"Perhaps the most important feature of the present situation in its bearing. of the present situation in its bearing on the course of business for the remainder of the year is the exceptionally good condition of the crops. Despite the rospect for a greatly reduced yield of winter wheat, the agricultural outlook in general is distinctly favorable. The cotton acreage will apparently be larger than area before and weather conditions. than ever before, and weather conditions have been such as to make early planting possible over a large art of the belt. Oth er crops also are much more advanthan at this season a year ago."

WANT ALL AUTHORITY IN WASH-INGTON.

In his Twentieth of May address in Charlotte Senator Lee S. Overman issued another warning against the ambitions of those persons who want to centralize all power in Washington. The Charlott News interprets the address as a warn

power in Washington. The Charlotte News interprets the address as a warning against "the tendency on the part of the Federal government to monopolize the business of governing the country, to ignore the States almost entirely and to set up super-forms of authority in Washington to take precedence over the commonwealths in those common and ordinary functions committed to them under the constitution."

Senator Overman has been preaching a doctrine against federal control for several years and we believe he has been doing no more important work than this. He has been in Washington long enough to see how things are moving and he realizes full well the danger of centralizing power in the federal government.

Senator Borah is another mignier of Congress who has been devoting much of his time to a fight against efforts to give the Washington government control over State questions, and he and Senator Overman are well aware of the fact that if movements now on foot are successful it will not be long until the States will have no power. They will not be allow-

Life In German Army Not Altogethei Happy.
Berlin, May 23.—There were 100 sui

seriin. May 23.—There were 100 sulcides in the Germany army a year during 1923 and 1924, and the authorities, investigating causes, lay the blame largely to the long period of enlistment, 12 years prescribed by the Treaty of Verseilles.

years prescribed by the Treaty of Versailles.
Soldiers get lespondent at the end of four or five years, it is pointed out, when they are not made non-commissioned officers. Naturally the number of such commissions is limited. Those who are not selected see ahead of them only eight more gents of drugery.

On the other hand, men who serve out the full twelve years are given preference in the allotment of civil service jositions, which means that they are practically taken care of for life.

HOW TO RECEIVE:—Whatsoever we ask, we receive of Him, because we keep his commandments, and do those things that are pleasing in His sight—

THE TREND OF BUSINESS.

Recent developments in trade and industry have been highly irregular; but, taken together, they indicate the continguance of business as a whole at a fairly high levele of activity, reports the current issue of the "Guaranty Survey," published today by the Guaranty Trust Company, of New York.

"Large trade volumes are reflected especially by arch."

Amundsen Takes His Time, This Editor Says.

Os'o, Norway, May 24.—There is no word yet from the Amundsen-Ellsworth expedition to the north pole, but the intense interest in the fate of the men both here and throughout Norway is shown by the constant questioning of newspapers and those who might possibly receive information. Yet there is nothing but silence in the myterious normales disappeared several days ago. The Aftenposten urges patience. It remarks that Amundsen always takes his time and recalls that when he was at the south pole with little food, and even moments were precious, he remained on the tree days.

SYNOPSIS

Malone, a London newspaper reporter, rejected by the girl he loves because he has no great deeds to his credit, appeals to his editor for a dangerous assignment, and is sent to interview the trascible Professor Challenger, a scientist, who has recently returned from an expedition to South America with an amazing story, which no one believes, of the existence there on a great plateau of many forms of prehistoric life. By way of proof, he shows Malone two sketchesone, of the clifs beneath the plateau, the other of a monstrous animal resembling the stagosaurus-which had been among the possessions of an explorer, Maple White, whom he had found dead from starvation; some blurred photographs of what appeared to be the name clifs; and a piece of the wing of a huge flying serpent, or perodactyl, which he had shot down. Malone is convinced of Challenger's sincerity. He accepts the professor's invitation to attend a scientific lecture that evening by a Mr. Waldrom.

CHAPTER V (Continued)

My day was a busy one, and I

CHAPTER V (Continued)

My day was a busy one, and I had an early dinner at the Savage Club with Tarp Henry, to whom I gave some account of my adventures. He listened with a sceptical smile on his gaunt face, and roared with laughter on hearing that the Professor had convinced me.

welcome broke forth when his black beard first protruded round the corner that I began to suspect Tarp Henry was right in his surflinger was fitter not merely for the sake of the lecture, but because it had got rumored abroad that the forared with laughter on hearing that the Professor had convinced in the proceedings.

ontingent. The behavior of the

me.

"My dear chap, things don't happen like that in real life. People don't stumble upon enormous discoveries and then lose their evistation of the students in this indence. Leave that to the novelists, stanton of the students in the dence. Leave that to the novelists, stanton or unwelcome to the monkey-house at the Zoo. It's a frightful outburst of sound, the all bosh. "But the American poet?"

supercitious eyes at the crowded hall before him.

"He never existed."

mal?"
"Of course he did. Who else?"

"Of course he did. Who else?"
"Well, then, the photographs?"
"There was nothing in the
photographs. By your own admission you only saw a bird."
"A pterodactyl."
"That's what he says. He put
the pterodactyl into your head."
"Well, then, the bones?"
"First one out of an Irish stew.
Second one vansped up for the occasion. If you are clever and know
your business you can fake a bone
as easily as you can a photograph."

keeper is heard in the distance "I saw his sketch-book."

"Challenger's sketch-book."

"You think he drew that aniit struck me as mere riotous outcry, the noisy reception of one who amused and interested them, rather than of one they disliked or despised. Challenger smiled with weary and tolerant contempt. as a kindly man would meet the yapping of a litter of pupples. He sat slowly down, blew out his chest, passed his hand caressingly the pterodactyl into your head."

"Well, then, the bones?"

"First one out of an Irish stew.
Second one vansped up for the occasion. If you are clever and know your business you can fake a bone as easily as you can a photograph."

I began to feel uneasy. Perhaps, after all, I had been premature in my acquiescence. Then I had a sudden happy thought.

"Will you come to the meeting?" I asked.

Tarp Henry looked thoughtful.

"He is not a popular person, the

"Will you come to the meeting?" asked.

Tarp Henry looked thoughtful.

"He is not a popular person, the genial Challenger." said he. "A lot of people have accounts to settle with him. I should say he is the best-hated man in London. If the medical students turn out there will be no end of a rag. I don't want to get into a bear-garden."

"You might at least do him the justice to hear him state his own case."

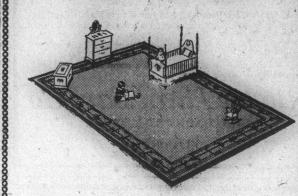

"Well, perhaps it's only fair. All right. I'm your man for the evening."

When we arrived at the hall we found a much greater concurse than I had expected. A line of electric broughams discharged their little cargoes of white-bearded professors, while the dark stream of humbler pedestrians, who crowded through the strohed doorway, show at that the audience would be poportic as well as scientific. Indeed, it became evident to us as soon as we had taken our seats that a youthful and even boylsh spirit was abroad in the gallery and the back portions of the hall. Looking behind me, I could see rows of faces of the familiar medical student type. Apparently the great hospitals had each sent down their (To be continued)
