

FRANCE ANXIOUS TO KEEP UP AGREEMENT WITH THE ENTENTE

This is the Impression Drawn From the Address by Premier Poincare at Charleville on Reparations.

WANTS ALLIANCE TO BE CONTINUED

Says Any Act or Word Which Would Weaken the Alliance Would Be Considered as Criminal by France.

Paris, Aug. 20. (By the Associated Press.)—The impression drawn from Premier Poincare's address at Charleville is that France does not desire to see an end of the entente and that she hopes a way to an agreement with Great Britain can be found.

Refuting many of the statements made in the recent note of Marquis Curzon, especially the argument that the Ruhr occupation was illegal—he referred to the alliance of the world war, and pointed out that "friendships which remain sacred through hurricanes become neglected when the tempest has abated." He added:

"As far as we are concerned, we should consider as criminal any act or word which would tend to disturb or weaken this alliance. We have made and will continue to make all efforts to draw our policy closer to that of our allies, and will always be prepared to seek with them such alleviations as concerted action may bring to their sufferings."

VIOLENT STORMS FOLLOW INTENSE HEAT IN ITALY

Women Bathers, Caught Unawares, Flee in Panic at Lignano.

Lignano, Italy, Aug. 20.—After three months of high temperature, violent storms have broken out in this region, accompanied by electric discharge of extraordinary intensity. The sudden breaking of the storms caught the people unawares, particularly around the shore, and many women bathers fled in panic.

The schooner *Liberta* entered the harbor with a broken mast and lowered flag, two members of her crew having been killed by a lightning bolt which shattered the mast.

Violent storms also are reported from Florence and Pistoia.

Buy Quick in Germany. New York, Aug. 20.—He who hesitates while shopping in Germany loses his money, was the word brought into port today by Captain Ball Kuhnemann, of the liner *Hannover*.

Captain Kuhnemann said he was shown a pair of shoes in a Bremen store for 5,000,000 marks and that while looking at something else the price advanced to 7,000,000 marks. He demonstrated and was told that a new quotation on Marks had just been received.

He returned the next morning, thinking marks might have risen overnight. They hadn't, and he paid 11,000,000 marks.

"Cast Your Bread Upon the Waters." Salisbury, Aug. 20.—Mrs. R. Lee Mahaley has just received a note of thanks from a German woman whose husband got a suit of clothes which Mrs. Mahaley contributed during a near east relief campaign in the spring.

In the pocket Mrs. Mahaley placed a note and a self-addressed envelope with the request that whoever got the clothing should send her a line. The writer of the note of thanks said the clothing came just at the right time as her husband had no nice clothes and had been sick. She said her husband's wage was not enough to live on.

Rev. L. A. Thomas and Mr. S. Kay Patterson left this morning with a company of boys from St. James Lutheran Church on an outing of about a week at Bridgewater, near Morgantown. They made the trip in automobiles.

Scientists have succeeded in discovering the dimensions of the atom, which is now known to be about one-thirtieth of an inch in diameter.

TUCKER TO CARRY CASE TO STATE SUPREME COURT

Wants Suit Against the United Textile Workers of America—May Go to Legislature.

Charlotte, Aug. 20.—The damage suit brought by F. E. Tucker, of North Charlotte against the United Textile Workers of America, will be carried to the State Supreme Court, and if lost there an effort will be made to have the Legislature take a hand in the case, it was stated here today by counsel for the plaintiff.

Tucker, formerly President of the North Charlotte local of the Union, brought suit in Superior Court here, charging that Harry Entangh, an organizer had read a letter before a union meeting charging him with being a "go between" for a detective agency and a mill.

Judge W. F. Harding held that such an incorporated association as the union cannot be sued, and the only recourse would be individual suit against its members. Appeal was announced from this decision and Mr. Marshall stated that if after its hearing set for November, the Supreme Court upholds Judge Harding, the Legislature will be asked to make such organizations liable for the acts of its representatives.

TRIAL AGAINST ROBERT GARRETT CALLED TODAY

Many Important Decisions Covering Points of Law, Certain to Be Brought Out.

Cumberland Courthouse, Va., Aug. 20. (By the Associated Press.)—With the calling today of the trial of Robert O. Garrett, clerk of Cumberland County circuit court, who is charged jointly with his brother, Larkin C. Garrett, with the murder last June 5 of the Rev. Sylvester Pierce, a Baptist minister, Virginia's most noted case in recent years, entered its second phase, with indications that developments will rival if not surpass the trial of Larkin Garrett three weeks ago. That all the ground covering constitutional rights, change of venue and other legal technicalities that featured that trial would be fought over again was forecast weeks ago, and the first of these—that of a change of venue—still was the storm center around which the legal battle renewed today was expected to be waged.

GOVERNOR HEARS PLEAS OF BARRETT'S ATTORNEYS

They Argue That Augusta Cotton Traders Should Not Be Tried in South Carolina.

Columbia, S. C., Aug. 20.—Attorneys for four members of the bankrupt August cotton firm of Barrett & Co. appeared before Governor Thomas G. McLeod today to argue against issuance of requisition seeking to bring them to Aiken County for trial on charges of obtaining goods under false pretenses.

They argued that the sum of \$13,077 mentioned by C. R. Lybrand, of Wagner, S. C., who obtained the warrant, in reality is a disputed account and should have been placed before the U. S. District Court which has charge of the affairs of Barrett & Co.

World's Largest Airplane Engines Nearly Complete.

London, Aug. 20.—The British Air Ministry experts are at work perfecting an airplane engine capable of developing 1,500 horsepower, which will be the largest known. Two trial engines are nearing completion and will soon be tested.

The new giant of the air will have six cylinders, each developing 250 horsepower. If the present experiments are successful the experts will begin work on a 12 cylinder engine to have more than 3,000 horsepower. Airplanes fitted with three such engines will be capable of developing upwards of 9,000 horsepower, and will carry 120 passengers at 100 miles an hour.

Four Years For Luring Girls.

New York, Aug. 19.—For promising girls jobs as motion picture actresses in an effort to lure them into vicious lives, Harry Kramer, aged 20 years, of Providence, R. I., was sentenced Friday by Judge Nott in General Sessions to serve two to four years in State Prison.

Kramer was convicted on testimony of young women, who said he had represented himself as an official of a big motion picture producing concern. He told them, they testified, he wanted some girls to go to Florida, where his concern was to make a picture. The complaint was pressed by the Chorus Girls' Equity Association.

Miss Shirley Undergoes Second Operation. Several days ago Miss Edith Bell Shirley submitted to an operation in the Presbyterian Hospital, which was successful, and she has recovered sufficiently to undergo another operation at the same hospital this morning. Miss Shirley's many friends will be interested to know that her condition is very satisfactory and that a message from the hospital states that she is resting very comfortably, considering the seriousness of the operation today.

Ship Goes Ashore.

(By the Associated Press.) San Francisco, Aug. 20.—S. O. S. calls saying the freight steamship South Dakota went ashore at 2:50 a. m. on the Pacific coast of Mexico about 500 miles from San Pedro, Cal., were picked up here early today by the Radio Corporation of America.

Buy Chemical Co.

(By the Associated Press.) New York, Aug. 20.—The National Lead Co. today announced that it had purchased the National Pigments & Chemical Comp. any. of St. Louis, in order to assure the Titanium Pigment Co., one of its subsidiaries, a plentiful supply of barytes, which is used in the manufacture of Titanox.

Of the first ten President of the United States five were members of the Episcopal Church.

THINK 346 PERSONS WERE KILLED WHEN STORMS HIT SEOUL

Advices Reaching Tokyo Place Number of Dead at 346, With More Than 1,000 Missing.

25,000 HOUSES ON RIVER DESTROYED

British Boat, Thought to Have Been Sunk, Makes Its Way Safely Into Port of Manila.

Tokio, Aug. 20. (By the Associated Press.)—Advices received here today from Seoul said that 346 persons are dead and more than a thousand missing as a result of the recent tidal wave and storm in the more western provinces of Korea. Damage to houses and other property also was great.

The storm was the heaviest along the Yalu River on the east coast of Korea. The first report of the storm received here on August 15, said the tidal waves submerged 25,000 houses along this river.

Manila, Aug. 20. (By the Associated Press.)—The British steamer *Ming Sang*, which was reported sunk in the Hong Kong harbor during the typhoon Saturday arrived here safely this morning after a tempestuous voyage. Her officers reported the vessel seen to sink in Hong Kong probably was the British steamer *Leon Sang*.

The *Leon Sang* is a ship of much the same type as the *Ming Sang* and might have been mistaken for her.

Many lives were lost with the steamer whose identity was in error. Of those aboard, only two European officers were saved.

A minor typhoon has been raging here the last three days. With it came a heavy rainfall.

ANTHRACNOSE, OR BOLL ROT

Is Again Making Itself Felt in Certain Parts of the State.

(By the Associated Press.) Raleigh, Aug. 20.—"Anthracnose, or 'boll rot,' is again making itself felt in certain parts of the state," says Franklin Sherman, chief entomologist for the Department of Agriculture, in a report issued here. "This disease," the report continues, "occurs in every year of the state where cotton is grown and causes more or less damage every year, but from reports received by the agricultural department, it is indicated that the damage is more severe than usual in the edges of Wake, Johnston, Nash and Edgecombe counties."

"A delegation from this section was in our office last week," the entomologist says in his report, "and told of whole fields being ruined by this destructive disease."

"The Anthracnose may be distinguished by small reddish dots of the cotton bolls. These spots increase in size, reaching a diameter of an inch or more and sometime uniting with other spots until the whole boll is covered. Wherever the 'boll rot' occurs it does some damage, no matter how little the plant is affected, if it is there, it will cause more or less damage."

Mr. Sherman says that there is nothing that can be done to combat the disease this year, but that steps towards preventing its encroachment next year can and should be taken. He suggested that the following rules be observed:

"Do not plant cotton next year on fields that have been infested this year. The fungus may live a year in the soil, thus forming a source of infection for next year's planting."

"Be careful in selecting seed for next year's crops. If possible secure these seed from fields that were not infested this year and do not secure seeds from any field that had an infection of over 10 per cent this year."

"A proper use of the crop rotation system and care in selection of seed will do much to check the spread of Anthracnose and will soon rid any section of the disease," Mr. Sherman concluded.

Goldboro Man Killed By Dive.

Goldboro, Aug. 18.—A distressing accident occurred at the Little river bridge, on the Raleigh road, near Goldboro last night, when Garland Russell, aged 25, popular car inspector for the Atlantic Coast Line Railroad, dived from a tree into less than six feet of water, breaking his neck and dying within a few minutes.

Mr. Russell and several companions were enjoying a swim in the river. It is said that Russell climbed into the tree and stated his intentions of making the dive. He was warned by his friends that the water was too shallow at that point, but disregarded the advice. Dr. David Rose, who attended the unfortunate young man within a short time after the accident, found him still alive, but a broken spinal cord made that impossible.

Denial From Legion Officials.

Columbus, O., Aug. 20.—Denial that the American Legion in Columbus was in any way officially interested in the attempt to capture Grover Cleveland Bergdoll or that any local officials of that organization had written C. Hoover Griffin, Hamilton, O. man, arrested after the attempted abduction, wishing him success in his enterprise, was made by State, county and local officials of the American Legion here today.

Our friends are again notified that we must charge for all notices of box suppers or entertainments when anything is sold or where an admission fee is charged. All such notices will be charged for at 5 cents a line each insertion.

Continue Search For Members of Macon Flogging Parties

(By the Associated Press.) Macon, Aug. 20.—City and county officials today planned to round up all automobiles not carrying state license tags in an effort to get at facts surrounding a series of floggings here in the past few weeks. In nearly all cases where kidnappers have carried away victims in motor cars, their automobile bore no tags.

Sheriff's forces last night captured three kidnappers and Rogers in the act of flogging two negroes. Two automobiles which were found near the scene of the flogging and said by officials to have been used by Rogers contained masks, a small sledge hammer, and a piece of heavy wet felt. One of the cars bore no license.

Will Call Troops If Necessary. Atlanta, Ga., Aug. 20.—Governor Walker has offered to call out the National Guard to check lawlessness in Bibb County whenever the local officials feel that additional forces are needed, and has received assurances from Sheriff Jas. Hicks, in Macon, that such a call will be made if an emergency develops, it was announced at the executive department today.

WARREN AND PAYNE ARE BACK IN WASHINGTON

Have Been Conducting Recognition Negotiations in Mexico City For Government.

(By the Associated Press.) Washington, Aug. 20.—Arrival in Washington today of Chas. B. Warren and John Barton Payne, American commissioners who conducted recognition negotiations in Mexico City, affords administration officials here their first real opportunity to study in detail the report of the conference. Careful examination of documents which in no way binds the United States to extend recognition to Mexico, necessarily will precede any action in that direction.

In the event that restoration of diplomatic relations between the two governments is the outcome of actual extension of recognition, it was said today, probably will not take place for some time. Not only will time be needed for officials to digest the formal report submitted by the American commissioners, but they are expected to obtain additional information regarding various phases on the situation, in conference with Mr. Warren and Mr. Payne.

Make Recommendations.

Washington, Aug. 20. (By the Associated Press.)—Chas. B. Warren and John Barton Payne, the American commissioners conducting the negotiations looking toward the resumption of diplomatic relations with Mexico, presented their report today to Secretary Hughes, and later carried it on to President Coolidge.

The report is a transcript of the proceedings between the American and Mexican commissioners at Mexico City, and proposes among other things two conventions: one to settle claims growing out of revolution; and another to settle mixed claims. The conventions are subject to ratification by the United States and the Mexican congress.

Mr. Warren in pre-sending the report of the proceedings to Secretary Hughes, declined to discuss it in any way except to say that it presented a basis for consideration of whether the United States is to resume diplomatic relations with Mexico. He added that the decision of the course would be made by Secretary Hughes and President Coolidge.

CARBURETOR IS CURBED AS GREATEST GAS THIEF

Bureau of Mines Evolves Method of Saving 22 Per Cent Monthly. Washington, D. C., Aug. 20.—The biggest gasoline thief of them all is the carburetor, according to the Bureau of Mines.

To increase the efficiency of its fleet of motor trucks, the bureau perfected a portable instrument which analyzes scientifically the exhaust gases, and as a result of consequent carburetor readjustments, found that the saving in gas for the first month amounted to 22 per cent.

An announcement passing the good news along to motorists today said carburetor guesswork was no longer necessary, and that further details of the experiments here could be obtained by addressing the bureau direct.

Announces Wholesale Prices For Gasoline.

Richmond, Va., Aug. 19.—Governor E. Lee Trinkle today made public wholesale price quotations in gasoline submitted to him in response to telegraphic inquiries which his office has made the past two days. The quotations ranged from 12 3-8 cents l. o. b. refinery at Erie, Pa., to 16 1-2 cents delivered in Richmond.

Gasoline is now retailing at 26 cents per gallon. This price includes the special State tax of 3 cents per gallon.

Want to Get Rid of "Undesirables."

(By the Associated Press.) Pocomoke, Md., Aug. 20.—A mass meeting of citizens has been called for this afternoon to consider means of ridding Pocomoke of "its undesirable elements," following the burning Saturday night of the parsonage and the narrow escape of the Rev. J. R. Rickens, his wife and two sons.

Washington, D. C., is said to have the greatest variety of trees of any city in the world.

FIRST SPECIMENS OF RARE ANIMALS BROUGHT TO U. S.

Two Animals Never Before Seen in the United States.

(By the Associated Press.) Chicago, Aug. 20.—Two animals never before seen in the United States are new additions to the Field Museum, brought here by Edmund Heller, State Librarian, who has returned from a year's spend in uncharted jungles of Peru, and the upper reaches of the Amazon's tributaries. Mr. Heller traveled through thousands of miles of country inhabited by savage and hostile tribes in his search for strange specimens for the museum.

The two new prizes, according to scientists, are the dinomyms, which he brought back alive and presented to the Lincoln Park zoo, and the capybara. The dinomyms is a rodent something like a woodchuck, which since its capture has become so domesticated that he follows his master about like a dog, according to Mr. Heller. The species is said to be nearly extinct, because it moves so slowly that its more powerful enemies can overtake it. It lives in communities, and its principal protection, Mr. Heller believes, is in that it generally travels with members of its clan.

The capybara, a large rodent, is somewhat like the beaver, but larger. This animal is almost as rare as the dinomyms, he said, and even the natives get them but seldom. There are still many animals in the jungles of South America, he brought back with him 1,800 specimens to be mounted by the Museum, including jaguars, tigers, armadillos, "anteaters" and 15 kinds of monkeys.

Along the route of travel through the jungle, the scientist said, are many savage tribes or fugitives from justice in more civilized lands who live without law in a semi-starved and half-sick condition. Virtually all these primitive peoples have some ailments, and they are treated with the white man's quinine and other medicines. Medical missionaries and school are unknown, he said.

Mrs. Heller accompanied her husband on the trip. She superintended the cooking and the nursing of the sick, as she herself is an expert bacteriologist. Mr. Heller has spent many years of his life in the interior of South America and Africa. When Colonel Roosevelt made his African hunting trip, the scientists went with him to prepare the specimens taken for the Smithsonian Institution.

FORBADE HIS WIFE TO BECOME 'MODERN'

So Mrs. James C. Ellington Sues for a Divorce From Her Chicago Husband.

Chicago, Aug. 20.—Women of intellect and talent are not of the stuff that good wives are made, in the opinion of James Corry Ellington, a real estate agent, according to his wife, Mrs. Carol Wills Ellington, who filed suit for divorce in the Superior Court today.

A series of commands, forbidding Mrs. Ellington to do the things which together might be descriptive of the so-called "modern" woman of today was given out by her attorney, Philip Richard Davis, as including:

"Don't attend musical concerts."

"Don't see or associate with intellectual men or women."

"Don't sing or play the piano."

"Don't spend money on books."

On April 2, 1922, Mrs. Ellington's bill alleges, she attended an afternoon concert by Mme. Schumann-Heink. On her return it is charged, her husband became so angered that he choked her and knocked her down.

When the "plain" wife could bear it no longer, the bill alleges, she went to her father, an Iowa minister, and Ellington then forbade her to sing in her father's choir on the ground that it was "culturing her voice."

The same rules were applied in bringing up their son, 4 years old, the attorney said.

British May Have Found Aircooled Flying Engine.

London, Aug. 20.—The aim of British airplane builders, for some time past, has been to produce a powerful multi-cylindered engine which would cool itself merely by reason of its own swift passage through the air. This would eliminate radiators, water pumps, and other impediments in water-cooled engines. Some of the best brains in the air world have been endeavoring to solve this problem.

The Duke of Sutherland, in presenting the prize to the winner of the recent English aerial Derby, remarked, "This day has seen the triumph of the aircooled engine," and it is now believed that he was revealing the official significance which is attached to the result of the race.

Judge Thinks \$1,000 Not Enough For Arm; Sets Verdict Aside.

Greensboro, Aug. 19.—When a Guilford Superior Court jury brought in a verdict of \$1,000 for an arm lost by N. M. Sexton, of High Point, while in the employ of the Raymond Veneer Company of that city, Judge T. J. Shaw, thinking it over, set aside the verdict, granting a new trial. He considered that \$1,000 is not enough for an arm. Sexton sued for \$50,000, charging he lost his arm because of negligence of the company.

Judge Shaw ruled that while he had no opinion to express as to the matter of who was negligent, still, if Sexton was entitled to recover anything at all, he was entitled to more than \$1,000 for an arm.

Opening of Conference Delayed.

(By the Associated Press.) Atlantic City, Aug. 20.—The opening of the State conference between authoritative operators and officers of the miners' union was delayed three hours today. The conference was scheduled to begin at 11 a. m. Failure of some participants to arrive in time was said to be the reason.

Mrs. S. W. Preslar on Saturday morning submitted to an operation at the Charlotte Sanatorium. A report from the Sanatorium yesterday afternoon states that her operation was successful, and that her condition is very favorable.

SEN. BROOKHART TO BE DEFENDANT FOR ALLEGED SLANDERS

E. T. Meredith, Former Secretary of Agriculture, Announces That He Will Sue Senator From Iowa.

HIS HONOR AND INTEGRITY AT STAKE

Mr. Meredith to Begin Suit to See Whether the Senator Can Prove "One of His Mouthings."

(By the Associated Press.) Des Moines, Aug. 20.—Charges by Senator Smith W. Meredith, of Iowa, that E. T. Meredith, while occupying the office of Secretary of Agriculture, sat in the Wall Street game and helped produce the greatest panic in farm prices in the history of agriculture, prompted Mr. Meredith to instruct his attorneys to file suit against the Senator for libel and damages of 30 cents, Mr. Meredith declared in a statement to the Associated Press today.

Senator Brookhart's charge made in an address at Radcliffe, Iowa, last Wednesday, Mr. Meredith said, "involved my integrity and honor, and was without basis in fact."

"But few people give any credence to Mr. Brookhart's statement," Mr. Meredith declared, "and while the damage of his statement might be more, I estimate his effectiveness at about 30 cents, so I have instructed my attorneys to sue Mr. Brookhart for libel and damages in this amount—the real compensation being in getting Mr. Brookhart on record on oath."

"The public will now have an opportunity to see how nearly he can come to proving even one of his many mouthings."

TO CELEBRATE BEGINNING OF PETROLEUM INDUSTRY

Sixty Four Years Ago Col. Drake Struck Oil at Titusville, Pa.

(By the Associated Press.) Titusville, Pa., Aug. 19.—Sixty-four years ago Colonel E. L. Drake "struck oil" at Titusville, formally ushering in what has since become the great petroleum industry of the country. He was the pioneer, and to celebrate his achievement a large body of representative oil and gas men will assemble here beginning August 27, the day upon which Colonel Drake's well actually sent forth its precious fluid.

The event has been celebrated in previous years locally, but this time plans have been laid to make the observance national, both in character and regional representation.

In addition to the reunion and social features of the program, there will be heard practical messages from the leaders in the business today, with A. C. Bedford, chairman of the board of directors of the Standard Oil Company, as the chief speaker.

Colonel Drake was guided in a remarkable manner in the sinking of his first well. Had he drilled any one of the thousands of wells which have been drilled since then, he would not have struck oil in any one of them at the same depth and in the same formation as the discovery well. There have been many wells as shallow, and shallower, in other formations, but the original Drake well was in a class by itself. The depth at which oil was found in it is given in the records as 69 1-2 feet, or less than half the depth to even the first sand in that locality.

Col. Drake seemed destined to strike oil at that particular spot, and did so in spite of all kinds of handicaps in the primitive conditions under which he worked, including the exhaustion of funds and at least temporary desertion by his original backers.

Davidson College Football Season.

Davidson, Aug. 20.—A new coaching staff, new athletic field and new conditions will surround the 1923 football season of Davidson College which will open on the last Saturday in September. The season's schedule calls for nine games, opening with Elon College, at Davidson and closing with Trinity on Thanksgiving day, November 29, with the scene at Winston-Salem.

William L. "Monk" Younger, assistant coach for the past five years at Virginia Polytechnic Institute, Blacksburg, Va., has signed as head coach at Davidson, his Alma Mater. With him will come Tex Tilson, varsity lineman with V. P. I. for five years. Tilson will devote most of his coaching to the Wildcat line-men.

Davidson's season schedule follows:

September 22, Elon, Davidson.

September 29, Presbyterian College of South Carolina, at Rock Hill, S. C.

October 6, Virginia Polytechnic Institute at Blacksburg, Va.

October 13, Citadel at Davidson.

October 20, Wake Forest at Charlotte.

October 27, Furman at Columbia (South Carolina state fair.)

November 3, N. C. State at Charlotte.

November 10, Clemson College at Clemson, S. C.

November 29, Trinity College at Charlotte.

Picnic at Watts' Cross Roads.

There will be a patriotic picnic at Watts Cross Roads Saturday, August 25, beginning at 3 p. m. Also a ball game in the afternoon. Everybody is invited.

Mrs. Kenneth McLelland and little daughter, Frances Carolyn, have returned from Chimney Rock, where they spent the week-end.

PERMANENCE

experience and financial strength are among the many advantages afforded by this bank when acting in Trust capacities.

CITIZENS BANK & TRUST CO.
CONCORD, N. C.
