Come in and See the QUAKER MAGIC LAMP!

Just place your hand over the chimney of this lamp at high fire. Note how little heat you feel. Note how smoke and soot stain the palm of your hand. That proves that valuable fuel oil is being wasted because there isn't enough air (or draft) for proper combustion. This waste can occur with any heater that relies on its chimney alone to supply air to the fire.

Now... without changing anything... just feed air to the flame as Quaker does with mechanical draft. Feel the surge of extra heat... too hot for your hand to stand. Note how the fuel-wasting smoke and soot have disappeared. Why? Because the fire no longer depends on the chimney alone for air. As a result of feeding air to the flame mechanically, you get a hotter, cleaner, fuel-saving fire.

...that shows how you may

CUT YOUR FUEL BILL 1/3 and MORE

SEE WHY YOU GET WORK-FREE, SMOKE-FREE AUTOMATIC HEAT WITH

QUAKER HEATERS

Here's proof of fuel savings...proof before your eyes...proof before you buy! See for yourself why no heater...regardless of name or price... can give top performance without a proper supply of air to the burner. We'll be happy to have you make the QUAKER MAGIC LAMP TEST... to prove to yourself that you can save fuel and get cleaner, more efficient heat from a QUAKER heater. Yes, you'll actually see why QUAKER heaters pay for themselves in the fuel they save. Don't delay...come in today and see how to save with a new QUAKER heater.

79% more prime heating surface in this furnace-type, inner heating drum.

The QUAKER 3210... The finest oil heater made.

Quakerrol automatically adjusts the flow of air and oil to the right amount needed for the amount of heat you want. Nothing else like it.
