

"Oh, not so very shaggy!"

This fine-coated champion is insulted, because somebody chose the wrong word.

There are many times — some of them vastly more important — when it's well to choose words with care. Not the least of these times is when making a Will. If you're about to take that step, have your lawyer choose the words: He knows best the ones that will make your Will the sound instrument for family protection that you want it to be.

SPRINGTIME COLORS: It's the season for the buds on some of the trees and bushes around here to begin to show their colors. Right in tune with Nature are the new extension phones in delicate pastel shades: aqua blue, rose pink, light beige, light gray, and white. (We still have cherry red, yellow, moss green, and ivory, too!) They're all pretty as they are practical. Even the cords match! And since a lot of you will be painting and papering come spring, why not select extension phones in lovely spring-time shades to match or contrast with your new decorating colors. For further details, just call our Business Office.

HANDWRITING EXPERT: Seems like everywhere you look today machines are getting almost smarter than people. Right now at Bell Laboratories they're developing a little machine—'bout as big as a portable typewriter—that can read and identify handwritten numbers. One day we'll be using it right here in our telephone office to record Long Distance numbers automatically. That'll mean saving a lot of extra work and cutting down costs. It's nice to know little machines like this are constantly being developed by telephone folks to help keep costs down and speed up service. It's one way we help keep your telephone the big bargain it is today.

LOVE THAT PHONE . . . Proud as a two-year-old honey child should be, isn't she? Answering the phone for the very first time. Whether you're going on two or half past forty, your telephone brings a heap of pleasure and satisfaction. (There's even something exciting about its ring!) For fun, for friendship, and for more good livin' than you can shake a stick at — just reach for your phone.
