DANGEROUS LIES.
 That a lie which is half a truth is ever the blackest of lies;
 That a lie which is all a lie may be met and fought with outright;
 But a lie which is part a truth is a harder matter to fight.
 —Alfred Tennyson.

Recently the board of aldermen of Concord passed an ordinance that liquor should not be sold in the drug stores of that town, and now the commissioners of Cabarrus have passed an order to "prohibit the sale in Cabarrus county of spirituous, vinous, fermented or malt liquors or intoxicating bitters by any licensed or registered pharmacist. This is to apply to the county outside the corporate limits of Concord." Of course the commissioners mean they will refuse license for this purpose. That is the extent of their authority in passing prohibitory laws.—Statesville Landmark.

Judge Clark, the editor of the Landmark, who is almost invariably right in delivering his opinions, is a little off on this proposition. Section 6 of the prohibition act provides: "That nothing in this act shall be construed to prevent the county commissioners or governing body of any town or city from prohibiting the sale of spirituous, vinous, fermented or malt liquors or intoxicating bitters by any licensed or registered pharmacist in their respective counties, cities or towns."

One of the aldermen of Salisbury was arrested last week at Mooreville for retailing whiskey. He was caught with the goods. He was traveling in an automobile and about 75 pints of whiskey was found in the auto. John F. Ludwig is his name and he has been suspected of doing this sort of business before. He is a prominent man in Salisbury. Ludwig is the sort of citizen that takes delight in proclaiming that prohibition don't prohibit.—Wilkesboro Chronicle.

And the officers of the law the people keep in power in counties where such things are permitted are directly

responsible for the failure of the prohibition law, wherever it is a failure. The people are indirectly and primarily responsible when they put such men in office and keep them there. And Rowan is not the only county where this condition exists.

That "Two Window" Law.

Statesville Landmark.
 The railroads have about succeeded in putting the "two window" law of the Legislature out of commission. A member of the Legislature tells the Landmark that the intention in passing the law requiring railroads to have two ticket windows—one for the sale of tickets and one for exchange of mileage—in all towns of 2,000 and more inhabitants, was to put the burden on the railroads to show where such windows are not necessary, and if this is shown to the satisfaction of the corporation commission the place might be exempted. The commission, however, has put the boot on the other foot by exempting about all the towns, and putting it up to the people to show cause. It is said the exemptions were made on petition. Such a petition was circulated in Statesville but many people here knew nothing about it and it does not seem that any special effort was made to get a free and full expression of opinion.

The Mandacity Medal.

Charlotte Chronicle.
 Colonel Robert M. Phillips, of The Greensboro News, and chairman of the mandacity medal committee of award, is reminded that the time for the performance of that committee's duty is near at hand. The object sought to be obtained by this medal was the inspiration to a more entertaining class of literature on part of the State press. The medal has been doing its work well, and we should say that the committee will have at least half a dozen claimants, some of whom had never before been known to tell a lie. We might cite some instances, but we do not want to prejudice the case of one against the other. The game is still open and the man to whom Sherrill, the first winner, relinquishes the medal will have a distinction to be proud of.

In the Wake of the Measles.

The little son of Mrs. O. B. Palmer, Little Rock, Ark., had the measles. The result was a severe cough which grew worse and he could not sleep. She says: "One bottle of Foley's Honey and Tar Compound completely cured him and he has never been bothered since." Croup, whooping cough, measles cough all yield to Foley's Honey and Tar Compound. The genuine is in the yellow package always. Refuse substitutes. Sold by M. L. Marsh, druggist.

A Tip For the Ex-Governor.

Durham Herald.
 Mr. Aycock should not lose sight of the fact that one or two friends can generally make a man think that the whole crowd is clamoring for him.

At the Little Rock reunion of Confederate Veterans next week a concerted effort on the part of R. E. Lee Camp, No. 1, Confederate Veterans of Richmond, will be made to bring the reunion of 1913 to Richmond.

In the Cotton Belt.

Charlotte Chronicle.
 Reporting conditions in the cotton belt, The New Orleans Picayune says the weather during the past week has shown a considerable improvement all over the cotton belt. While there has been some rain, the showers have been scattered and generally light. Temperatures have been rather lower than normal, but it is doubtful if the cold was severe enough anywhere to do much, if any damage. While the frequent rains that occurred prior to May no doubt did some damage, there has been no extensive replanting necessary and there is every reason to believe that if the present fine weather continues farmers will soon have their fields free of grass, and the balance of the acres to be devoted to cotton planted, here is no doubt that the crop is well advanced in Texas and in parts of Louisiana, Alabama and Georgia. It is reported to be backward in Mississippi and in the Carolinas, but on the whole the situation is a vast improvement over last year, and considering the increased acreage devoted to cotton and the little actual loss that has resulted from the weather, the prospect for a large crop is good. It is worth noting that the increase in acreage is mostly in districts not extensively affected by the boll weevil pest.

Good Advice to Gov. Aycock.

Charlotte Chronicle.
 The advice given to the friends of ex-Governor Aycock by The Newton Enterprise, is as sound as a gold dollar. Governor Aycock would not go into the race unless he conscientiously believed it would be in answer to a demand by his friends. The real friends of this popular citizen would better advise him to keep out of it. There is more than one reason why they should do this, but those close to him and who hold him in genuine affection should desire to guard him against disappointment. He is too good a man to be offered as a political sacrifice, which, it is feared, would be the case.

Mexicans' Fighting Strength.

Washington, May 10.—An interesting bit of information laid before the Cabinet today was a statement of the strength of the Federal and rebel forces in Mexico. The statement shows that there are 23,455 men in the Federal army and 24,425 men in the insurrecto army.

Foley's Kidney Pills take hold of your system and help rid yourself of your dragging backache, dull headache, nervousness, impaired eyesight, and all the ills resulting from the bladder. Remember it is Foley's Kidney Pills that do this. Sold by M. L. Marsh, druggist.

Improved Automobile.

An automobile has been brought out in Europe that is light enough to be picked up and carried by two men whom it will accommodate.

Foley's Kidney Pills are a true medicine. They are healing, strengthening, antiseptic and tonic. They act quickly. Sold by M. L. Marsh, druggist.

To Remove Wire Stitches. A tool for removing the wire stitches from magazines has been patented by a Colorado man.

Passed Successful Examination.

Salisbury Post.
 Mr. Myron Fisher, of the county, who received an appointment to the Naval Academy through Congressman Cowles, has passed a successful examination. Mr. Fisher, who was attending North Carolina College, at Mt. Pleasant, when he was appointed, spent two months at Annapolis, stood the examination and about ten days ago returned to Mount Pleasant. During the latter part of last week he was notified that he had passed successfully. Mr. Fisher will remain at the Mt. Pleasant College until the commencement which will take place the latter part of this month, and early in June he will leave for Annapolis and probably take a cruise during the summer months. He will be in the naval school for four years.

You Look Old!

In nine cases out of ten it is not because you are old, but because you are tired, all worn out, and you act as if you just wondered how you are going to get through the season and do your work.

This condition may be caused by a run-down and debilitated condition, or by a bad cold which has left you without strength or ambition.

We want to ask every such person to try Vinol, our delicious cod liver and iron tonic, without oil. If it does not build you up and make you feel young, strong and well again, we will return the money you paid us for it. Isn't that fair? (Gibson Drug Store.)

Foley's Kidney Remedy Acted Quickly.

M. N. George, Ironside, Ala., was bothered with kidney trouble for many years. "I was persuaded to try Foley's Kidney Remedy, and before taking it three days I could feel its beneficial effects. The pain left my back, my kidney action cleared up, and I am so much better I do not hesitate to recommend Foley's Kidney Remedy. M. L. Marsh's Drug Store.

The Newspapers Did Not Overdraw the Picture.

Charlotte Chronicle.
 The grand jury thinks that the newspapers have slandered Charlotte in their reports of the scenes at the polls in the recent primary elections. The papers did not overdraw the picture. At the city hall box this writer saw one man moving among the crowd with a pint bottle of liquor in his hand—not in his pocket, mind you, but in his hand—and he was only one of a dozen drunks. But what good is that sort of testimony for the grand jury?

Rowan Wants a Farm Life School.

Salisbury, May 10.—Through the board of education of Rowan county and by the Rowan Farmer's Union, the board of county commissioners has been petitioned to establish a farm life school in Rowan. Ten counties in North Carolina are entitled to one school each, under the law by which the schools were authorized. The matter has been given careful consideration in Rowan and it is likely, that favorable action will be taken.

The death of Colonel A. S. Buford, of Richmond, Va., for many years the president of the old Richmond and Danville Railroad and one of the founders of the Southern Railway, is announced at his home in the above city.

Shoes at Cost Plus 5 Per Cent.

More About the Regal Shoe Co.'s Plan of Scientific and Economical Shoe-Selling

There is a bill before Congress to authorize the coinage of the half-cent

The advocates of this bill say that a half-cent coin would save the public hundreds of dollars a year. Prices like 6 1/2 cents, 12 1/2 cents, 37 1/2 cents, are common in the dry-goods shops. But if you buy only one yard of a 37 1/2 cent muslin, you must pay 38 cents. If you buy a half-yard of 35 cent muslin you must pay, not 17 1/2 cents, but 18 cents. So, the use of the half-cent is urged as a measure of economy.

If it is wise to split a cent, how much wiser to split half dollars?

If the public has lost thousands through the lack of a half-cent, how many millions has the public lost because there was no coin of less value than the half-dollar recognized in shoe stores?

Think a moment and you will see that this is a fact. Have you ever seen a fine shoe of standard make regularly sold at any other price than full dollars or half dollars—\$3.50, \$4.00, \$4.50, \$5.00, and so on?

Standard shoes have always been made to fit these arbitrary prices, fixed in advance. Why? We don't know—except that it is a trade custom, which is no reason at all.

Anyhow, the Regal Shoe Co. have abolished that custom

They have put the selling of shoes on the same exact, scientific, economical basis that governs the pricing of most other necessities of life, and which ought to govern all of them.

Regal Shoes will hereafter be priced at cost of making, plus five per cent. commission and the cost of selling.

Regals will be made in several general price-classes, but the actual price of every model will be figured as above by certified public accountants. AND STAMPED ON THE SHOES AT THE FACTORY.

The price will be stamped just as it figures out (except that there will be no splitting nickels). It may be an "odd" price, like \$3.85, \$4.35, etc.—or it may be an "even" price, like \$4.00, \$4.50, etc. Whatever it really figures, you will pay. There will be no "juggling" either of the shoes or the prices to make the latter conform to tradition.

This is the Stamp

This stamp is your guarantee of full Regal quality at the lowest price for which such quality can be bought. It takes all the uncertainty, all the unknown profits, all the unnecessary expense out of shoe buying.

It is your guarantee that the LARGEST POSSIBLE PROPORTION of the price you pay is returned in leather and workmanship.

In Regal Shoes MORE OF YOUR MONEY WILL GO FOR SHOE SATISFACTION and LESS FOR SOME ONE'S PROFIT than in any other make you can buy.

In Regal Shoes you get what you want, and pay only for what you get

If a heavier sole, worth 20 cents more, is put into a Regal Shoe that would otherwise sell for \$4.00, the price of that shoe will be \$4.20. Under the old system further and unnecessary expense had to be added also, to bring the retail price up to \$4.50.

If leather goes up, you will pay us only the exact amount of the advance. If leather goes down, you now automatically save 95 per cent. of whatever the Regal Factories save. Heretofore, small economies in factory cost could seldom save you anything.

If a new Regal model is designed that can be sold at, say, \$4.35, it will be sold at \$4.35. Under the old system, either the shoe had to be trimmed down to make it cost \$4.00, or unnecessary expense added to make it cost \$4.50.

Regal Prices Are Now \$3.35 to \$5.85

Can't Get Away From It

It is possible to nourish, strengthen and Rebuild the Brain by Food?

Every man who thinks uses up part of the brain each day. Why don't it all disappear and leave an empty skull in say a month of brain work? Because the man rebuilds each day.

If he builds a little less than he destroys, brain fog and nervous prostration result sure. If he builds back a little more each day, the brain grows stronger and more capable. That also is sure. Where does man get the material to rebuild his brain? Is it from air, sky or the ice of the Arctic sea? When you come to think about it, the rebuilding material must be in the food and drink.

That also is sure.

Are the brain rebuilding materials found in all food? In a good variety but not in suitable proportion in all.

To illustrate: we know bones are made largely of lime and magnesia taken from food; therefore to make healthy bone structure we must have food containing these things. We would hardly feed only sugar; and fat to make healthy bone structure in a growing child.

Likewise if we would feed in a full manner to insure getting what the brain requires for strength and rebuilding, we must first know what the brain is composed of and then select some articles (there are more than one) that contain these elements.

Analysis of brain by an unquestionable authority, Geoprogan, shows of mineral salts Phosphoric Acid and Potash combined (Phosphate of Potash) 2.82 per cent of the total, 5.12 of all mineral salts.

This is over one-half.

"Phosphoric Acid combined" and Potash 72.44 per cent from a total of 101.97.

Considerable more than one-half of Phosphate of Potash. Analysis of Grape-Nuts shows: Potassium and Phosphorus (which join and make Phosphate of Potash) is considerable more than one-half of all the mineral salts in the food.

Dr. Geo. W. Carey, an authority on the constituent elements of the body, says: "The gray matter of the brain is controlled entirely by the inorganic cell salt, Potassium Phosphate (Phosphate of Potash). This salt unites with albumen and by the addition of oxygen creates nerve fluid or the gray matter of the brain. Of course, there is a trace of other salts and other organic matter in nerve fluid, but Potassium Phosphate is the chief factor, and has the power within itself to attract, by its own law of affinity, all things needed to manufacture the elastic of life."

Further, on he says: "The beginning and end of the matter is to supply the lacking principle, and in molecular form, exactly as nature furnishes it in vegetables, fruits and grain. To supply deficiencies—this is the only law of cure."

The nature conclusion is that if Phosphate of Potash is the needed mineral element in brain and you use food which does not contain it, you have brain fog because its daily loss is not supplied.

On the contrary, if you eat food known to be rich in this element, you place before the life forces that which nature demands for brain-building.

Mind does not work well on a brain that is broken down by lack of nourishment.

Beans, another authority, shows A peaceful and evenly poised mind is necessary to good digestion.

Worry, anxiety, fear, hate, etc., etc., directly interfere with or stop the flow of Ptyalin, the digestive juice of the mouth, and also interfere with the flow of the digestive juices of stomach and pancreas.

Therefore, the mental state of the individual has much to do (more than suspected) with digestion.

Brain is made of Phosphate of Potash as the principal Mineral Salt, added to albumen and water.

Grape-nuts contain that element as more than one-half of all its mineral salts.

A healthy brain is important, if one would "do things" in this world.

A man who sneers at "Mind" sneers at the best and least understood part of himself. That part which some folks believe links us to the Infinite. Mind asks for a healthy brain upon which to act, and Nature has defined a way to make a healthy brain and renew it day by day as it is used up from work of the previous day.

Nature's way to rebuild is by the use of food which supplies the things required. Brain rebuilding material is certainly found in

Grape-Nuts
