Better is a dry morsel, and quietne erewith, than a house full of sacrific ithout strife.— Proverbs 17:1.

Dear Folks: When shaking hands you're follow-ing an old established greeting, that's been for years the thing to do when folks and friends are meeting. There're many ways you're bound to find in which your hand is shaken, and there's a lot that you can tell by how your hand is inken.

von hand is shaken, and there's a lot that you can tell by how your hand is taken. Some folks will take it in a grip that series your bones a cracking; and some proper smacking. It leaves your ingers croupled up and red, and sore and shaking, it leaves you thinking that the show of friendliness was faking. And give if just a wiggle, while passing out some high brow stuff with now and and give if just a wiggle, while passing of the same will lift your hand up high and give if just a wiggle, while passing then a giggle. This method leaves you all at ease, it's not at all appealing. It brins a sort of sea-sicky and nauseated deeling. Still other folks will take your hand or rather theirs is taken, and not an inch it ever moves the while it's being while dath thas no sense of living. It leaves you much dissatisfied and full of deep migriving. But when the clasp of hands is firm and warm and hale and hearty you fell as tho you're mighty glad to know the opiness and pleasure in your meeting, band the gives you greeting. Cordially yours—T, V. R.

WHAT ABOUT THE COTTON SUP-PLY?

Will there be an actual cotton short age on August 1st? Will American mills have to close because they cannot get raw cotton? Taking for granted that eurrenet statistics are correct, Theodore Price, writing in Commerce and Finance intimates that on August 1 Am-erica will be "confronted by an absolute and unprecedented exhaustion of its

cotton supply." George L. Fossick, writing in the Memphis Commercial Appeal, believes cotton is going to be scarce, but he feels that high prices will prevail and that this price will bring out much cotton that is now being apparently hid. He says:

Because a minus quantity can never be an actuality and the condition thus

pre day would cost \$1,613,640 for sick-ness from these diseases that can be pre-vented.
Last year there were 498 deaths from measles and 52,066 cases; 482 deaths from whooping cough and 16,075 cises; and 13 deaths from smallpox and 8,322 cases. The loss of time to those persons suffering from these diseases represent a huge sum.
We are in sympathy with efforts to check these preventable diseases and we agree with the opinion as expressed by the health bulletin that made the figures of keeping well."

Much Against Little. Leonard Bacon, who was one of the best known theologians in New England a half century ago, was attending a con-ference, and some assertions he made in address were rehemently objected to by a member of the opposition. "Why." he expostulated, "I never heard of such a thing in all my life!" "Mr. Moderator," rejoined Bacon cidmly, "I can not allow my opponent's ignorance, however wast, to offset my knowledge, however small."

Good Refrigerators Mean Health

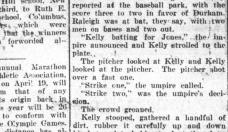

LEONARD REFRIGERATORS stand for Higher Theorem in retaining the parity of foods and preserving their Trekiness. By actual test it has been found that its cooling system of refrig-eration maintains a lower temperature than any other and the system of circulation keeps the air always dry and sweet. The improved drainage system will not clog and the remarkably small quantity of ice consumed make the prices low of than they first seem.
