Why Should We Go to the Annual Meeting?

All right, Mr. — and Mrs. —, that's a fair question. Now let us tell you why you, and every member of this rural electric system should attend the annual meetings.

First, you should realize, if you don't already, that this is *your* electric cooperative—*your* own private business enterprise. You're not just a customer—you're a part owner. That means that you are entitled to have your say-so in its operation, just as much as you have in the operation of your own farm or any other business you own.

As a matter of fact, your voice in the running of this system is more than a right—it's actually an obligation on your part. If this system is to be run intelligently and efficiently, its policies must be the result of the thinking of all its members. And that thinking is expressed by

the way you and your neighbors vote at your annual meetings.

The annual meeting is your opportunity to check up on how your system is operating, get the facts on its financial status, and learn what problems it may have to face in the coming year. The annual meeting is also your opportunity to vote on issues and proposals that will directly affect you and all the other members of the cooperative. And it is your opportunity to elect to office those directors whom you think will guide the co-op along the lines that you want.

The welfare of your rural electric system, and its continuing ability to give the best service at the lowest possible cost, depends on whether you take advantage of your opportunities and fulfill your obligations at the annual meetings.

There Have Been Some Changes Made

►Time was when buses stopped everywhere. Some still do as they are dandy for local trips.

But today there's also a faster kind of Trailways service known as thru express. Thru express takes you great distances without change and with less stops enroute. Many 200 mile trips are made non-stop; and very often a bus will travel 500 miles with only 2 or 3 stops.

A Trailways Bus itinerary can be worked out to fit your particular needs, whether your trip is for 10 miles or 1000 miles; and you ride in America's newest bus fleet.
