Concord, N. C., August 26, 1911.

TRADE MORAL.—Trying to win a girl's love by taking her aunt buggy riding is like an attempt to do business without advertising.

The Union Republican, in its extremity to seize upon something for which to criticize the work of the Democratic Legislature, makes a great ado about the law which relates to furnishing medical schools the unclaimed bodies of paupers.

In its current issue The World's Work pays a deserved compliment to Secretary J. S. Kuykendall of Winston-Salem's board of trade, principally on account of the arrangement whereby Winston-Salem school children were acquainted with the industrial activities of the community.

For Every Bridge a Drink. Charlotte Chronicle. The following story comes from the mountains: Some aristocratic sports touring it at Blowing Rock made up a party amongst themselves to take a trip to Boone.

Mountain Travel is Immense. Salisbury Post. A railroad man, a passenger conductor on the Western, remarked while in the city yesterday afternoon that never before had so many people flocked to the mountains of Western North Carolina.

SEASON'S PLANS FOR STAGE PLAYERS.

New York, Aug. 25.—The theatrical season of 1911-12 is about to open and the big producing managers of this city, the star players, their supports and all the rest of the thousand connected with the task of preparing things for the opening of the theatrical season are as busy as bees in a clover field.

The producing managers have been extremely active during the summer months and, after a careful survey of the available new plays produced since the beginning of last season, have made their selection of such plays as, in their opinion, would best fit the peculiar tastes and talents of their star players, masculine as well as feminine.

John Drew will open his season at the Empire Theatre, New York, on and if the play makes a hit, will probably play with "The Single Man," ably continue in it for the rest of the season.

Ethel Barrymore will follow John Drew at the Empire Theatre, playing "The Witness for the Defense." Her leading man will be A. E. Anson.

Mrs. Fiske has prepared two new plays for the coming season and will open toward the end of September with "The New Marriage," a comedy by Langdon Mitchell.

Alla Nazimova, who is now under Charles Frohman's management, will appear in a new play adapted from the French, the name of which has not yet been given.

James K. Hackett will have two plays during the coming season, one by the author of "The World and His Wife," the other by James Fagan.

Margaret Illington has a new play, called "Kindling," from the pen of Charles Kenyon. She will tour the west during the first part of the season.

Elsie Ferguson will not begin her season until some time in October, when she will appear in "Dolly Madison," a play by Charles Nirdlinger.

"The Arab," a play of the Orient by Edgar Selwyn has been selected as the medium for the author of the play, who will play the title role.

Some time next month E. J. Dodson will open his season in "Gauvlet's Pride," a new comedy by Hartley Manners and later he will take the play on a tour.

Elsie Janis has decided to continue in "The Slim Princess" during the early part of the season, with the prospect of appearing in a new play later on.

Helen Lowell will star during the coming season in "Next," a new farce by Rida Johnson Young and expects to open her season in September.

Cyril Scott will appear in a new play entitled "A Modern Marriage," which has been adapted from the German by Harrison Rhodes.

George M. Cohan has been persuaded to return to the stage, and, supported by his parents will appear in his own play, "The Little Millionaire."

Henrietta Crossman will start her season in Catherine Chisholm Gushing's new comedy, "The Real Thing," but may make a change later.

THIS DATE IN HISTORY.

- 1818—Illinois adopted a State constitution.
1819—Prince Albert, husband of Queen Victoria, born. Died December 14, 1871.
1836—Buffalo and Niagara Railroad opened.
1856—First oil well bored by E. L. Drake at Titusville, Pa.
1862—The Minnesota militia, under Col. H. H. Sibley, advanced against the Sioux.
1863—General Burnside's force crossed from Kentucky into Tennessee.
1886—The Grand Army of the Republic began its 20th national encampment in San Francisco.
1890—Fire destroyed McVicker's Theatre in Chicago.
1891—Decennial census placed the population of Canada at 4,283,344.

THIS IS MY 60TH BIRTHDAY.

H. James Palmer. Hon. H. James Palmer, the Liberal party leader who a few months ago succeeded F. L. Hassard as Premier of Prince Edward Island, was born in Charlottetown, August 26, 1851. He was educated in the public schools of his native place, in the Prince of Wales College, and King's College, Windsor, N. S. After studying law in the office of his father, who was a noted lawyer and chief justice of Prince Edward Island at the time of his death, he was admitted to the bar in 1876 and the following year was made a barrister. Mr. Palmer's public career dates from 1900 when he was elected to the general assembly. He was defeated by a small majority at the general election of 1904, but was re-elected four years later. Previous to his taking office as Premier last May he had held several cabinet positions.

Hay, Fever, Asthma and Summer Colds

Must be relieved quickly and Foley's Honey and Tar compound will do it. E. M. Stewart, 104 Wolfram St., Chicago, writes: "I have been greatly troubled during the hot summer months with hay fever and find that by using Foley's Honey and Tar Compound I get relief." Many others who suffer similarly will be glad to benefit by Mr. Stewart's experience. For sale by M. L. Marsh, druggist.

Robert Edson will begin his season in Providence about the middle of the month, in "The Cave Man," a comedy by Gillette Burgess. Grace Ellison will be his leading woman.

More people, men and women, are suffering from kidney and bladder trouble than ever before, and each year more of them turn for quick relief and permanent cure to Foley's Kidney Remedy, which has proven itself to be one of the most effective remedies for kidney and bladder ailments, that medical science has devised. For sale by M. L. Marsh, druggist.

Baltimore appears to be gaining ground in its fight for the Democratic national convention.

Consumption Checked and in Early Stages, Cured by MILAM the great Reconstructive tonic and blood renovator

We do not set forth MILAM as a cure for consumption, but it has proven so beneficial to such patients that we believe, and are supported in our belief by a practicing physician, that MILAM will arrest incipient tuberculosis or consumption in its early stages. We know that it greatly benefits even those in the advanced stage.

Read the following Scrofulitic Consumption City of Danville, State of Virginia.—To-wit: I, Edmund B. Meade, Notary Public in and for the City of Danville, State of Virginia, do hereby certify that Abram Word, of Danville, Va., to me well known, did appear before me and being duly sworn, depose and says as follows:

"For ten years prior to August, 1909, I was under the care of a regular physician. Last spring this doctor told me he could do me no good, and I tried another for four months without receiving any benefit from him.

In August, 1909, I began taking Milam, and am now able to do my work without difficulty, my appetite is good, and I can eat and digest any food.

My trouble was said to be Scrofulitic Consumption, and I was wasted away to a shadow. I was so weak that I could hardly walk when I commenced on MILAM. I regard MILAM as a truly valuable remedy in all cases of blood trouble, whether eruptive, or proceeding from a lack of full, free circulation.

I have recommended MILAM to about twenty of my friends, and so far as I have seen or heard from them, they all speak in the highest terms of it, and are recommending it to their friends.

It was particularly beneficial to me in aiding digestion and building up an appetite. A. B. HAM WORD. In witness to the above, I have hereunto set my hand and the seal of my office, this 27th day of August, A. D. 1910. EDMUND B. MEADE, Notary Public. My commission expires Jan. 14, 1911.

WHAT THE FARM SCHOOL WILL DO.

Statement of Facts Concerning the Institution—Is Thoroughly Practical. Durham Ga. The farm-life school committee issues today the following statement of facts concerning the farm-life school in order to combat the large amount of misinformation that is being circulated amongst the voters of the county:

The bill establishing the farm-life school requires that the schools shall own and cultivate at least twenty-five acres of ground; that the school shall be equipped for stock, hog and poultry raising, and for dairying; that there shall be school buildings equipped for doing good high school work—one of the regular high schools now established may be used for this purpose.

The high school will give the usual high school training. In addition, the pupils will study soils, their nature and treatment; drainage, the use of fertilizers; plants and crops and their adaptation to certain soils; insects in relation to plant production; animals, their diseases and treatment, animal judging and growing, dairying, making, blacksmith work, tin work, painting, etc.

The school for girls will teach cooking, the economy of food preparation and selection; household sanitation, the selection of fabrics for clothes, etc.

The training is not a matter of book learning and school room training only. For the students must cultivate the farm; must grow the truck and other farm products; must grow cattle, hogs, and run the dairy. They learn to do by doing. They keep records and accounts and learn to do the things which they do in a profitable manner. A man who knows how to do a thing profitably will be apt to do it profitably.

There will be in charge of the school a mature man of good judgment, well trained in the sciences and in practical farming. He will be a man who can run a farm, growing all of the crops adapted to the soil. He will grow, according to the best practical methods, hogs, cattle, stock, run a dairy and do all these things in a profitable manner. He will be a man who can go to any farm in the county; give advice as to the treatment of the soil, the adaptability of crops to the soil, the use of fertilizers, drainage, the treatment of plant diseases and the growing of stock. It will be the duty of this man to do this for any farmer in the county.

There will be a woman who is thoroughly trained in cooking, sewing and household management to teach these subjects in the school and to give her time to lecturing in different parts of the country when she is called upon.

Other teachers as may be necessary to do the school work will of course be employed. \$80,000,000 Set out of the State. In 1899 the total crop values of North Carolina in round numbers was \$74,000,000. The state imported in this year, as well as can be established \$80,000,000 worth of products, most of which might have been raised here. Durham county imported far more than her share of this amount. Our county is far behind many other counties of the State in farming. Our lands are naturally well adapted, under proper treatment, to the growing of any crops which we need in our rapidly growing city. We have ample shipping facilities to fine markets for all the crops which we do not need at home.

Every dollar of the \$80,000,000 annually sent out of the state which can be kept at home helps every man, woman and child in the city of Durham as well as in the country.

The population of Durham is increasing rapidly. The demand for food products is increasing rapidly. Greater and greater demands are being made upon the farmer. Every man in the county, whether he lives in the city or country, is immediately and directly concerned in the improvement of farming.

The labor question will become such a problem that we must learn to make more and more on each acre of soil. An acre of land in France will yield more than many a two horse farm in Durham county.

Established in Other States. The farm-life school will revolutionize farming in Durham county within a few years. The idea of the school is not the fancy or dream of a theorist. More than thirty states of the American Union have these schools in operation. One needs but to know of their work in states like Wisconsin and Georgia to realize how practical and effective they are in accomplishing the results claimed for them.

The Legislature provided for only ten of these schools in North Carolina. Durham needs the school much worse than scores of counties in the state need it. Durham has never taken any backward steps. The county has not had an opportunity to put into its life in many days anything that means so much for its healthy growth; for the development of men and women, as well as the development of material resources.

Cost of the School. The school will cost the county very little, and when we think of the results, the cost is a mere song. The commissioners cannot levy more than 2 cents on the one hundred dollars

valuation and 6 cents on the poll. It will probably not be necessary to levy more than 2 1/2 cents. This levy will not be made until next year if the election is carried. The regular tax levy for state and county purposes may be reduced by that time more than the school bonds. So that the tax rate with the farm school will probably not be as much as the rate is now. A man paying taxes on a thousand dollars will pay, including his poll tax, for the farm school 21 cents. A man who pays tax on \$2,000 will pay 36 cents, 10,000, \$1.56. It will not cost any man much at most. The state gives as much for annual maintenance for the school as county raises. Ten counties in the state will get this fund from the state. Why cannot Durham be one of them? It would be poor business policy for the city and county to fail to establish this school. A man who investigates the question fully must see this.

Message From the Dead. Atlanta, Ga., Aug. 24.—Atlanta has had a message from the dead, according to R. B. Harrison, president of the local Psychological Research Society, who says he has established actual communication with the other world, while Thomas Edison, and the late William James and Lombroso have been striving in vain.

Harrison claims to have established communication with a dead friend, through a peculiarly sensitive, but not professional, neutral medium, a woman of this city. Prior to the friend's death he and Harrison had agreed that the one who died first would strive—if conscious in some other world—to establish communication with earth.

Shortly after the death Harrison went to see the medium, taking with him a little knife that the deceased had frequently used and always carried. He put the knife into the medium's hands. She went into a trance, and, according to the investigator, was soon speaking in the voice of his dead friend, saying that the shock of death had been great, but that he was afterward at peace. The dead friend sent word to his wife, through the voice, that it would be well for her to burn all his books on psychology, if they worried her. Then the voice ceased and communication could not be re-established.

The Danger in Ice Cream. Greensboro Record. Ice cream is a delicious delicacy, but in this kind of weather—the same brand we have been having, when wells are going dry as well as running rivers—it is well to be very careful in its make. Some time ago the board of health of the city examined a case of typhoid fever. Certain things were freely partaking of ice cream cones. The party from whom they were purchased was seen and it was learned that water from a well in the yard was used. This water was analyzed and found to be the most impure. The result was that the winner's license was revoked, yet he probably had no idea the water was impure. The patient with typhoid died. This incident does not mean that all ice cream cones or all ice cream is poisoned, but it does mean that extra care should be taken in its manufacture, made more important by the state of the weather and the consequent scarcity of water over the country.

\$100 REWARD \$100. The readers of this paper will be pleased to learn that there is at least one graded disease that science has been able to cure in all its stages, and that is Catarrah. Hall's Catarrah Cure is the only positive cure now known to the medical fraternity. Catarrah being a constitutional disease, requires a constitutional treatment. Hall's Catarrah Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for its list of testimonials. Address: F. J. CHENEY & Co, Toledo, Ohio.

Take Hall's Family Pills for constipation. Frank McIntyre will begin his star season in "Snobs," a comedy by George Bronson Howard, and will have the support of a strong company.

Wood's Fall Seed Catalogue just issued—tells what crops you can put in to make the quickest grazing, or hay, to help out the short feed crops. Also tells about both Vegetable and Farm Seeds that can be planted in the fall to advantage and profit.

Every farmer, market grower and gardener should have a copy of this catalog. It is the best and most complete fall seed catalog issued. Mailed free. Write for it. T. W. WOOD & SONS, Salisbury, N. C.

Note the Money-Saving Price Stamped on the Sole. No guess work about these new Regal prices. The price is stamped right on the shoe—at the factory. And it isn't stamped on until chartered public accountants have figured the cost of manufacture and of marketing and added the Five Per Cent. Commission. These accountants pay no attention to the old-fashioned superstition of "even money" prices. All they care about is an accurate, close-fitting price. The chief thing that Regal designers care about is to put just as much Value—just as much Style and Comfort and Wear—as they can squeeze into each shoe. The thing you care about in shoes—namely, big value in a close-fitting price—you're sure to find in Regals. \$335 to \$585 REGAL SHOES FOR MEN Cannon & Fetzer Co. Leading Clothiers and Gents, Furnishers. Concord, North Carolina.

Do You Want to Buy Real Estate? In City or County? If so, No Doubt I Have Just What You Want. I Offer for Sale the Following Real Estate in the City of Concord and in the Best Parts of Cabarrus County. Farming Property: 70 acres 3 miles east of Concord, lies well with red clay soil. 88 acres 5 miles easterly of Concord with buildings and 50 acres timber. 136 acres 5 miles easterly of Concord, two story dwelling, out buildings, 500 young bearing nursery fruit trees, 65 acres timber \$16.00 per acre. 200 acres 2 miles northeast of Concord. 200 acres well improved land in No. 7 township. 200 acres well improved land in No. 8 township. 131 acres in No. 11 township, two miles south of Concord. 3 1/4 acres in No. 4 township 2 1/2 miles south west of Kannapolis on two public roads, large orchard with plenty of fruit. A fruit crop has only failed once on this place in 20 years. Lies well and is very desirable.
