gossian is that, unlike most inventors who seek special

favors or hint at revolutionary dis-coveries, he is able to convince members of the patents commit-

tees of Congress that he "has something."

Back in 1918 a joint resolution providing for a demonstration of Giragossian's "free energy generator" was adopted by both houses of Congress.

This resolution guaranteed him full patent protection in case the test passed the analysis of a board of scientists.

Giragossian at that time declined to disclose his mechanism on the ground that the resolution put upon him the burden of proving that, he was the "first and original inventor" of the method, which he said he would be unable to do.

An amended resolution relieving the inventor of the necessity of such proof, but drawn so as to protect other inventors or discoverers making similar claims, has been reported from the House Patents Congress.

RAILROAD SCHEDULE In Effect June 28, 1924. Northbound.

Be careful for nothing; but in every thing by prayer and supplication with thanksgiving let your requests be mad known unto God. And the peace of God, which passeth all understanding shall keep your hearts and minds through Christ Jesus.—Philippians 4:6, 7.

m getting fat," said Abbey Lee doubt it's plain to see my reasing every day, I'll start away. No more of sweets

ight's increasing every day, Ill Start diet right away. No more of sweets il I partake, I'll give up candy, sweets d cake, but not today, that's much too m. So I'll begin tomorrow noon." Tomorrow came and Abbey said, "To-y's the day I use my head. Of course breakfast doesn't count, I'll eat my ular amount. But lunch will find me wettier in e diet that will make me regular amount. But lunch will find me starting in, a diet that will make me thim." So breakfast found her eating strong, and then her lunch time came along. But then the pangs of hunger came and Abby's will grew kind of lame, Said she, "I guess I'll start tonight and make my dinner good and light. What difference can a luncheon make?" And so she muched on pie and cake, and planned a dinner free from sweets just ned a dinner free from sweets justs, carrots, squash and beets.

onions, carrots, squasn and needs.

That nigh some friends came in to dine, and Abby said, "I draw the line feeding guests with thinning things, such treatment on approval brings. Tomorrow is the day I'll start, it's then from sweets and fatts I'll part. But as a hostess I must eat, regardless of what's fat or sweet."

The day of carelessness in this respect is gone if the thief is to be checked in his operations.

Time was when it was safe for persons to leave their front doors unlocked.

The day of carelessness in this respect is gone if the amount of other benefactions. He specifies that the university must live within its income, and wisely sons to leave their front doors unlocked.

any time during the afternoon or early evening hours. But this can't be done The expert burglar has made it e. He operates during daylight as is at night and he is as apt to walk

back hall or room which is cut off from view of the front part of the house. In this matter the general public must co-operate with the police. Keep windows and doors tocked and the thief will be checked. Certainly the afternoon and early evening thief will be checked. He is not going to break into a home at that is not going to break into a home at that time of the day or night even though he knows no one is at home. He is not go-ing to attract attentiton.

business is going to be fine during the new year and his opinion is held in high favor because he is a keen observer of tavor because he is a keen observer of conditions with a background of wide experience. Mr. Hoover does not talk just to be talking. He studies a thing out and then gives his candid opinion. And his opinion about 1925 is very optimistic. He thinks "the economic structure of the world is on a more sound

ture of the world is on a more sound foundation than at any time since the war." The Secretary points out that "there has been steady progress as a rule toward larger production and full er employment, and political as well as financial ability." Economic shock is financial ability." Economic shock is still possible, it is admitted, but Secre-tary Hoover thinks "the forces today in motion all tend to great promise for the forthcoming year,"

Reports from Raleigh indicate that no more than \$25,000,000 will be allowed by the Legislature for road work in State All along it has been generally accepted that \$35,000,000 would be voted but the budget commission is getting to rock bot-tom in all matters this year and it is vety probable that it will recommend an additional fund of not more than \$25,000,000. It is believed this am will carry the road work on for the two years and the Legislature of that year can make provision for the future ears. Economy is going to be the watch word of the next Legislature as well a the next administration. That is indi-cated strongly when it is shown that less noney for roads is contemplated. Per ons of the State have criticised large appropriations for schools, State institu tions and other causes but so far nothing has been said about money for roads. The roads are carrying themselves, as it were, and they have proved such a jo and blessing that the people have left them alone. But the budget commission seems inclined to cut down the allow ance for roads during the next two year at least, and other departments and causes may expect reductions also.

Trinity Accepts.

Lexington Dispate Lexington Dispatch.

Happily, one of the drawbacks some had feared might be attached to the Duke sift to Trinity College put in their appearance when the trustees came to the acceptance of the six millions for improvements and the thirty-two per cent. provements and the thirty-two per cent, of the income of forty millions more as endowment. It took the trustees of Trinity less than an hour to wind up the business of 'accepting the gift, which was done by a unanimous vote of the entire board, with the exception of Mr. Duke himself, who of course did not attend.

dine, and Abby said, "I draw the line on feeding guests with thinning things, such treatment on approval brings. Tomorrow is the day I'll start, it's then from sweets and fats I'll part. But as a hostess I must eat, regardless of what's fat or sweet."

Each day would bring some new excuse 'til Abby said, "Oh what's the use? It's not because my will is weak, but most of all it's health I seek. And diets often make you sick, so after all guess I'll sick to what I know, is good for me." Thy name is legion, Abby Lee.

Cordially yours—T. V. R.

A "CLOSED DOOR POLICY" NECES SARY.

Householders must adopt a "closed door" policy in face of the boldness with which robbers are operating in Concord and other cities throughout the country. The day of carelessness in this respect is gone if the thief is to be checked in his

BY HARRY B. HUNT

MAS Service Writer

WASHINGTON—Anyone wants ling expert advice about the feeding Cool With Coolidge" should apply to those distinguished journalists, George Haivey and William Allen White.

George and Bill were invited to spend a week-end with the president on a bit of a cruise in the good yacht Mayflower. Naturally, they accepted. Such invitations aren't turned down out-of-hand, even in winter time.

But the Mayflower had hardly cast: loose from her moorings with its distinguished cargo than the mercury started to fall. It dropped 60 degrees in the 30 hours covered by the cruise.

Of course neither Harvey nor White blames the weather on Coolidge. It was just a "coincidence," they say.

But hoth admit that "Keeping

they say.

But both admit that "Keeping
Cool With Coolidge" became a lot
more realistic during the cruise
than it did during the campaign.

UST as the air is full of all sorts of sounds, in these days of radio, so one needs only the oper mechanism to enable him to

radio, so one needs only the proper mechanism to enable him to pull a concert, a lecture or a bedtime story out of the ether.

Just so, also, is it full of illmitable energy, needing only the proper apparatus to enable mankind to draw from it the power with which to run automobiles, propel steamships, drive power plants and perform all the myriad tasks for which man now harnesses steam and electricity.

Such is the claim of Garabed T. K. Ghagossian, who has been at the heels of Congress for the past teight years to grant him special patent protection for an alleged "free energy" invention. This invention, which Giragossian claims would at once relieve us of the necessity of damming rivers or digging in mines to obtain sources of power, would simply enable us to "tune in" on the energy that has been stored up in the atmosphere since creation began.

"All this would be saved to fu ture, generations by my iree energy generator. And in the meantime industrial and social reforms beyond anything yet dreamed of could be accomplished."

WORLD PRODUCTION
OF COTTON LARGER

Leading Cotton Countries, It Is Esti-mated, Will Grow Total of 22,211,-000 Bales. Washington, Jan. 1.—Cotton produc-Washington, Jan. 1.—Cotton produc-tion in countries that grow between 93 and 96 per cent of the world crop is estimated at 22,211,000 bales of 478 pounds net as compared with 17,928,000 bales last year, the department of agri-

pounds net as compared with 17,928,000 bales last year, the department of agriculture announced today.

"The total world cotton crop will probably be about 23,600,000 bales provided all other countries produced the same quantity as last year," the department's announcement said. "World production last year was 19,300,000 bales and the average for the 1909-13 five year pre-war period was 23,580,000 bales and the average for the 1909-13 five year pre-war period was 23,580,000 bales. Brazil is the only important producing country not yet heard from.

Ex-Kaiser Plans to 71sit Corfu.

Athens, Greece, Jan. 2.—The ex-Kaiser Wilhelm of Germany is hoping this spring to visit again his old Palace at Corfu, which has been occupied for the past two years by the Near East Relief as a orphanage for 700 Armenian boys. The Palace occupies the most beautiful site on the Adriatic and was formerly the summer home of the German Emperor. It is in a spleadid state of preservation, thanks tothe excellent care taken of the property by the Americans, but there is considerable doubt asto whether either the Greek government or the Allies will regard the ex-Kaiser's proposed visit with favor, Greece has no desige to involve, itself in international complications which might conceivably follow Wilhelm's plan.

The Needed Improvement.
Caller: "And what do you want to do then you grow up?"
Harold: "Invent a permanent bath."

Haroid: "Invent a permanent bath."

It is always good to hear of how an appish tourist has been worsted in an encounter with a simple countryman.

A conceited English visitor got into conversation with a native on the far western coast of Cornwall this summer, and tried to be witty at his expense.

"It's a magnificent view from this headland," said the tourist.

"Yes," was the reply; "we can see a long way."

"I suppose," went on the Englishman, "on a fine day you can make out America?"

"Farther than that," was the
