Bad weather has set in along the Somme front, in northern France, and the Anglo-French offensive has halted. Both London and Paris report ressation of the heavy attack by the British and French which have wonthen many square miles of new round and carried the British with-

in four miles of Bapanne, virtually surrounding Combles, and seriously weakened the German grip on Peronne and Chaulnes. Meanwhile the Germans have made

a diversion in the Champaigne district, where the French last year made their offensive. Yesterday's reports from the Champaigne region tell of the notable artillery activity that was followed today by the annonnecement from Paris that the Germans last night made five successive attacks on the Russian troops there. The Russians checked each drive with artillery and machine gun fire, the her home near China Grove, after French war office reports.

Military observers point to the posibility that the main thrust of the illied Saloniki army may be directed from the Cerna valley, in which the Floring and Monastir, toward Prilep.
