

Shanghai Crowded With War Frightened People

Driven to City as Result of Battle That Was Waged Yesterday at Point About 15 Miles From the City.

GENERAL HSIANG WON FIRST BATTLE

His Army Drove the Invaders Back About Two Miles.—Battle Becomes General With Heavy Casualties.

Shanghai, China, Sept. 4. (By the Associated Press.)—After 24 hours of fighting within 15 miles of Shanghai, forces of Gen. Lu Young-Hsiang, ruler of the territory, repulsed the armies of General Chi Seih-Yuan and gained about two miles, according to a statement issued from the headquarters of the defense committee of Shanghai. Many casualties were reported.

Shanghai, crowded with foreigners who came into the city from the firing lines, today viewed the opening of hostilities with apprehension, and fear that the battle lines might come closer to the city before nightfall.

The engagement now in progress is becoming general in the area from the line of the Shanghai-Nanking railway to the coast, and heavy campaigning along the railway lines was reported.

The temper of foreign governments toward China's provincial civil war was indicated late yesterday when several contingents of British marines were landed in the foreign section of Shanghai, and 400 French sailors were sent ashore from warcraft now in the harbor. The French troops supplement a volunteer company on duty to defend the French settlement.

An indication of the proximity of the actual fighting to Shanghai was given yesterday when encounters between Chinese soldiers and players on the Shanghai Golf Club led to an order from the club governors suspending play until further notice.

Forty Thousand Troops Engaged. Shanghai, 6 p. m., Sept. 4.—Although troops estimated to number 40,000 battled throughout this sunshiny day, competent eye witnesses declared tonight that neither side had made any material gain in the fighting. The battle front today extended from the line of the Shanghai-Nanking railway to the Yangtze river, about 15 miles from Shanghai at the nearest point, and about 25 at the most distant.

Headquarters of the troops defending Shanghai claimed gains in two sectors. Both sides reported that they had added reinforcements to their fighting forces during the day.

Conscription of both men and women workers for war work was continuing today in many sections of the Chinese territory adjacent to Shanghai.

All day long shells whistled overhead. Several of them passed through a hospital building. Late in the day the Associated Press correspondent obtained an automobile truck and by using the truck and his own automobile, managed to remove the patients together with two American women, to safety in Shanghai.

Protection For Foreign Settlements. Washington, Sept. 4.—A protective cordon, composed of Shanghai volunteer troops and American, British, Japanese, and French sailors, will be thrown about the foreign settlement in Shanghai to prevent the entry of armed Chinese forces there.

The consul general at Shanghai advised the State Department today that arrangements for such a cordon had been completed. The dispatch indicated that the American sailors had been landed from the naval craft in Shanghai waters, although contained no direct statement of that action.

New Bell to Ring in Tower of 'Old South'.

Chapel Hill, Sept. 3.—When the Fall term opens at the University of North Carolina, a new bell in the old South building will replace the one in the Presbyterian Church now used as the campus' official announcer. The new bell, an exact duplicate of the one which rang last spring, has arrived, and was hoisted to the belfry in South this morning.

This is the third bell installed since the founding of the University. The first, installed in 1705, was destroyed by students who went on a "tear" one night and threw fire balls into the belfry, situated between the Old East and Old West buildings near the site of the present campus flag pole. A new bell was installed in the South building in 1850, so much like the old that former students could not discern the change.

SPECIALIST SAYS AMERICANS SHRINK WITH SPEEDY LIVING

Stunted Growth Is Resulting From "Eat and Run" Method of Americans.

(By the Associated Press.) Detroit, Sept. 4.—People of America have lost two inches in stature since the Civil War, according to Dr. John Harvey Kellogg, dietitian and superintendent of the Battle Creek Sanitarium.

"Stunted growth is resulting from our modern 'eat and run' habits," Dr. Kellogg said. "The American public gives little or no thought to the proper consumption of food. Our modern business activities are so hurried and intense as to allow no consideration for the most important element of healthful living, the proper selection and careful mastication of food consumed."

"The stature of the American people has dropped two inches in the last 60 years, due to the modern American custom of bolting our food like pythons. 'Food is fuel to the body, and poor fuel means a deficient output of energy just as too much fuel chokes the fire of health and retards normal development. 'A height in stature of over six feet prevailed in the early sixties; today the average normal height in stature of the American people is much below six feet, a condition attributable to our modern quick lunch counters and hurried mode of living."

THE COTTON MARKET

Quiet But Steady Opening With First Prices 5 to 11 Points Lower.

(By the Associated Press.) New York, Sept. 4.—The cotton market had a quiet but steady opening with first prices 5 to 11 points lower. Moderate Southern hedge selling supplied the market, but support became more active in the first half hour. Prices recovered the early losses, October advancing to 24.57 and December to 24.27, representing 2 to 4 points net advance.

The trade, Wall Street and New Orleans brought on the rally. Later, however, reflecting private advices of cooler weather in Texas the market again turned weaker, October dropping to 24.45 and December to 24.12, or 8 to 10 points under the previous closing.

The average of 14 private condition reports thus far issued is 61.2 per cent, and of the crop 12,775,000 bales.

Opening prices were: October 24.48; December 24.15; January 24.10; March 24.07; May 24.02.

Boston, Sept. 3.—Lieutenant E. C. Moffatt, United States Army, today established what is believed to be a new record for flying between here and New York City when he covered the 363 miles to New York and return in 2 hours and 12 minutes.

American Airmen at Pictou, Ready for Flight For Boston

Pictou, N. S., Sept. 3.—The two world-circling American airmen, Lieutenant Lowell H. Smith and Lieutenant Erik Nelson, with their mechanic, Lieut. Leslie T. Arnold and Lieut. John Harding, Jr., jumped from Hawkes Bay, Newfoundland, to Pictou, N. S., today.

The flight of 420 miles was made in six hours and 26 minutes. The fliers left Hawkes Bay at 10:12 o'clock, eastern standard time, this morning and came down on the water here at 4:38 o'clock this afternoon. Head winds and rain squalls somewhat delayed the aviators, but otherwise they found flying conditions favorable.

Because the late arrival here precluded the possibility of re-fueling, oiling and a general check-over of the planes before the coming of darkness, and owing

DECISION OF CAVERLY FINAL OPINION OF SLAYERS' COUNSEL

Darrow Sees No Ground on Which He Could Appeal—Judge Studies Whipped Facts.

Chicago, Sept. 3.—Judge Caverly today sent to the Criminal Court building for a special transcript of the coroner's report and the testimony of Dr. Joseph Springer in the Franks murder case. This move indicated that the fate of Nathan Leopold, Jr., and Richard Loeb may depend upon the manner in which they treated the body of the little boy after they had killed him. This testimony was whispered in the trial, after women had been excused from the court room. The defense sought bitterly all efforts to bring out testimony that the body of the little victim had been misused before it was kicked into a culvert.

Attorney Darrow, chief of counsel for the defense, doubts if there can be any appeal to a higher court, if Judge Caverly sentences Leopold and Loeb to hang. "This court has final jurisdiction. I am convinced," said Darrow. "I do not think there is any ground on which we could appeal before the Supreme Court of Illinois and seek a reversal."

Asked specifically if a writ of error could not be prayed, his answer was the same: "I do not think so."

"Angel-face" Dickie" Loeb is believed by State's Attorney Crows to be the "chisel bandit" who terrorized Hyde Park and Woodlawn districts a few years ago. He believes it is Loeb's chisel activities that are comprised in crimes listed as A, B, C and D, particularly "Crime D."

Loeb is said to have developed a fondness for a dexterity with a chisel early in life, when he found it a convenient method of putting persons "to sleep."

When wrapped in tape, the chisel inflicted no wound, according to the State's attorney, who said Leopold and Loeb committed many hideups and other crimes near their homes. It is said Leopold would lead a bit of ambush and confront the victim with a revolver, while Loeb, sneaking up from behind, would hit the victim with his chisel. The loot ranged from dollar watches to intelloboxes.

Stone Bruises Prescribed As Cure For Nervous Trouble.

Baden-Baden, Sept. 4.—Stone bruises on the feet are a sure cure for nervous disorders, in the opinion of a German specialist who sets many of his patients to talking in their farcetic over stony fields. PRIME MINISTER OF ENGLAND DISCUSSES PROBLEMS OF PEACE

Premier MacDonald Says the League of Nations Can Bring Peace to All Nations of the World.

WANTS CONFERENCE ON DISARMAMENT

Thinks Germany and the United States Should Be Asked to Take Part in the Conference.

(By the Associated Press.) Geneva, Sept. 4.—Prime Minister MacDonald, of Great Britain, speaking with notable feeling and forcefulness, declared to the assembly of the League of Nations today that Great Britain saw the only hope of future peace in the extension of the policy of arbitration and development of the League of Nations.

The British statesman urged the convocation of a disarmament conference in Europe, attended by representatives of all countries including the United States and Germany.

Insisting that Great Britain was intensely interested in the problem of security, Mr. MacDonald added "but we do not believe that military alliances can bring security." Such alliances would bring the world back to the situation which existed in 1914, he said. Agreements based on military alliances would break up the League.

Through the League, he said, it was hoped to lay the foundations of peace. The future happiness of the world must be based on agreements reached through the League. Warning against attempting to base peace on force he said "if we cannot devise a system of arbitration, then do not let us fool ourselves that we are going to have peace."
