Bold Piece of Auto Theft.
Stany News-Herald.

What appears to have been one of the boldest pieces of theft ever pulled off in Stany County was that on last Saturday afternoon about 1 o'clock when Richard Burleson made up his mind that he needed a Dodge auto and deliberately hopped into the handsome new machine of John Boyette, Jr., which machine was parked in front of the R. N. Furr building, and deliberately drove it off to Charlotte. Mr. Boyette saw the auto leave, but thought nothing about the matter until when the machine was not returned, he called home and learned that his brother had not used the car at all. He then suspected that someone had stolen it and commenced, with the assistance of the police department, to use the wires to head off the fleeing trespasser. About 5 o'clock in the afternoon, Mr. Boyette received a telephone call from the police department at Charlotte saying they had his machine, and also that they had Richard, Boyette left for Charlotte and got his Dodge all right, and officers brought Richard back and lodged him in the county jail.

The Charlotte police found young Burleson in the machine on the streets of Charlotte and it is said that he confessed that he had "swiped" the auto, and told the officers whose machine it was. He will be given a preliminary hearing before Judge Ingram at an early date, but the act being a felony, will have to go to Superior Court for final disposition.

Young Burleson is around 17 years of age. His home is Albemarle.

SHOULD NOT BAN ETHYL GASOLINE

Editor of Chemical Journal Says Hazards Should Not Stop Manufacture.

New York, Nov. 27.—Manufacture of ethyl lead, so-called "hooney gas," should not be discontinued, despite the hazards involved, it is asserted in a report made public today by Dr. Harrison E. Howe, of Washington, D. C., editor of the official journal of the American Chemical Society. The report follows an investigation into the recent deaths of five workers at the Bayway, N. J. plant of the Standard Oil Company.

Discontinuance of the manufacture of the compound would be "folly," it is stated, the "price now having been paid" for an important economic advance. It further is pointed out that more than 200,000,000 gallons of ethyl gasoline have already been distributed by 20,000 filling stations in 22 states without apparent injury or loss of life.

"During the development work lives have been lost," the report states, "but with a better understanding of the effects of tetra-ethyl lead, illness has been steadily reduced among the workmen, until like many other toxic materials, it now can be produced in large quantity with safety."

It is emphasized that the motorists use ethyl gasoline in which the proportion of tetra-ethyl lead to gasoline "is from one to 1,000 to one 1,400, a dilution which makes a perfectly safe mixture."

Statesville has an association of citizens devoted to the purpose of making their little city more beautiful. They are planting maples on one street and dogwoods on another.

Three Famous Shotgun Shells

For field shooting there is nothing so accurate as the Western "Field" shell. This has been proved by its consistent winning of state, zone and world's championships.

For long-range shooting nothing equals the Western "Super-X" load—12, 16 and 20 gauge. It actually gives you 15 to 20 yards more range than other loads. It has a close and deadly effective pattern at remarkable distances. Use "Super-X"—you can get the game that other shooters have to pass up.

If you want a black powder load, ask for the Western "New Chief," which is as reliable as the "Field." The "Record" is the choice selection of shooters who prefer a high base shell. Come in and see us when you need shells, or rifle and revolver cartridges. We are dealers in the world famous

But it is real sympathy when he recognizes an obligation to see to it that the highest character of burial equipment is furnished at honest prices. Such a policy has been responsible for the success of this concern.

Typical of the burial equipment furnished by us is the Clark Grave Vault, recognized as a leader in the vault industry, because it gives positive and permanent protection.
