Concord, N. C., April 24, 1911.

THE CHEERFUL VIEW.

As man was created for health, so was mankind created for happiness, and to speak of its misery only is to say words that soon are forgotten. Why not speak as though mankind were always on the eve of great certitude, of great joy? Thither, in truth, is man led by his instinct, though he never may live to behold the long wished for tomorrow.—Maeterlinck.

President Hobbs, of the National Association of Cotton Manufacturers, at the recent annual meeting of that association in Boston, made this statement:

"To clothe the whole of humanity would require 42,000,000 bales of cotton each year."

Mr. Hobbs said that of the 1,500,000 inhabitants of the world, only 500,000,000 are completely clothed, while 750,000,000 are only partially clothed and 250,000,000 are practically not clothed at all. As civilization advances, the proportion of the partially clothed and the unclothed will decrease, and this, with the increase of population in civilized countries, will call for an increased supply of cotton. The cotton belt of the United States now furnishes fully two-thirds of the world supply of cotton, and, as the demand increases, will be called upon to greatly increase its production. Understanding this condition the Southern Railway has organized a Cotton Culture Department, to work in co-operation with the United States Agricultural Department and the agricultural authorities of the Southern States, to keep the cotton production of the South abreast of the demand by bringing about the adoption of those cultural methods which will result in larger average yields per acre, thus increasing the profitability of cotton growing and leaving surplus lands to be devoted to other crops and the growing of live stock. It is clearly more profitable to a farmer to produce fifty bales of cotton on fifty acres than to produce the same amount on one hundred acres, for he will receive the same amount for his cotton and will have fifty acres for other uses. Under ordinary circumstances, every increase in the average yield of cotton per acre reduces the cost of production per pound and yields the farmer a larger margin of profit between the cost of growing his crop and the selling price.

COFFEE CONGESTION.

Causes a Variety of Ails.

A happy old lady in Wisconsin says:
"During the time I was a coffee drinker I was subject to sick headaches, sometimes lasting 2 or 3 days, totally unfitting me for anything."
To his affliction was added, some years ago, a trouble with my heart that was very painful, accompanied by a smothering sensation and faintness.

Dyspepsia, also, came to make life harder to bear. I took all sorts of patent medicines but none of them helped me for any length of time.

"The doctors frequently told me that coffee was not good for me; but without coffee I felt as if I had no breakfast. I finally decided about two years ago to abandon the use of coffee entirely, and as I had read a great deal about Postum I concluded to try that for a breakfast beverage."
"I liked the taste of it and was particularly pleased to notice that it did not 'come up' as coffee used to. The bad spells with my heart grew less and less frequent, and finally ceased altogether, and I have not had an attack of sick headache for more than a year. My digestion is good, too, and I am thankful that I am once more a healthy woman. I know my wonderful restoration to health came from quitting coffee and using Postum." Name given by Postum Co., Battle Creek, Mich.

"There's a reason," and it is this. Coffee has a direct action on the liver with some people, and causes partial congestion of that organ preventing the natural outlet of the secretions. Then may follow biliousness, sallow skin, headaches, constipation and finally a change of the blood corpuscles and nervous prostration.

Read the little book, "The Road to Wellville," in pkgs. "There's a Reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

Hogan is Mack's Latest Phenom.
Connie Mack seems to make a practice of unearthing phenomenal ball players. This season the manager of the Athletics has a rising star in young Bill Hogan, whom Mack dug up in the Southern league. Hogan is an out-fielder with a wallop, and he has been hitting the ball so hard in the exhibition games that he may wedge his way into a regular position.

Pitcher Howell Now First Baseman.
Harry Howell, the former St. Louis pitcher, who was cast out of the American league for having a hand in the Lafolte batting fiasco at the close of last season, is being groomed for the first base post of the Louisville (American association) team. Howell is doing so well that he may supplant Myron Grimshaw, the regular guardian of that sack.

Nelson to Re-enter Ring.
Bat Nelson, ex-lightweight champion, will make his re-entry into the ring at Baltimore June 17. The Battle has signed to meet Dummy Decker in a ten round bout. If the Dane should fail to knock out Decker, he says, he will quit the ring for good.

An order was posted at the Spencer shops yesterday afternoon announcing that until further notice the working hours at the shops would be reduced to 8 per day and that the shops would be in operation only five days per week, this to be in force until further notice.

FOREIGN MINISTERS GIVE FOR TAFT PEACE PLAN.

British Foreign Secretary's Speech for It Arouses Enthusiasm.

Sir Edward Grey, British foreign secretary, recently evoked cheers by unqualifiedly endorsing the peace proposals submitted by President Taft and Secretary Knox, which contemplated a permanent treaty for the arbitration of all questions between England and America.

When Sir Edward referred to the possibility of the adoption of President Taft's proposal he was listened to in tense silence. If, he said, two of the greatest nations should thus make it clear that in no circumstances were they going to war again the effect of their example on the world must have beneficent consequences.

Nations entering such an agreement, continued the secretary, might be exposed to attack by a third nation. This would probably lead to their making another agreement to join each other in any case of quarrel with a third power in which arbitration was refused.

"In entering an agreement of this kind," said Sir Edward, "there would be risks, and you must be prepared for some sacrifice of national pride. I know that to produce such a change of public opinion must reach very high ideals, higher than some think possible, but men's minds are working in this direction, and history affords instances of reaching such an ideal point. It was so in the case of slavery when the United States rose up, not counting the cost in blood or money or the risk of national existence."

In conclusion the secretary said: "The general adoption of such a system might leave some armies and navies still in existence, but they would remain not in rivalry, but as the world's police."

Utopian as his hopes might seem to some, he believed that he would live long enough to see some progress toward their realization. "I am in bondage to army and navy expenditures. May the time soon come when they shall realize that the law is a better remedy than force."

The foreign secretary's speech was loudly cheered and created a deep impression.

An Inside View of the Mexican Trouble.

"X. X. X." in Tryon Bee.

Mr. Editor:—With praiseworthy energy the Editor of *Amerika Esperantisto*, the official organ of the Esperanto Association of North America, has secured three letters from Mexican Esperantists concerning the situation in their country and written in the international language.

They all agree that the reports in the American papers are exaggerated, but confess that the situation is grave.

The chief causes of the revolution are President Diaz's failure to resign and the conviction that the elections nungatory.

The civil war has now lasted since the 20th of November and is more devastating at present than ever before. There have already been killed more men than there fell of the United States troops during the Spanish war. There are bands of revolutionists in nearly every one of the twenty-seven States of which the Mexican Republic is composed. The majority of the people sympathize with the principles of Madero's party, altho they do not go so far as to carry arms against their government.

All the writers predict the fall of the revolutionary movement. It would have collapsed long ago if it were not for the neighborhood of the United States, whether the revolutionists draw arms and provisions. They lack an experienced military leader. They have no disciplined army, no artillery. When the ammunition they now have is used up, they cannot get more. They have no money beside what they take, and no credit.

Still, the government seems to be unable to put down the revolution. It has capable, well disciplined and faithful officers, but its soldiers are very bad and inferior to those of the rebels. Many villages do not contain a man, because in order to avoid forced recruiting, they have all fled to the woods.

It is an interesting proof of the spread of the international language, Esperanto, that these three communications have appeared in their original garb. Being written by Mexicans living in the country that is the seat of the revolution, they give more trustworthy information than that which can be obtained by reporters or traveling foreigners. X. X. YOU MAY READ THIS LETTER
Danville, Va., July 19th 1910.
The Milan Medicine Co.,
Danville, Va.
Gentlemen:—
My name suffered for many years with a trouble pronounced by her physicians to be uric acid rheumatism and although he treated her, she never obtained relief.
Being well acquainted with Milan and knowing it had been used successfully very frequently in similar cases, I determined to put her on it. She took six bottles with the happiest results. She is now entirely relieved and will always take pleasure in recommending Milan for uric acid troubles.
Yours truly,
C. R. ...

Regal Shoes at Cost Plus 5 per Cent.

An Earthquake for the Trade, but a Benefit to the Public

Regal Prices Are Now \$3.35 to \$5.85

NOBODY OUTSIDE the shoe trade can realize what a jolt that trade received when the Regal Shoe Company announced its new pricing policy.

"HENCEFORTH," said the Regal Shoe Co., "all the shoes we make will be priced at **COST OF MANUFACTURE AND SELLING, PLUS FIVE PER CENT. COMMISSION**, no matter whether that price figures out in odd or even money, and without regard to the 50c jumps between prices, heretofore arbitrarily fixed in the shoe business."

IT WAS NOT the five per cent. that gave the jolt. The Regal Shoe Co. has always done business on a five per cent. profit and every manufacturer knew it. It was the abandonment of the "even price" that caused the stir.

THAT "EVEN-PRICE" policy has been the darling superstition of the shoe trade for twenty years or more. Standard shoes had been sold for so long at \$3.50, \$4.00, \$4.50, \$5.00 and so on, that dealers thought no other prices were possible.

"BARGAIN" SHOES—nameless products shoveled out by shoe "departments"—might be sold at odd prices. But *standard* makes—oh, never!

IT WAS ARGUED seriously by expert shoe-salesmen that men and women who wanted shoes of name and character would rather pay even prices. That is, they argued that a man would rather pay \$5.00 than \$4.85, whether or not he got anything worth having for that extra 15c.

AND SO, WHEN a designer produced a new shoe that could be sold for profit and all at \$4.85, the manufacturers were up against an embarrassing situation.

THEY COULD DO any one of three things—and some one of these three things they all did:

THEY COULD LET that \$4.85 shoe stand as it was and ask \$5.00 for it, getting an extra 15c profit, if Regal competition would allow it—or

THEY COULD ADD 15c worth of unnecessary expense to the shoe, bringing its price up to \$5.00

OR, THEY COULD SKIN 35c worth OUT of the shoe, bringing its price down to the next even figure—\$4.50, but spoiling the shoe's quality-balance.

BUT AS FOR DOING the obvious and proper thing—selling that \$4.85 shoe for \$4.85—why that was not to be thought of!

SEEMS RIDICULOUS, doesn't it? But all superstitions seem ridiculous after you have exploded them. And the Regal has exploded this one.

HEREAFTER, Regal Shoes will be built just as the Regal style-builders plan them. They know their business, and they know their public.

IF THEY SAY "This shoe is right as it stands—the best shoe that can be devised and built for its particular want and purpose"—why that shoe is going to the public just as it is, unaltered by a foolish custom.

THE DESIGNERS will not be required to add anything unnecessary to it, nor to take anything out of it, to bring its price up to or down to any set figure.

THE MANUFACTURING COST of that shoe will be figured carefully; five per cent. will be added and a further allowance covering the actual cost of selling that shoe to the customer, and the resulting sum will be the price of that particular shoe, whether it is \$3.35, or \$3.50, or \$4.85, or whatever it is.

THE PRICE WILL BE STAMPED ON THE SHOE AT THE FACTORY and certified public accountants will verify the prices and also verify the fact that only five per cent. commission is added.

YOU GAIN MORE than the dimes you save by the odd prices. You gain also by better balanced quality and by the fact that you pay only for what you want.

REGAL Style-Builders now have a free hand. They simply get out the BEST SHOE THAT THEY CAN DEVISE for a certain purpose at about a certain price. You pay for exactly what you get, plus the fair 5 per cent. You are taxed nothing for useless additions.

Regal Shoes Give You What You Want At The Lowest Price That Can Buy It

REGAL SHOES

FOR MEN

CANNON & FETZER CO.

City Pressing Club

I have purchased outright a dry preparation for cleaning ladies' garments that I guarantee to give satisfaction, or I will make no charge for the work. I am sole owner of this preparation and on account of the excellent satisfaction it has given I make this proposition to the ladies of Concord and vicinity: Send us any articles or garments you want cleaned and after we use this dry cleaning preparation on them, if they are not entirely satisfied with the work I will make no charge.
