

# Famous Inventors To Figure In Sixth Hall of Fame Election

Charles Goodyear  
By GEORGE H. JASON

THE American inventor at last is coming into his own, and republicans may thereby lose their reputation for ingratitude.

The signs of the times point unmistakably to recognition, albeit tardy, of the public service of those geniuses known as inventors.

This year, with the sixth quinquennial election of candidates for places in The Hall of Fame for Great Americans just announced by Dr. Robert Underwood Johnson, Director, the most significant evidence of popular recognition of inventive genius is expected. Already from the field of invention the nomination is assured of at least six candidates for election to seats among the immortals.

Other signs of the times are the announcement last month of plans for a \$24,000,000 National Museum of Industry at Washington; the world-wide celebration a little over a year ago of the fiftieth anniversary of the invention of the typewriter and the recent publication of two notable histories of American invention, "A Popular History of American Invention," by Waldemar Kaempffert, and "Leading American Inventors," by George Iles.

Strangely enough for a country pre-eminent in its achievements in the mechanical and industrial arts, only four inventors have been elected to The Hall of Fame since and including the first election a

Cyrus Hall McCormick

quarter of a century ago, while a total of sixty-three, fifty-six men and seven women, have been awarded places in this American Pantheon.

The four inventors who have won niches in the national colonnade at University Heights in New York are: Robert Fulton, inventor of the steamboat; Samuel F. B. Morse, inventor of the telegraph; Eli Whitney, of cotton gin fame, and Elias Howe, who gave the world the sewing machine.

Since the rules, which are laid down by the Senate of New York University, prescribe that a candidate is not eligible to election until at least twenty-five years after his death, many well known contemporary inventors, such as Edison, Bell, the Wright brothers, and Westinghouse, are yet barred from consideration. Their days will come.

But practically certain of receiving many votes and perhaps enough for election are the following names: Charles Goodyear, who discovered how to vulcanize rubber; Richard Marsh Hoe, the father of the modern printing press; Cyrus Hall Mc-

John Ericsson

Ericsson and Sholes, already possess the fame attendant upon connection of their names with their inventions. All save Sholes have been nominated in previous elections of The Hall of Fame.

Indeed it was not until 1922 that the magnitude of the service rendered by Sholes, obtained general recognition. At that time the story of the typewriter was told for the first time in a volume issued by the Herkimer County (N. Y.) Historical Society, and in September of that year a public celebration was held under the auspices of the society at Iilon, N. Y., where the Remingtons began the manufacture of the Sholes invention fifty years before.

The occasion attracted world-wide attention and for most people furnished the first authentic knowledge of the identity of the father of the modern standard typewriter. It was revealed at the time that Sholes, after many years of labor upon his writing machine, had, in 1878, entered into a contract with E. Remington and Sons, the noted gun manufacturers of Iilon, N. Y., for the production and marketing

Christopher Latham Sholes

of his invention. The new machine, from the very first, bore the name of the manufacturer—for the best of business reasons. The name Remington, already famous in manufacture, had a marketing value which was needed in the uphill work of convincing the world of the usefulness of the new invention. But this obscuring of the name of Sholes had its natural effect in delaying for many years a proper recognition of the magnitude of his service. It was only last year that a memorial Commission was organized over his grave in Milwaukee.

According to the plans announced by Dr. Johnson, nomination of candidates for election to The Hall of Fame will be received from the public at any time between February 1 and March 15. Upon the closing of nominations, the names of all candidates are to be submitted to the Senate of New York University, by whom all patently unworthy names are eliminated and the remaining names submitted to the Electors of The Hall of Fame, a body composed of about 100 Americans of the highest eminence in the chief fields of human activity.

### McCORMACK CANCELS ALL ENGAGEMENTS

Noted Singer Forced to Take Rest as Result of a Slight Cold.

New Orleans, Feb. 9.—On advice of his physicians, John McCormack, the tenor, has postponed all concert engagements for the immediate future until March, and will leave here for Miami, Fla., tomorrow, where he will spend about two weeks resting, it was announced here this afternoon.

Mr. McCormack arrived here Saturday and en route contracted a slight

cold, which was aggravated Saturday afternoon when he attended the races. He was to have appeared in concert here tonight.

He announced that he had originally planned to take a short vacation in March and that he would go now, filling his February concert dates in March.

The race course at Aintree, near Liverpool, where the grand National Steeplechase is run, is generally considered to be the finest steeplechase track in the world.

### PUT CREAM IN NOSE AND STOP CATARRH

Tells How To Open Clogged Nostrils and End Head-Colds.

You feel fine in a few moments. Your cold in head or catarrh will be gone. Your clogged nostrils will open. The air passages of your head will clear and you can breathe freely. No more dullness, headache, no sneezing, sniffing, mucous discharges or dryness; no struggling for breath at night.

Tell your druggist you want a small bottle of Ely's Cream Balm. Apply a little of this fragrant, antiseptic cream in your nostrils, let it penetrate through every air passage of the head; soothe and heal the swollen, inflamed mucous membrane, and relief comes instantly.

It is just what every cold and catarrh sufferer needs. Don't stay stuffed-up and miserable.

### Pine-Tar and Honey Still Best for Chest Colds and Coughs

Our mothers and grandmothers would never be without pine tar syrup in the house for coughs, chest colds, etc. This was many years ago, but modern medicine has never been able to improve on this time-tested remedy.

Doctors say the pine tar is hard to beat for quickly loosening and removing the phlegm and congestion that are the actual cause of the cough. At the same time pine-tar and honey soon soothe and heal all irritation and soreness.

The kind that has been used with never failing success in thousands of families for years is that known as Dr. Bell's Pine-Tar Honey. This is scientifically compounded of just the right proportions of pine-tar, honey and other quick-acting, healing ingredients which the best doctors have found to aid in quick relief.

It contains absolutely no opium, narcotics or harmful drugs, so can be given to young children—fine for spasmodic croup. It tastes good, too. If you want the best, a medicine that often stops the severest cough overnight, be sure you get Dr. Bell's Pine-Tar Honey. It costs only 50c at any good druggist.

West Virginia Lady Says That She Was in a Serious Condition, But Is Stronger After Taking Cardui.

Huntington, W. Va.—"I was in a very weak and run-down condition—in fact, was in a serious condition," says Mrs. Fannie C. Bloss, of 1964 Madison Avenue, this city.

"In my left side the pain was very severe. It would start in my back and sides. Part of the time I was in bed and when up I didn't feel like doing anything or going anywhere.

"Life wasn't any pleasure. I was very pale; I was nervous and thin, and so tired all the time.

"My druggist told me that Cardui was a good tonic for women and I bought a couple of bottles. I took two bottles, then I noticed an improvement. I kept on and found it was helping me. I have taken nine bottles. I'm stronger now than I have been in a long time."

Cardui is made from mild-acting medicinal herbs with a gentle, tonic, strengthening effect upon certain female organs and upon the system in general.
