

### Election

(Continued from Page 1)

before the people for approval. "For the past two years most of the money available has been spent for the extension of water and sewer lines. If Zebulon is to continue to grow this will be true for the years ahead of us. At the present time and for the past two years the water and sewer lines that have been extended into new areas of town have been paid for by both the town and property owners. This, I am sure, will continue to be the policy of our governing body. "During these next two years

we will continue to turn our attention to the collections of back taxes and other items of revenue for the town. No town can meet its obligations and make progress unless it collects the revenues that are due it. It will be to the advantage of the citizens of Zebulon to pay these taxes and other items of revenue promptly and thereby not have additional interest or cost added.

"We request the support of the people to help us make Zebulon a better place in which to live, work, and play. With your support this can be done.

"I would like to praise the town

employees for the effort that is being put forth by them. Their continued hard work for the betterment of Zebulon is requested. "I have great respect and admiration for our present town commissioners and with their continued help we will push Zebulon forward."

Commissioner Pat Farmer, who is seeking his second term on the Board, said: "I would like to see the water and sewage improved. Our streets are badly in need of repair, too. They need to be curbed and guttered."

Farmer added that he would like to see during the next two years parking facilities on main street improved. He wants this done without having to have the cars marked as was approved by the Board last winter. He believes this could be rectified if the merchants, business people and people working down town would find other places to park other than on main street, thus saving this parking area for customer parking.

"Our community park also needs attention," Farmer said.

Commissioner Raleigh Alford, long time member of the Board, said: "I am looking forward to water filtering and sewage disposal plants for the town. These projects are definitely in the planning stage.

"We all know that Zebulon is growing, and in order to grow we have to have these facilities to take care of any people who come into the town. We have got to provide for them.

"I have enjoyed serving as Town Commissioner. I have learned a great deal about how to get along with people and something about the problems of the town."

Mrs. Elizabeth Ellett, seeking her second term as a commissioner, is interested in the development of the outlying areas of the town.

"There are two projects I want to see done during the next administration," Mrs. Ellett said. "These are the securing of a water filtering plant and a sewage disposal plant. These projects have got to be done while we can get Federal aid."

She spoke of the work done by Mayor Ed Hales. "He has done a mighty fine job. He has started a lot of projects and the people ought to help and give their support."

Mrs. Ellett said, too, that "our town is better off now than in many a year."

Commissioner Thurman Hepler, also seeking his second term as a member of the Board, said: "We have got to have a water filtering plant and a sewage disposal plant."

Hepler said the town fathers have been observing an open pool filtering type plant in Troy, N. C. He said this type plant will cost only half as much as the regular type plant.

"If it will work for the town of Troy I believe it would work for the town of Zebulon," Hepler said.

"We have absolutely got to do something about the town's water system," he said.

Hepler said, too, that town expansion is one of the major issues. "If Zebulon is to grow, we must think about the future of expansion."

Corbett, who led the ticket in the last election, was not reached for comment on his platform.

### Dental Aide

(Continued from Page 1) husband is neuro-surgeon at the Baptist Hospital in Kyoto.

She expressed an interest in coming to America for training in setting up a dental department in the Kyoto hospital and to find out what America is like. The Masseys invited her to spend a year in their home as a guest and Miss Sakai came to America with the Kitahatas. Dr. Kitahata is currently in school at Cornell Hos-

pital in New York City.

The approved training course which the young Japanese has completed was offered by the Federal Government and the State of North Carolina through professions and business establishments.

Archer, who represents the N. C. Apprenticeship Council, is the government guidance advisor of this department. He is urging more people to open their businesses and professional offices to this type of program.

Miss Sakai left for Bowman Gray April 15 for another educational venture. She will be able to study at this school's school of

medicine for another year before she heads for her native homeland. At Bowman Gray she will take a course in becoming a medical records librarian.

Miss Sakai is staying with American friends while in Winston-Salem.

Through the cooperation of the people of two nations Miss Sakai will again launch forth on a new educational objective.

The artificial insemination program now embraces nearly a third (about seven million) of the cows in the U. S.

VOTE FOR

**IRA H. JOHNSON**

for

**MAYOR OF WENDELL**

*In May 2 Election*

\* A man with a plan for Wendell's future, including — abundant water — library facilities — adequate town service — a man who recognizes the ability of Wendell to progress, prosper, and grow.
