The membership campaign for the Chamber of Commerce was formally launched Monday night at the Y. M. C. A, when workers in the drive met at a luncheon and perfected final plane.

At 5 o'clock the evecutive committee, of which T. D. Maness is chairman met at the Y and devised plans of putting the campaign across. Members of the committee were very enthusiastic and twelve memberships were sold among the committee inembers. Some of the members of the committee inembers but they are so enthusiastic they took out additional memberships.

At the luncheon Mr. Maness, F. C. Niblock, Dr. T. N. Spencer and H. W. Blanks spoke to the workers who are taking part in the campaign and their enthusiasm was reflected in the hearty responses made by the salesmen.

It was reported by the salesmen that a number of membership also were sold among them, but no definite reports on the number sold were made. The salesmen are holding back these memberships until final reports are made.

No luncheon was held at the Y at nooas was first planned. It was agreed that final reports would be made at a luncheon to be held at 6:30.

that mai reports would be made at a luncheon to be held at 6:30.

Officers of the chamber were confident on the eve of the campaign that enough new members would be secured to put the chamber on a sound financial footing. When this is done officers will adopt an ambitions program for the organization during the coming year.

One of the first things planned is a booklet setting forth in an attractive pianner facts about Concord and Cabarrus county. Another feature will be improvement of the tourist camp and a campaign to give the city and county wide advertisement throughout the country.

When work is started on the new hotel When work is started on the new hotel and the present hotel is razed, the chamber will act as a clearing house for rooms. Secretary Blanks will catalogue all rooms that are for rent and visitors in the city can escure rooms by calling at the offices of the chamber. Mr. Blanks plans to inspect all rooms that are offered for rent so he can know they are all desirable ones.

It will be necessary for the city to have between 50 and 75 rooms to care for the traveling public and officers of the chamber believe visitors in the city can be, cared for easily if those persons having rooms for rent will co-operate with them.

Salesmen in the campaign are visit-ing all parts of the city during the day, and several of them have reported good sales during the day. The final reports will be made at the luncheon at 6:30 to

New York, Nov. 25.—The cotton market showed a steady tone during today's early trading. Stopping of vesterday's notices appeared to have made favorable impression on sentiment which accounted for some covering by recent sellers. Buying also was promoted by reports that British spinners had adopted a proposal to increase their running hours next month. The opening here was somewhat irregular, initial prices being 8 points higher to 5 points lower, but the market soon advanced with January selling at 24.43 and with the general list showing net advances of about 15 to 20 points at the end of the first hupr. Opening prices were: December 23.95; January 24.28; March 24.65; May 24.98; July 24.90.

CURE FOR MALARIA
DEVISED IN MEXICO

Dr. George H. Hooper, of Gorgas Hospital, Conquers Disease With Mercurochrome,
Tampico, Mexico, Nov. 25.—A cure for malaria—second only in importance to the Pasteur treatment of hydrophobia, the insulin method for diabetes and other epochal medical discoveries—has been derised by Dr. George H. Hooper, member of the staff of the William C. Gorgas Hospital of this city.

The disease, while takes its annual toll in thousands, for addition to reducting the efficiency of uncounted numbers of sufferers, was defeated by the experiments of Dr. Hopper, who first conceived the idea of using mercurochrome, a new mercurial compound.

A specialist at Johns Hopkins University, Dr. Hugh H. Young, is said to have been the first to use mercurochrome, and by resolution requested the liquid has been employed successfully in treatment of infections of the kidney and in certain cases of blood poisoning.
