TOTAL STORM DEATHS
NEAR FIRST ESTIMATE
Latest Tabulation Shows 827 Fatalities With 2,839 Injured.
Chicago, March 24.—Total deaths in the tornado of last Wednesday increased today in Illinois until they were within three of the 830 estimated slain in first reports of the Associated Press the night following the storm. There were 13 additional deaths reported from Murphysboro, the heaviest sufferer, and these with an additional death at McLeansboro, brought Illinois' loss of life to 650. Stable figures apparently have been reached for the other states affected by the tornado, making the obituary list 827, with 2,839 injured. Hundreds of others were hurt, but they did not report to the relief stations.
A dozen Illinois towns which were swept by the fatal wind settled down to organized care of the maimed and homeless today, while the able-bodied citizens renewed their efforts to build new homes. Subscriptions continued to pour into the coffers of relief organizations, and immediate wants have been taken care of liberally. Much more money will be needed later to complete the work, it was said.

Simple Way To End Night Coughing
No matter how long you have been troubled with expectorating coughing at night, robbing you of valuable sleep and thereby weakening your system and laying you open to dangerous infections, it can usually be stopped at once by a very simple treatment. Most people have found that they can sleep the whole night through undisturbed often the first time they try it.
The treatment is based on a remarkable prescription known as Dr. King's New Discovery for Coughs. You simply take a teaspoonful at night before retiring and hold it in your throat for 15 or 20 seconds before swallowing, without following with water. The prescription has a double action. It not only soothes soreness and irritation, but it quickly loosens and removes the phlegm and congestion which are the direct cause of the coughing. The result is you usually sleep soundly the very first night, and the entire cough condition goes in a very short time.
The prescription is for coughs, chest colds, hoarseness, bronchitis, spasmodic cough and almost every throat irritation. It contains no opiates or other harmful drugs. Economical, too, as the dose is only one teaspoonful. On sale at all good druggists. Ask for
