INSURE
 When You Start To Build

The right time to take out insurance is when you start building. Then if through any cause your building should burn, even before completed, the insurance will cover your loss.

TRUCK AND AUTO IN MASH ON CORBIN STREET

Collision Resulted From Misunderstanding of Drivers—No One Injured.
 The truck belonging to the Cabarrus Cash Grocery and the Ford belonging to Will Allred were both damaged this morning when they met in a head-on collision on Corbin street directly across from the Lutheran Church Parsonage.

Neither of the drivers of the vehicles was injured but the radiators and front fenders of both the automobiles were badly smashed.

According to spectators, Will Allred had been in the filling station on the left of the street and was just coming out and was heading up the hill when the truck came down it. The driver of the truck declared that he thought Mr. Allred would stop since he was on the left of the street and so made no effort to slow up.

Mr. Allred, it was said, failed to find the brake in the excitement of the moment and the collision resulted. He however stated to the local police that he had given the truck plenty of room to pass and that instead of going by as he thought it would, it pulled over and the collision resulted from the misunderstanding.

A new illuminating gas, which is said to be non-asphyxiating and to have double the heat value and candle power of ordinary manufactured gas, is said to have been invented by Dr. O. U. Bean, the inventor of the Bunsen furnace.

The Tropics contain some 240 million cocconut trees, which bear an annual crop of seven or eight billion nuts.

Spellers

Margaret Moore of McCredie, Mo., above, and Mary Frances O'Bannon, are champion spellers of Missouri. Miss Moore won the honor for grade schools and Miss O'Bannon for high schools in a state wide contest. Miss O'Bannon missed only one word out of 400—"Caisson." Miss Moore did not miss a single word out of 400.

This is the time of the year college graduates worry about how much money bricklayers make.

A man who bought a car tells us he is driving a bargain.

GREAT FACTOR IN STATE'S GROWTH

Big State Company Has 14 Million Dollars Already Invested in N. Carolina.

By Julian Price.

Did you know that right here in North Carolina there has been built up a financial institution practically with over a quarter of a billion dollars of insurance in force?

This institution is the Jefferson Standard Life Insurance Company. The officers of this Company, who are striving continually to make of the Jefferson something bigger and finer, and through it advance the State of North Carolina, feel justified in referring to it as a North Carolina Institution; because it is adding materially to the growth and progress of the State and through its financial backing, schools, churches and business houses have been able to step forward with new stride, which has turned the business eyes of the United States towards North Carolina.

A firm based in North Carolina and her future greatness, is the foundation stone on which the Jefferson Standard Life Insurance Company rests. This expression of faith in the State is no idle boast, for it is backed up with millions of dollars. This Company now has over \$14,000,000 invested in North Carolina, in long time loans to churches, schools, home builders, farmers and business enterprises in practically every community in the State. These millions may be taken as an indication of the great faith that the Jefferson Standard Life Insurance Company has in North Carolina, and of the extent to which this Company is interested in the development of the State. If it did not have faith, it would not be willing to put up such large sums of money on loans in the State; if it did not have an absorbing interest in the continued welfare of the people of North Carolina, there would be no motive for making such loans.

Such an investment cannot but materially benefit North Carolina. It is helping to build more and better churches, where people may look to their spiritual development; it is helping to build more and better schools, where the children of the people may be educated; it is helping the farmers out of their difficulties, and making it possible for the agriculturists of the State not to be neglected; it is helping in the establishment of more and better business, which will add to the prosperity of all the people of the State.

More insurance on this Company is in force on the lives of North Carolinians than any other Company of any size. Functioning this way alone, in the capacity which many people consider the only service rendered by a life insurance Company, the Jefferson Standard Life Insurance Company is giving to the people of North Carolina a genuine service, the worth of which cannot be overestimated. Over 40,000 North Carolinians are insured with this Company for \$80,000,000. Each year it pays out to North Carolina widows and orphans several hundred thousand dollars, giving to them the money that their husbands and fathers wisely invested for them against the time when they would no longer be there to provide a living.

Annually, the income of this big State Institution is over \$9,000,000, the greater part of which is cleared through North Carolina Banks, and a large portion of which is invested in North Carolina churches, schools, business houses, homes, and farms, helping to keep prosperity booming in the old North State. The taxes on the big premium income are paid into the Treasury of the State of North Carolina, and through these taxes this Company is helping in the progress which North Carolina is making as a State.

Aside from the material gain which the location of this Company in North Carolina, and the business which it is doing, mean to the prosperity of the State, and the people in the State, the Jefferson Standard Life Insurance Company is constantly advertising the State of North Carolina in the 25 other States in which it has Branch Offices. The big seventeen story Home Office Building of the Company, which is located in Greensboro, is a symbol to the people in these other states of the success with which this Company, a North Carolina product, has met, and of the progressiveness of the State of North Carolina as a whole.

Who's Right About This? Goodyear Heavy-Duty Cord

Had an argument with the publisher of this paper yesterday. "You ought to tell folks about that new Goodyear Heavy-Duty Cord," he says. "No, no," we protest, "not very many people want a tire this good. Not enough drive hard, on any old kind of road, to get out of it all the mileage built into it. "You know, this is a he-man tire. The Goodyear Company put everything into it that the rough riders want. More plies of Goodyear SUPERTWIST—tough, sinewy cord fabric that'll bend but not break. Thick, circumferential ribs to buttress its sidewalls against the ruts. And the good old All-Weather Tread for grip and power and non-skid going. "Well, says he, "that's a tire. Guess it costs a lot more, eh?" NOW, THERE'S SOMETHING INTERESTING. THIS TIRE COSTS SO LITTLE MORE THAN THE ORDINARY SHOE, YOU'D BE SURPRISED. Call up and be tickled!

When Better Automobiles Are Built, Buick Will Build Them

No. 19

Question: Why is a used Buick the next best buy to a new Buick?

Answer: Because the correctness of Buick design and the quality of Buick manufacture are not altered by use. A used Buick is a better investment than many new cars of other makes.

STANDARD BUICK COMPANY

When better automobiles are built, Buick will build them
