

FIND ROOF OF THE CAVE WHICH HOLDS COLLINS PRISONER

Diggers Who Are Seeking to Rescue the Cave Searcher Struck Limestone at Point About 45 Feet Deep.

DOWN DRAFT NOW STRONG IN SHAFT

If Cave Is Not Found Soon Workers Will Start Tunneling In Effort to Locate Imprisoned Man.

Cave City, Ky., (By the Associated Press).—The limestone roof of Floyd Collins' cavern was reached at the base of the rescue tunnel early this morning at the 45-foot stage and any minute the diggers expect to find the crevice or cavern which can be opened sufficiently for rescuers to work their way down to Collins, pinned in a rock vise at the foot of Sand Cave.

The down draft in the rescue shaft became stronger this morning, nerving the weary diggers to fresh efforts. The return late last night of the western Normal football squad, excused from classes until the finish of the race against death, also heartened the diggers, although they all realize probably two days may elapse before they reach Collins unless fate points the way through an unexpected tunnel.

The bottom of the dirt and stone cap overlying the roof of the old cavern which once filled the Iny Sand Cave valley was reached early this morning when shelling limestone appeared, with solid rock not far ahead. More exercises brought to appear, increasing the down draft, but none was yet found which would indicate any sizeable tunnel. The cheering developments, it was pointed out by H. P. Carmichael was the reaching of the crevice stratum, proving that a cavern was near at hand.

The return of the Western Normal football squad which had worked all day Monday threw the rescue squads into a four-man race which is making the dirt fly under almost superhuman drives. Striving against the Normal gridiron boys is a group of Louisville youngsters composing another set of shifts.

Then there are two sets of veterans in the senior division, the Kentucky Rock Amphib Company, professional miners, and the Louisville and Nashville track workers, being used to excavation work. Despite additional tent shelters and blankets received last night from the military stores, the diggers suffered much from the cold and extra precautions were taken by the hospital staff to insure that none of the volunteers developed pneumonia. Those who develop colds are taken off the shift.

SHAFT MORE THAN 45 FEET DEEP NOW

Cave City, Ky., Feb. 12.—This morning, at 9 o'clock the shaft, according to the bulletin at 9 o'clock this morning, issued by M. E. S. Posey, engineering representative of Governor Fields, said that the depth of the Sand Cave rescue shaft was about forty-five feet. He gave 9 o'clock Saturday night as the maximum time in which the shaft would reach the maximum depth to which it would be driven.

"We appear to be close to the roof of the cave, and have speeded up the rate of excavation to the rate of ten feet in 24 hours," Mr. Posey's statement said. "There is great possibility of finding an opening at any time."

FIFTEEN INJURED IN AN ENGRAVING PLANT

Accident Occurred in Engraving Room of Chicago Evening American Today. (By the Associated Press) Chicago, Feb. 12.—Approximately 15 persons were reported to have been injured, some seriously, in an explosion in the engraving room of the Chicago Evening American today. Fire followed the explosion. The injured included three young women, were taken to the hospital. The explosion was said to have occurred in the handling of a mixture of ether.

Vermont Rejects Child Labor Amendment

(By the Associated Press) Montpelier, Vt., Feb. 12.—The Vermont House of Representatives today adopted by a vote of 220 to 3 a resolution advocating rejection of the child labor amendment to the constitution.

Mrs. Kenneth Faggart, of No. 11 township, underwent an operation for the removal of her tonsils here this morning.

BITS OF INAUGURATION HISTORY

Much of Romance and Color Is Found in the Various Ceremonies. Washington, D. C., Feb. 12.—Peering back through the vista of years—back through the inauguration of Grant, Lincoln, Monroe, Jackson, Madison, Jefferson, Washington and other of the notable Presidents of the United States—one finds much of romance and color. Indeed, a close study of the various ceremonies attending inductions into the presidential office is more or less a survey of the gradual development of the nation and its changing customs and sentiments.

Washington was inaugurated in New York in 1789 for his first term, and traveled from Mount Vernon by horseback and horse-drawn coaches. For his second term Washington was inaugurated in Philadelphia. In the meantime the District of Columbia was proposed, but the project had not become an accomplished fact at the beginning of the term of John Adams, so he also was inaugurated in Philadelphia. When Jefferson was elected the new Federal capital had been laid out and named Washington and the "sage of Monticello" was the first to be installed here. Jefferson rode to Washington on horseback from Monticello, and was escorted into the city by a troop of cavalry. Alone he rode in a carriage to the Capitol. About a thousand people viewed his inauguration. The next inauguration, that of Madison, is said to have been attended by ten thousand people. President Monroe was the first to take the oath of office out of doors.

John Quincy Adams was not inaugurated on March 4, because an election contest in the House postponed the ceremony until late that month. When finally held it was the most elaborate ceremony of its kind. The inauguration of Andrew Jackson in 1829 probably would have been more elaborate had not the incoming President been in mourning for his wife. He rode to the Capitol in a carriage constructed from the hull of the old frigate Constitution. President Van Buren's inauguration was attended by 20,000 persons.

Citizen soldiery participated in such ceremonies for the first time at the inauguration of William Henry Harrison. Tyler, who succeeded Harrison within a month, took the oath privately without ceremony in his own home. President Polk appears to have been the first to feel the discomfort of being inaugurated in the open air in a vigorous spring blizzard.

President Taylor's inauguration was the first to fall on March 5. Millard Fillmore, who became President through the death of Taylor, succeeded to the office without ceremony of any kind, although he took the oath before Congress. Pierce and Buchanan were inaugurated with the usual ceremonies. Lincoln's first inauguration was notable in many respects. The country on the verge of civil war, trembled with mixed emotions. Lincoln's friends were filled with apprehensions for his safety. For the first time in American inaugurations troops were ordered to the Capitol. Lincoln's second inauguration reflected the great war in which the country was locked. The induction of Andrew Johnson after Lincoln's assassination, was conducted in a room in a hotel without ostentation.

Grant came into office with the greatest spectacular display seen up to that time. President Hayes was surrounded with elaborate precautions for his personal safety, because of intense feeling engendered by the celebrated controversy with Tilden. Garfield's inauguration was without unusual incident. President Arthur, in succeeding the martyred Garfield, took the oath twice, first at home in New York and again at the Capitol. Ideal weather marked Cleveland's first inauguration, but Harrison was not so fortunate with the weather for his inauguration, nor was Cleveland's second time. McKinley had a beautiful day for his first inauguration but a rainy one for his second. Roosevelt's inauguration was the occasion for great demonstration. Taft came in with a howling blizzard. The inaugurations of Wilson and Harding were without unusual incident.

League of Nations Seeks Better Physical Training

Geneva, Feb. 12.—Coordinating the national battles against disease and debilitating sledge hammer blows against those maladies which still seem to defy medical skill, will constitute the essence of the future program of the League of Nations in its public health activities. The league's health section has just closed a successful year. It has extended its sphere of action, improved, completed and defined its technical equipment and has carried out with increasing success its special task, that of giving effective help to the various national administrations in their campaigns against epidemics and their attempts to improve public health.

In the coming year special attention will be given to instruction in health and social medicine in Europe, America and Japan, together with the development and extension of physical training, with the object of securing the general adoption of rational methods of physical education.

"The Man Life Passed By"

With a Nobel Cast—Eva Novak, Cullen Landis, Percy Marmont, Jane Novak, Hobart Bosworth, Don't Fail to See This One!

S. S. Institute Got Off To Fine Start Last Night

Despite the Rain First Session, Held in First Baptist Church Here, Was Attended by Many.

THREE ADDRESSES DURING EVENING

Dr. D. Burt Smith, D. W. Sims and Miss Daisy Magee Discussed Vital Sunday School Subjects.

Notwithstanding the rain the first session of the Concord Township Sunday School Institute, held in the First Baptist Church here, was well attended last evening. The first speaker of the evening was Dr. D. Burt Smith, Philadelphia, Pa., of the Department of Sunday Schools, United Evangelical Lutheran Church. His theme was "The Sunday School An Educational Complement." In speaking on the subject he said:

"The three underlying principles of Sunday School work dated back to Biblical times, that early in Biblical history was found graded groups, a Supreme Book, and methods of teaching.

There is an education outside the church but the Sunday School adds to that process in rounding out the fourfold life. The Sunday School, continued the speaker, should add intellectual content. In Sunday School the pupils should be taught to know the truth, to recall it, to understand the why of it, and to use it. The conception of Christ should be so definite that the truths for which He stood will be known, recalled, understood, and used.

The Bible is a vital message from God, and it should mean more than historical facts to the children. Its message should be to them a vital living truth which they can use. The curriculum of the Sunday School should be Bible centered.

In the second place the Sunday School should standard the emotions. The control of the emotions make life. This control determines one of two things: whether a person is for self or for others. The person who lives only for self is a dangerous person to the community, continued the speaker, but he who lives for others is a force for good to all.

Dr. Smith said there are three loves, a love of passion, which is given no place in the Bible, a love of affection such as exist between friends, and a selective love as was demonstrated by God when He selected to give His Son for a sinful world. All who give themselves for the good of others show such love.

In the third place the Sunday School must develop the social life. Social life never stands still. Its trend is either upward or downward. Purpose of every educational process is social. The Sunday School which is an educational force has the opportunity to grade the social level upward.

Everything that goes beyond self gratification is social, and all social acts influence others.

The Sunday School must also educate the will, causing the pupil to will to do the right thing.

In speaking on the "Key to a Greater Sunday School," D. W. Sims, of Raleigh, General Superintendent of the North Carolina Sunday School Association, said in part:

"All keys have three essentials—first the handle, second the barrel, or shaft, to conduct the power from the handle to the points in the lock to be turned, and third, the teeth, or that portion of the key which actually turns the lock." According to Mr. Sims, the same three vital points hold true of the Sunday School key. The handle, he stated, is prayer. In this connection he referred to several Sunday Schools that have a ten or fifteen minutes prayer service for the officers and teachers of the Sunday School immediately preceding the time for opening the regular session.

Effort, or work, was the next essential in the Sunday School which Mr. Sims stated corresponds with the barrel or shaft of the key. "A greater Sunday School," said the speaker, "means more work, more planning, and carefully considering weak points of the school by the leaders." Mr. Sims referred to the importance of special effort being made before Sundays to bring back absentees; effort in looking after new pupils; effort in planning a worth-while program; effort

NEW CONGRESSMEN ARE MEMBERS OF CHURCHES

More Than 90 Per Cent. of the New Members Are Adherents to Some Religious Denomination. (By the Associated Press) Washington, Feb. 12.—More than 90 per cent. of the members of the incoming Congress are adherents to some religious denomination, according to a statement from the Board of Temperance, Prohibition and Public Morals of the Methodist Episcopal Church, Washington, D. C., which announced it had completed an investigation.

"Methodists lead in both the House and Senate," says the statement, "with Presbyterians and Episcopalians following closely. In the House of Representatives there are 90 Methodists and 27 in the Senate. Presbyterians have 65 members in the House and there are 11 Presbyterian senators. The Episcopalians number 57 Representatives and 22 Senators. Thirty-two representatives are members of the Roman Catholic Church, with four Senators of that church. There are eight of the Jewish faith in the House and none in the Senate."

MINE EXPLOSION BRINGS DEATH OF 30 PERSONS

One Hundred Other Persons Still Missing But They May Be Still Alive. Dortmund, Germany, Feb. 12.—(By the Associated Press).—Thirty workmen were killed by a dynamite explosion of fire damp in the Steir Mines last night, and one hundred others are missing. Only eight men were rescued alive.

This morning there appeared to be little hope of saving the entombed miners. The explosion was very violent and caused entries to the underground galleries to collapse, blocking all exit. It is feared the trapped men died almost instantly from the effects of poisonous gas.

Reported 71 Bodies Are Recovered

London, Feb. 12.—An agency dispatch from Berlin this afternoon says 71 bodies have been recovered from the Steir Mine at Dortmund in which an explosion of fire damp occurred last night. It was officially stated, added the message, that the deaths totalled 136.

SAYS SAVANNAH MEN WERE GIVEN FAVORS

This Testimony of Capt. J. H. Madden at Trial of Sartain, Fletcher and Riehl. Atlanta, Ga., Feb. 12.—(By the Associated Press).—Capt. John H. Madden, acting deputy warden of the Atlanta Federal penitentiary, today testified in the trial of A. E. Sartain and J. J. Fletcher, deposed officials of the institution, and Lawrence Riehl of Columbus, Ohio, charged with conspiracy and bribery, that special privileges were given to members of the Savannah ring at the prison.

Among these prisoners, he said, were Willie Haar, C. C. Tuten, Graham Baughn and Fred Haar Sr. Madden said he had been an employee of the prison for 18 years.

Walter Brem Dies at Home in Charlotte

Charlotte, Feb. 11.—Walter Brem, Sr., son of the late Col. Thomas H. Brem, and for years one of the most prominent men and leading merchants of the city, died this morning at his home in Dilworth. His funeral will be held tomorrow conducted by Rev. Dr. Abernethy of Trinity Methodist church. Mr. Brem was born in this city July 31, 1849, and his life was spent here. He was for years in the hardware business, associated with William Martin, who married Miss Lavine Haywood, of Raleigh. His first wife was Miss Collier, of Augusta, Ga., his second wife Miss Annie Caldwell daughter of Governor Tod Caldwell of Burke county. Mrs. Brem and four children survive. Mr. Brem had been an invalid for ten years.

May Sell Virginia-Carolina Chemical Co. Stock

Newary, N. J., Feb. 11.—An order to show cause on February 24th why \$10,000,000 worth of stock of the Southern Cotton Oil Co., subsidiary of the Virginia-Carolina Chemical Company, should not be sold for \$8,875,000, has been issued to stockholders of the company by Federal Judge Runyon.

As a Result of the American woman's bobbed hair, in China the hair net industry in Chefoo, which less than three years ago provided employment for 18,000 women and girls, now employs about 2,000.

ROAD BOND MEASURE PASSES 2ND READING WITHOUT AMENDMENT

Bills Calls For Twenty Millions For Road and Amendment Increasing Gas Tax Was Not Presented Today.

STATEWIDE GAME LAW NOW READY

Will Not Ask For State Financial Aid So Measure Can Now Be Presented to the General Assembly.

(By the Associated Press) Raleigh, Feb. 12.—The Senate this morning passed on second reading the measure providing for a \$20,000,000 bond issue for road building. There was no discussion on the measure and action was taken unanimously. A companion bill or amendment to the bill providing for increase of the gasoline tax was not presented, although it had been announced that it would come up for action at the same time.

Senator Blue announced the proponents of the Wade-Blue statewide game bill had agreed to eliminate from the measure the provision calling for a \$10,000 appropriation, and asked consent to withdraw the measure from the appropriations committee and bring it up on the floor. Consent was granted.

The bill then entered into a discussion of a bill by Senator Burgess which would reduce the personal property tax exemption from \$300 to \$50 featured today's proceedings of the General Assembly.

Several Bills Got Attention

Raleigh, Feb. 12.—Passage by the House on final reading of a bill to redivide the state into 24 judicial districts, and passage by the Senate on second reading of a measure to lower the personal property tax exemption from \$300 to \$50 featured today's proceedings of the General Assembly.

The two road bills by Senator Sams to be known as "the Highway appropriation act of 1925," and "the Highway revenue act of 1925," also passed the Senate on second reading. Neither had debate and each received unanimous vote.

A statewide Australian ballot bill was introduced at the opening of the House by Representative Moss, Falls and Harrison. Representative Neal of Caswell, sent forward a measure designed to repeal all laws now in force authorizing boxing matches at various cities in the state.

A minority report on the Poole bill designed to bar the teaching of evolution in the state schools was presented, and it was indicated that it would come up on the calendar for consideration.

Want Eight Per Cent. on Money

Raleigh, N. C., Feb. 12.—The proposed measure to amend Section 2305 of the Consolidated Statutes to allow money-lenders to charge eight per cent. interest on special contracts will be heard by Judiciary Committee No. 1 of the House this afternoon at 3 o'clock. The bill was introduced by Representative Matthews of Mecklenburg, who has introduced to bar the teaching of evolution in the state schools was presented, and it was indicated that it would come up on the calendar for consideration.

Diphtheria Conditions Continue to Improve

Nome, Alaska, Feb. 12.—(By the Associated Press).—Diphtheria quarantine regulations here may be raised February 20th if conditions continue to improve, the Name board of health announced today.

Rattlesnake Hears With Tongue

Los Angeles, Feb. 12.—The original antenna for radio, according to Jack Allman, Los Angeles curator of reptiles, was the rattlesnake's tongue. "When a rattlesnake is dormant or sleeping," Mr. Allman said recently, "its tongue is idle. But when aroused it starts shooting that forked tongue from its mouth and seems to both feel and hear through it. I have seen rattlesnakes appear as though uninformed of my approach when their tongues were not moving back and forth from their mouths, but the moment they became conscious of it the tongues started. Rattlesnakes have no ears, but those little tentacles on the end of the tongue serve the purpose."

POSSIBLE PANACEA IN NEW GERMICIDE

Johns Hopkins Doctors Perfect Agent Harmless to Patient After Ten Years' Labor.

Baltimore, Feb. 12.—Fifty times as powerful as carbolic acid in its germicidal action yet perfectly harmless to human beings in hexyl-resorcinol, a new germicide, development and a State Library of medicine were announced at Johns Hopkins hospital today.

Ten years were devoted to perfecting the antiseptic, according to Dr. Yeader Leonard, chairman of the clinical committee on antiseptics of the national research council, who discovered the germicide and developed it with his associates in the Johns Hopkins school of hygiene and public health.

It was found that when certain chainlike groups of atoms known as fatty acids were linked up to a resorcinol molecule (resorcinol is very similar to carbolic acid), the germicidal power of the substance was increased, while its poisonous effect on animals was lessened. In this condition was found to increase steadily as longer chains of atoms were used.

Dr. Leonard said that in the face of many difficulties, a chain of six groups was successfully linked up, when the poisonous qualities reached a minimum, and the germicidal powers their maximum.

The antiseptic was applied for the first time by Dr. Leonard in actual treatment of disease among patients in the department of urology in the hospital.

Infections of the kidneys of long-standing were cleared up in forty-eight hours. The cures appeared to be permanent, and the patients showed no signs of having been harmed.

A committee of fifteen has been appointed by the national research council to work with Dr. Leonard in further researches to determine how broad may be the application of hexyl-resorcinol to disease in general.

The great importance of Dr. Leonard's discovery lies in the fact that an agent capable of destroying all germs without having any malignant effect on the human organism would be a virtual panacea for germ disease.

WOMEN AND CHILDREN KILLED IN BED BY GAS

Bodies Found by Husband This Morning When He Returned From Work.

(By the Associated Press) Pasaic, N. J., Feb. 12.—Mrs. Louis Sander and her three children were found dead of gas poisoning in a bed today by her husband when he returned from work.

The eldest child was 8 years old. Gas was flowing from jets in the kitchen and living room. The police express the opinion that the deaths were not accidental. Mrs. Sander worked in a worsted mill in the day time, and her husband worked at night. The police were informed Mrs. Sander had quarreled with a neighbor.

WOULD INVESTIGATE GASOLINE INDUSTRY

Resolution Calling for Inquiry Introduced in the Senate Today. (By the Associated Press) Washington, Feb. 12.—An investigation of the gasoline industry was proposed in the Senate today by Senator Trammell, Democrat, of Florida.

The resolution would have the federal trade commission examine into the recent arbitrary and unwarranted increases in the price of gasoline, with a view to prosecutions should a violation of the law be discovered.

The trade commission would be directed to prosecute the inquiry with "reasonable dispatch." It was recited that during the past two weeks in some localities increases had amounted to six cents a gallon.

Physicians and druggists in France cannot collect their bills if they allow them to stand over two years.

NINETEEN PRISONERS TUNNELED THEIR WAY FROM CAMP IN NIGHT

Prisoners Were at Halifax County Prison Farm Camp When They Made Escape During the Night.

FOUR PRISONERS ARE RECAPTURED

Hole Made in Floor of the Building and Another Tunneled in Ground by Men Who Made Getaway.

(By the Associated Press) Raleigh, February 12.—Nineteen state prisoners tunneled their way to freedom last night from the state prison farm camp in Halifax county, according to information received here today by Superintendent George Ross Pou, of the state prison.

Four of the prisoners were recaptured early today, stated Mr. Pou but the balance still are at large.

According to the information received by Mr. Pou, about 200 prisoners were confined to the camp because of rain, during most of yesterday. A hole was tunneled through the floor of the wooden structure which is built on a brick foundation. The mortar between the bricks was removed, and a means of egress made to the ground below. The men then burrowed through the ground under the foundation to the outside.

All of the prisoners were counted in the camp last night after supper, according to Mr. Pou and the break is believed to have been made a short while later. Mr. Pou expressed the belief that the enforced idleness of the prisoners yesterday gave them an opportunity to make the excavation through which they escaped.

Four convicted murderers are among the prisoners still at large, while the balance of the prisoners were confined for larceny and similar terms. The sentences of those who escaped ranged from two to thirty years. Following is a list of those who made their escape from the prison camp and have not been recaptured: Glenn Jarvis, of Yadkin, murder, second degree, 18 to 25 years; Carl Talley, of Guilford, second degree murder, 41 to 15 years; Tom Hayes, of Rutherford, store breaking and larceny, 4 to 8 years; Niles Church, of Avery, assault, 3 to 5 years.

Grover Cleveland Henderson, of Madison, car breaking and larceny, 8 to 10 years.

Joe Smith, of Forsyth, store breaking and larceny, 3 to 5 years.

John McNally, of Wake, murder, 5 to 8 years.

Keudall E. Johnson, of Wake, house-breaking and larceny, 3 to 5 years.

Willie Jones, of Orange, house breaking and larceny, intent to kill, 7 to 10 years, on first count, and three to five years on second count.

Baby Smith, of Iredell, store breaking and larceny, 2 to 3 years.

H. D. Taylor, of Rowan, breaking and entering, 3 years.

FLEISCHMANN GIVES FORTUNE TO CHILDREN

Some of Vast Fortune Will Go to Charity, Employees and Other Relatives. (By the Associated Press) Mineola, N. Y., Feb. 12.—Julius Fleischmann, Jr., and Henry C. Yeiser, Jr., children of the late Julius Fleischmann, yeast magnate, are the chief beneficiaries under his will filed yesterday.

Other bequest include a \$200,000 trust fund for educational or charitable purposes, most of it to be used preferably in Cincinnati. Mr. Fleischmann's former home; 2,000 shares of stock of the Fleischmann company to certain employees; and a \$100,000 trust fund for a cousin, Wm. N. Fleischmann, of New York City.
