

THE ZEBULON RECORD

VOLUME 36, NUMBER 55, ZEBULON, N. C., MARCH 1, 1962

Dr. and Mrs. Sidney Britton

Distinguished Educator; Wife Spend Weekend In Zebulon

A distinguished educator and his equally distinguished wife spent a few days in Zebulon last week.

Dr. and Mrs. Sidney Britton of Charlottesville, Va., and other points were the house guests of their daughter and son-in-law, Dr. and Mrs. Lee Sedwitz.

Dr. Britton, 70-years-old Saturday, retired in 1952 after 24 years as head of the medical physiology department of the University of Virginia. Physiology is the study of how the organs and body parts function.

The elderly active professor told of his work with apes and chimpanzees. Experiments on these animals produced invaluable information that could be used for the welfare of human beings.

Work with the higher apes and chimps were generally with the adrenal and pituitary glands and the pancreas organ. These animals had their adrenals and other glands removed to see how they would function without them, how long they could live without them, and what their reactions were.

Dr. Britton said as early as the 20's and 30's they were taking extracts of cortisone, called adrenal cortical hormones, from chimps and apes.

Observations of the higher intellect animals were useful in understanding how humans work, he said. Chimps are the animals with the highest intellect.

Dr. Britton said that chimpanzees will die if kept in a standing position for a very long time. These animals were partially immobilized to prevent cruelty. His experiments have proved it. He also added that chimps cannot swim

and he once almost lost a group when his boat capsized.

Apes' and chimps' temperatures are nearly equal to that of man's, he found. And one of the marked deficiencies was they cannot stand extreme heat or cold, or other unfavorable climatic conditions.

Tests were made under varying climatic conditions to test their temperature, pulse, and blood pressure.

Dr. Britton declared these animals are very much akin to man and that man certainly evolved from some lower form of animals.

He has spent a year in Central Africa and three expeditions in Central America collecting apes

Surgeon Makes Med Who's Who

Dr. Lee Sedwitz, Wendell-Zebulon Hospital surgeon, was notified Friday that he successfully completed Part II of the examination given by the American Board of Surgery in New Orleans February 12.

The popular young surgeon was gleeful at receiving the news.

"I have worked and studied for 14 years for this," he said.

The test was oral and extremely hard. It was administered by some of the most renowned surgeons in the United States.

"I was slightly doubtful as to

Town's Newest Club Presented Charter At Banquet Ceremonies

JAYCEES PRESENTED CHARTER . . . Jimmy Medlin, second from left, is shown with the charter which was presented to the Zebulon Jaycee Club in ceremonies last Wednesday night. Medlin is president of the newly organized club. To his left is Al Harrison, former State Jaycee president. On Medlin's right is Norman Lee of Rocky Mount, who presided at the ceremonies and Fred Swartzburg, current president of the State Jaycees.

Al Harrison Is Featured Speaker

Jimmy Medlin, president of the Zebulon Junior Chamber of Commerce, accepted the charter for the newly organized club from State President Fred L. Swartzburg at the Charter Night Banquet held in the Lions Club Building the night of February 21.

Al Harrison, former State Jaycee president, was the featured speaker of the evening. He stressed the opportunity for service which is open to Jaycees in small towns. He also pointed out how members could help themselves as well as the community through club projects.

Mr. Harrison was introduced by J. Dudley Harper, president of the Rocky Mount Junior Chamber of Commerce. It was Mr. Harper and his members who sponsored the formation of the Zebulon chapter. A large number of Rocky Mount Jaycees attended the banquet.

Norman Lee, State Director of the Rocky Mount Jaycees, was master of ceremonies. He introduced a number of guests including State Jaycee officers, presidents of local civic clubs, town commissioners, and school officials.

Mayor T. E. Hales welcomed the out-of-town guests and expressed confidence that the club will be an asset to the town of Zebulon.

Robert Daniel Massey, president of the Zebulon Chamber of Commerce, expressed his pleasure in the swiftness with which the new chapter was organized. He also gave a brief history of the Junior Chamber of Commerce which was active in Zebulon prior to World War II and which he served as president.

The invocation was given by the Rev. William Q. Quick, pastor of the Zebulon Methodist Church, and the benediction was given by the Rev. David E. Daniel, pastor of the Zebulon Baptist Church.

Miss Rose York, the reigning

Nelle Kemp Has Good Chance To Become Lion District First Lady

Like all wives whose husbands are running for office, Nelle Kemp is helping her husband campaign.

Frank Kemp is running for Lions District Governor of 31G. The election is held in May at Wilmington.

And like all wives who travel with their husbands on their campaign trails, she has smiled until her jaws ached and shook hands until she felt a touch of bursitis.

"It's all very thrilling though," Mrs. Kemp said. Her voice is lovely . . . low and sweet because of her years of voice training.

"We don't know whether or not Frank will win but right now we think he has a pretty good chance," she said, her face alight with pride of her husband.

Mrs. Kemp is the daughter of the late Senora Driver and William Turner Bryant. She was born August 28, 1916, on her father's farm near Middlesex. The baby of three children, she has an older sister, Mrs. J. L. Strickland of Spring Hope and a brother, Ralph Strickland of near Zebulon.

Nellie Bryant (she later changed the spelling to Nelle) was a better than average student in Middlesex High School from which she graduated. But she was a star athlete on the school's basketball team. Because of her long, rangy tallness she played center mostly but was equally as good playing the forward position.

"I was wrapped up in basketball," she said, crossing her elegant legs caressed in blue toreador pants at the ankles. "I had planned to go to East Carolina (Teachers then) College and get a degree in physical education and coach high school basketball."

In fact, she was already enrolled. But Fate stepped in and her life was changed.

"A representative from a Virginia beauty college came to see me and my parents. He painted a beautiful picture of a comsetologist career. So persuasive was he that he convinced my father, but not my mother, and I went off to beauty school."

She graduated from Virginia

School of Beauty Culture February 1, 1935. In the school she was so apt and talented that only a few weeks after she had been there she was put into the advanced her styling and contouring classes.

Musical laughter broke forth as she said her father gave her her first lessons in hair cutting.

Because her mother wanted her to be near home, Nellie Bryant obtained a position with Zebulon's first beauty salon, owned by Mrs. R. E. Barnes. She spent a year and a half with this firm and then went with the late Charlie Rhodes, who owned a beauty firm in Zebulon. She was with that firm a year and a half.

In February, 1939, Nelle, now Mrs. Frank Kemp, opened her own

CP&L Will Repeat Atom Youth Prize; Open To Sophs, Juniors

Carolina Power & Light Company will repeat in 1962 a public school award aimed at giving incentive to budding scientists and highlighting peaceful uses of the atom.

The award is an expense-paid trip for two outstanding science students and their teachers to the National Youth Conference on the Atom, which attracted more than 300 delegates to Chicago last year.

F. T. Scarborough, manager for CP&L, said today that the competition for the 1962 award is open to high school sophomores and juniors whose families are served by the company. CP&L chooses one student and teacher from North Carolina and one student and teacher from South Carolina.

To be considered for the award, the student must participate in the physical science division of district science fairs held in the spring, since winners will be chosen from among these participants.

Science fairs are sponsored by

the North and South Carolina Academies of Science in cooperation with public school systems and supported by CP&L and others in the two states. Information on the fairs is available to students through local science teachers.

The youth conference will be held November 8-10 at Chicago. The 1961 program was studded with leading scientists such as Dr. Glenn Seaborg, chairman of the Atomic Energy Commission; Dr. Hans Betho, nuclear physicist at Cornell University; and Harold B. Finger, head of the Joint AEC-National Aeronautics and Space Administration's nuclear propulsion office.

The conference is sponsored by 60 investor-owned electric companies, most of which are participating in atomic power projects.

Scarborough said the 1962 atomic award has special significance for CP&L; for in June it will join three other companies to begin operating the Southeast's first atomic power plant at Parr, S. C.

First Runner-Up In World Peace Contest Outstanding

The first runner-up's speech in the World Peace Speaking Contest sponsored recently by Zebulon Rotary Club is an outstanding student at Wakelon School.

Lewis Liles, 14, is a member of the 10th grade. He belongs to the National Honor Society, Science and Public Speaking clubs, community 4-H Club, and has recently been made president of the Wake County 4-H Club. Talented musically, he has taken piano and organ for seven years.

Lewis is the son of Mr. and Mrs. Jack Liles of Route 2, Zebulon.

"Your grandchildren will grow up under Communism" are the threatening words of the corpse-mover and bomb-tester, Russian Premier Nikita Khrushchev. Will his threat come true? Will your grandchildren salute the Soviet

Lewis Liles
