AMERICA IS STILL GROWING! There are many reasons for us to have confidence in our country, and not the least of these is the remarkable record our industries have achieved. Since 1900, our gross national product has increased at the average rate of 3% per year, from \$79 billion at the turn of the century, to \$503 billion in 1960. This gross national product will be rapidly approaching the \$1 trillion mark by 1975—another good reason for confidence in a growing America.
