Ruined.
Frederickshafen, Oct 12.—Colonel Valdavia, Spanish military attache at Berlin, was the worst disappointed man who watched the ZR-3 sail for America, and was bitter in his denunciation of the Zeppelin officials who refused to take him along.
Dolonel Valdavia had been negotiating for the trip for weeks and is said to have been told by Zeppelin officials he could make the trip if the United States government consented. As the airship will not be American property until delivered at Lakehurst, the United States government is alleged to have repled that the Zeppelin officials at the last minute denied him passage and he is reported to have declared that his carser was ruined, as the Spanish government expected him to sail on the dirigible and make observations, which were essentiate as failens the Matter Synthess and was the Matter States was the the Zeppelin Officials at the service of the take observations, which were essentiate as the Spanish government expected him to sail on the dirigible and make observations, which were essentiate the Zeppelin Company in establishing a factory in Spain.

 Greenville Ready for Big Textile Exposition.
 Greenville, S. C. Oct. 13.—One week from today, the sixth southern textile exposition will open in textile hall, in this city, and plans, already virtually matured, call for what will be the largest thing of its kind ever seen in Dixie—a show fully equal to the biennial Boston textile show. The exposition will last from Monday to Saturday, inclusive.
 Half a million dollars worth of machinery, goods and supplies will be shown during the week. These will enhance everything that goes into the anatomy of a modern cotton mill and bleachery. The latest in spinning and weaving machinery will be there and all accessory equipment which has to do with the industry will have its place in the exposition.

dustry will have its place in the expesi-tion. The first operation of machinery which will be exhibited during the expesition was entried out yesterday. Current was turned on several holms and heavy fin-ishing machines which already have been put in place on the first floor of textile hall. Heavy machinery, and that which will make some noise in operation dur-ing the show, will be on the first floor of the hall. Lighter machinery will oc-cupy the second floor and the new an-nex, a two-story structure which has been erected to care for the overflow from the main builging.
