City Biltor ord. N. C., January 25, 1912.

A determined and strong effort is now being made by prohibition leaders of the country to secure the passage at this session of Congress of the long sought bill to prevent the interstate shipment of liquor into "dry" territory. For ten years prohibitionists have been seeking the enactment of legislation to prevent such shipments, as they know that 1-5. the strongest factor against the enforcement of temperance laws is the shipment of liquor into dry States, this shipment being not merely sanctioned but actually protected by the national government, which has sole power of regulating interstate commerce. It is the intention to have a law passed by Congress which will prevent Federal antagonism to a State law. It is in complete harmony with the provisions of the conthe stomach. stitution which give the States the right to administer their own affairs.
