## Beau Brummel Barrymore Deserts Broadway

**JOHN BARRYMORE,** the Beau Brummel of the stage, has deserted Broadway Broadway. Barrymore jumped from Paris to New York, and then to Hollywood, to star in the screen version of the famous play, "Beau Brummel," at the Warner Bros. Studios. Frunks, golf bags and bags of all description accompanied him on his route.

## COTTON STOCKINGS GIVE EMPHASIS TO SIMPLICITY OF AUTUMN STYLES

**CHICAGO—**Summer girls have come trooping back to town from vacations in knickers, one-piece frocks, and gay sports skirts and blouses, put away their informal, easy, colorful clothes and donned their sombre-colored tailored suits. "Fashions show a sharp change this fall," said a styles authority at the recent exhibition of the Fashion Art League. "It has been such a riotous summer and the tones of the fall fashions are so very conservative and subdued. But one thing the summer girls will keep, and that is the omnipresent cotton stocking." "I never would have believed a year ago that women ever would accept cotton stockings in the way they have. They like the feel of them. They like the looks of them. And they have made them smart. They discovered that the knit-to-fit hose, shaped in the weaving, never lose their trim contours, and after wearing them all summer with their shoes they are buying them

**TRIMLY MERCERIZED** now in the darker, richer colors for wear with their serge gowns and fall suits. It is as surprising a jump as that from bright colors to pastels. I had supposed the average fashionable woman was so wedded to silk hose she never would give them up for any reason, time, or occasion. "Four girls who had been away together on a vacation came in to show me how beautifully their cotton hose had worn and held their fit. Another girl defied me to tell whether the nude colored hose she wore with her beaded beige frock and dull copper brocade slippers was silk or mercerized cotton. I thought they were silk. I was wrong. They were mercerized and they had a lovely sheen."

## Pound of Sugar Costs More Than Some Jewels

Sugars that cost from \$75 to \$375 per pound, because of the excessive care required to make them, are used in scientific laboratories. One is useful in detecting typhoid germs, as these tiny organisms multiply rapidly when feeding on it. A sugar, made from corn cobs, brings \$120 per pound, while another, manufactured from scraps left over in making vegetable buttons, sells for \$140.

## Sir Walter Raleigh's First Pipe Shown in London

Sir Walter Raleigh's first pipe with which he is believed to have introduced tobacco smoking in England, has recently been found in London. Made by American Indians, and decorated with carved heads of people and animals, it is said that he smoked it on the eve of his execu-

tion. In the three centuries that have elapsed since, the spread of the habit has covered the civilized world. In the United States, a million and a half acres of land are given over to cultivation of many varieties of the plant, producing an annual yield far above a billion pounds, with a value of over \$250,000,000.

## Poultry Feeder and Rat Trap

A combination rat trap and dry-cash feeder is a rather novel addition to the poultry house. The feeder is a long box, 1 ft. high and 1 ft. wide, with a sloped and slatted top, through which the hens put their heads to eat during the day. To convert this into a rat trap, a 4-in. hole was bored in the end of the hopper, a short length of 4-in. stovepipe fastened in the hole, and a bag tied over the other end of the pipe and spread out on the ground. A heavy board cover was hinged to the feed box; this was kept open by means of a hook during the day, but the hook was released, and a small prop with a string attached to it used at night. The string led away to a distant window so that the poultryman could pull it without entering the poultry house and disturbing the rats. A yank at the string let the cover drop and trapped the rats inside. Then, by beating

## Soviet Picture Cars Draw Interest of Peasants

By sending trains of picture cars into the rural districts, the Russian government is attempting to educate in the principles of communism more than 100,000,000 people who, heretofore, have shown little or no interest in politics. Painted on the sides of the railroad cars by the nation's most skilled artists, are propaganda and educational designs illustrating the communistic doctrines. In trying to "sell" this form of government to the peasants, the Soviets probably have become the world's largest advertisers.

## Fifteen Years Added To Span Of Life In Past Fifty

Figures have been compiled showing that the average length of life for inhabitants of the United States has increased almost 15 years in the past 53. In 1870, the average was 41 years, while now it is almost 56. By 1950, the span will have reached the biblical threescore and ten, provided the present high standards of civilization and correct living are maintained, a scientist has predicted. In the 16th century the ordinary term of life was between 18 and 20 years, and about 1800, it was still less than 25 years. At the end of the 19th century, it ranged between 45 and 48 years.

## Show Case Company in New Home.

The Statesville Show Case Company has about completed the task of moving its plant from the old Ramsey building on East Broad Street to their new plant near the J. C. Holmes Lumber Company's plant, just off West Front Street. A representative of the Statesville Daily visited their new plant yesterday and was courteously shown through the various departments by Mr. T. M. Crowell, the sole owner.

## G. C. Bergdoll May Come Home to Enter Prison.

New York, Oct. 7.—Grover Cleveland Bergdoll, fugitive from justice in Germany, intends to return to this country, and to serve his sentence for draft evasion, his mother, Mrs. Emma Bergdoll, declared today on her arrival from Germany where she visited her son. "His return, she said, would have to

## When Examining the Storage Battery of a Car to See if Any Water is Needed, do not Simply Test one Cell; Examine them All. One of the Cells may be Cracked, and will Require Water Often than the Others. It is a Good Idea to Examine a Storage Battery once every two weeks. In adding distilled water to the battery, always bring the level of the electrolyte 1/4 in. above the top of the plates.

await the conclusion of court proceedings following the alleged attempt recently to kidnap him when one of the men who tried to get him out of Germany was killed and another wounded by bullets fired by Bergdoll. At the time of the attempted kidnaping, Mrs. Bergdoll declared, her son was preparing to return to the jurisdiction of the American courts. The attempt she characterized as unjust and unfair persecution. Mrs. Bergdoll said she would give out a statement about her son's intentions when she returns to her home in Philadelphia. Every thinking life creates its own atmosphere, and is responsible for its influence.
