:00 when the Womanless Wedding will be presented. A highlight of the fall, the wedding this year promises side-splitting scenes as the glamorous girls parade down the aisle.

Gorgeous Joe Tonkel will play the part of the dainty bride, and brawny William Bunn will trip to the altar as the groom.

Robert Ed Horton and Billy Hopkins will be best man and maid of honor. Barrie Davis will be the officiating minister.

Others taking part include R. H. Bridgers, Bernice Bunn, Jerry Buffalo, Frank Kemp, Kenneth Hopkins, W. A. Allman, Willie Griswold, Willie B. Hopkins, Terry Kemp, Vaughn Wade, Timmy Kemp, Ronald Phillips, Ed Hales, Hilliard Greene, Sr.;

Flower girls will be Ralph Lewis, Jr., Jimmy Spivey, Hilliard Greene, Jr., and Percy Parrish.

Bridesmaids include Frank Kannon, Jack Mitchell, Pat Farmer, Ralph Bunn, Garland Godwin, Harold Pippin, Hardin Hinton, Durant Finch, Jim Fish, and Leonard Lewis.

Honorary bridesmaids will be Wesley Liles, Jack Potter, Eldred Rountree, Raleigh Alford, W. R. Whittenton, and Bobby Pace.

Ushers will be Clarence Hocutt and Gilbert Beck.

BROWNIES MEET

The recently organized troop of Brownie Scouts now has twenty-three members. It will continue to meet each Wednesday afternoon at 3:30 in the Primary room of the Baptist Church.

Their first project will be to bring Santa Claus to children in town, who otherwise would have very little Christmas. They have been asked to bring toys, either used or new to their next meeting. If anyone has any toys to give to this worthy cause, please call Mrs. James Creech.

Demonstration Club

The Wakefield Home Demonstration Club will meet at the home of Mrs. Helen Jones in Wakefield Wednesday, November 28, at 2:30. The Home Demonstration agent for Wake County will show colored slides of curtains and drapes.

How's your voice? Five persons out of a hundred are born with good voices. The rest of us have to work for one. What are you going to do about yours?

Does my voice have enough resonance?

Do I vary my pitch to express my feelings?

Do I sound sincere and natural?

Do I have any "fawncy" affectations?

Do I speak too fast? Too slow?

Do I vary my rate of speaking from time to time?

Do I emphasize the important words in my sentences?

Do I have a nasal twang or any hoarseness?

What words do I stumble over?

Do any sounds, such as "s" and "t", sound defective?

When white nylon turns yellow or brown, the discoloration is there to stay and cannot be removed. It can be prevented, however. Never launder white nylon at temperatures above 270 degrees F.

Never wash nylon with colored pieces. Don't use marking solutions—they are harmful to nylon fibres. Use marking tape.
