

THE ZEBULON RECORD

Volume XXVII. Number 35.

Zebulon, N. C., Tuesday, February 10, 1953

Theo. Davis Sons, Publishers

SCOUT WEEK POSTER

The Boy Scouts of America are observing this week as National Boy Scout Week, and Zebulon Scouts are participating in the observance under the direction of Scoutmaster Armstrong Cannady. Two patrols of Troop 340, the local unit, have arranged window displays emphasizing Scout activities in show windows of Zebulon Drug Company, Whitley Furniture Company, and Carolina Power & Light Co.

CPL Agent Gives Recipes Used at School Feb. 9th

By Lane Siler

At the meeting of the Ladies Auxiliary of the Farm Bureau in Zebulon last week we had quite a discussion of electric cookery. Where does one find a group who spends so much time with the preparation of food than an auxiliary like this!

What lively conversation is made when meal planning and cooking is discussed. Maybe you will be interested in the oven meal that was prepared.

Over Meal

Temperature: 350 degrees
Time: 1 hour
Form into thin patties: 2 lbs. pork sausage meat.
Peel and slice 6 large apples.
Alternate patties and apple slices in a 2 quart casserole — have top layer patties.
Cover for first 45 minutes, then remove top to brown meat.

Glazed Sweet Potatoes

2lbs. boiled sweet potatoes
2 tablespoons fat
1 cup light brown sugar
¼ cup water
½ teaspoon salt

Boil potatoes until tender. Peel and cut them in half lengthwise. Make a syrup of the sugar, fat, salt, and water. Put the potatoes, cut side down, in an oiled baking dish; pour syrup over the potatoes. Baste occasionally if desired.

Blueberry Crisp

1 No. 2½ can blueberries
½ teaspoon cinnamon
3-4 cup sifted flour
6 tablespoons butter
½ cup brown sugar, firmly packed
Blend flour, sugar, cinnamon, and butter. Sprinkle over berries which have been placed in a 2 quart baking dish.

Buttered Broccoli

Place one package frozen broccoli in 1½ quart casserole. Add 1-3 cup water, 1 tablespoon margarine, and ½ teaspoon salt. Cover.

Pre-School Clinic

The Wakelon Pre-School Clinic will be held Friday, March 6, at 12:30 p. m. If your child will be six on or before October 1, be sure to have him present.
Please keep this date in mind.

Local Soldier to Receive Discharge; Hinnant Gets Promotion in Austria

Willard P. Hinnant, son of Myrtle W. Hinnant, of Wendell, was recently promoted to sergeant first class while serving with U. S. Forces, Austria.

He is a platoon sergeant in Company I of the 350th Infantry Regiment.

Hinnant was employed as an auto service man by K&W Motors, Inc., Raleigh, N. C., before entering the Army in October, 1949.

Pfc. Norman E. Brown, whose wife, Sarah, and parents, Mr. and Mrs. W. D. Brown, live in Zebulon, is scheduled for release from active duty February 12 at Camp Atterbury, Ind., where he is serving with the 31st Infantry Division.

Private First Class Brown is assigned as a cook in Headquarters and Service Company of the 106th Engineer Combat Battalion.

Junior Order Sets Election Date, Has Campaign Mapped

The Wakefield council of the Junior Order of United American Mechanics will hold an important meeting next Monday night, February 16, at 7:30 p. m., according to Eldred Rountree, recording secretary.

Election of officers for 1953 will be accomplished at the session, Rountree said, and the anti-communist campaign of the JOUAM, the nation's oldest patriotic fraternity, will be discussed.

Five million stickers bearing the legend "I Am An Active Worker Against Communism" will be distributed through the organization's 1400 Councils.

The announcement was made by Clyde F. Wilmeth, of Cynwyd, Pa., national secretary of the organization.

At the same time Wilmeth announced his organization will award 5 thousand dollars to the "American Citizen of the Year." A committee of prominent persons, with Dr. Daniel A. Poling, national president of the All-American Conference, as chairman; and W. C. "Tom" Sawyer, vice-president of Freedoms Foundation, as consultant, has been named to set the machinery in motion which will determine the recipient. John S. Fine, Governor of Pennsylvania, is honorary chairman.

The stickers, Wilmeth said, are red, white and blue. They are small enough to be displayed on doors, windows, and automobiles.

Wilmeth explained that the 5-thousand dollar award is part of a 5-day centennial celebration which opens at the Bellevue Stratford Hotel on June 14th. The organization, he said, was founded at the Concord Schoolhouse, Germantown, Pa., in 1853 "to preserve American ideals."

The award committee, Wilmeth added, will name its own chairman and set its own rules. Officers of the U. A. M. have disqualified themselves as members of the committee, he said, and are meeting with it only to set the project in motion.

Local Man Reaches Korean Battle Unit

Pvt. Robert L. Edwards, whose wife, Radah, lives on Route 2, Middlesex, N. C., recently arrived in Korea and is serving with the 25th Infantry Division.

His outfit has been in Korea longer than any other American division. It entered the fighting in July, 1950, shortly after the Communist attack on South Korea.

Private Edwards, a supply handler, was previously stationed at Fort Lee, Va.

Before entering the Army last July he was employed as a truck driver by Builders Supply in Spring Hope, N. C.

His parents, Mr. and Mrs. W. M. Edwards, live on Route 4, Zebulon.

Tax Lister Continues Work Until Feb. 14th

Eldred Rountree, tax lister for Little River Township, reminded local taxpayers yesterday that the last day for listing taxable property in Wake County this year will be Saturday, February 14, with the tax books closing at noon.

Tax listing will be at Massey's Hatchery each day this week Rountree said.

Nationwide distribution of five million stickers (pictured above) has been launched by the Junior Order, United American Mechanics, with national headquarters at Philadelphia. The organization is the nation's oldest patriotic fraternity. It is celebrating its 100th anniversary at a Centennial Convention to be held in Philadelphia next June.

Rolesville Divides Two with Locals

Two powerful Rolesville School basketball teams split a twin bill with Wakelon last Tuesday night in the Rolesville gymnasium. The Wakelon boys won by a score of 46 to 41, but the Rolesville girls took a 79-62 victory.

High scorers in the girls' game were Martha Temple, 41 points, and Juanna Joy Mitchell, 18 points, for Wakelon, and Perry, 44 points, Thornton, 16 points, and Wall, 17 points, for Rolesville.

In the boys' game, Bell with 13 points was high scorer for Wakelon. Liles scored 9 points, Pearce 8 points, and Brown 6 points. Pulley, with 14 points, was high scorer for the Rolesville team. Rogers scored 10 points and Massey scored 9.

Farm Agent Urges Full Safety Check On Farm Buildings

In the winter time, most farm chores center around barns. This is why Grady Miller, Wake County farm agent for the State College Extension Service, suggests that you take time to weed out barn hazards before an accident occurs.

Go over the barn with a critical eye for hazards and inconveniences. Some of them may have remained unnoticed for years.

Check your barn for loose objects or things that may cause falls. High door sills, abrupt changes in floor levels, weak boards, protruding cleats or other tripping hazards should be removed. All floors should be solid, smooth and continuous. Do some house cleaning and set things in order if the alleyways or work areas are obstructed with feed, tools, harness, feed carts or other obstacles. Don't work in the dark, see that dangerous corners and work centers are well lighted. Avoid storing loose materials overhead and see that folks or other barn equipment are kept in safe places.

Hay mow doors, feed chutes and ladders need special attention. A well constructed stairway that is hand-railed and kept clean provides the safest and easiest passage to hay mows. It is dangerous to use stairwells as feed chutes because loose hay or straw makes footing uncertain. Separate feed chutes with guards above the loft level are desirable.

Piano Recital

Miss Roberta Deenis of the Wakelon School faculty will give a piano recital in the Wakelon Auditorium on Wednesday night, February 11, at 8:00 p. m.

Tobacco Specialist Discusses Best Plantbed Use of Methyl Bromide

When is the best time to use methyl bromide gas in tobacco plant beds?

In the fall or spring — any time the outside temperature is 50 or 60 degrees or higher, according to R. R. Bennett, tobacco specialist for the State College Extension Service.

Bennett says that the methyl bromide gas treatment, when properly applied, has proved effective in controlling grass and weeds in tobacco plant beds. It also helps control nematodes.

In 1950, demonstrations with methyl bromide were conducted in plant bed soils in 32 tobacco

counties in North Carolina. Prior to that time, the treatment had been tested by the North Carolina Agricultural Experiment Station, and 24 demonstrations were conducted in 10 counties in 1949.

Results prove that the treatment is "very effective," according to Bennett.

Methyl bromide gas penetrates the soil best when the soil is not too wet, Bennett points out. An air-tight cover of plastic or tough kraft paper can be bought in suitable widths for the purpose of confining the gas in the plant bed.

For details on using the gas, see your local county agent.

GARDEN TIME

What Fertilizer is Best?

Most vegetable crops, and especially the leafy vegetables, require heavy fertilization in order to induce rapid growth which is necessary for high table quality.

Nobody wants to eat tough, stringy vegetables and it should not be necessary.

Garden soils should contain enough organic matter to make them porous and easy to work and to retain moisture. In the farm garden this is usually supplied by applications of stable manure. If

stable manure is unavailable, organic matter may be supplied by turning under green crops such as rye, clover, soybeans or straw or sawdust. Whatever material is used to supply the organic matter it should be given plenty of time to decompose before the garden crops are planted. Even stable manure which is a good fertilizer as well as an organic material should be applied long enough in advance so that the straw or other
