**ICE!**

**To Protect Your Comfort This Summer**

"What do you fellows do in the winter?" asked a friend of ours.

Now, that seems a fair question. Very likely most people, like him, think winter is loafing time for the ice man.

Well here's what I have been doing:

Storing up ice against the heavy demand of the hot days; improving plant and delivery equipment; planning facilities equal to summer's heaviest demands.

In other words, working to protect the comfort and health of this community.

With an incidental serving of a growing list of families who have always realized the real economies in ice when used the year 'round.

If your family has not been one of these, you'll find it a real investment to start taking ice THIS WEEK. I can prove it to you very easily
