CROSSWORD PUZZLE

Begin the week easily, with this simple crossword puzzle. There's hardly a word in it you don't know, especially if you're a regular crossword puzzle fan.

HORIZONTAL

- 1 Small memorial.
5 Weight of container (pl.)
10 Child's sickness.
11 Domesticates.
13 Bone.
14 The head.
15 Cooking vessel.
16 Jumbled type.
17 Blackbird.
20 Metal disc used to commemorate bravery.
22 Dry.
23 Cry of a crow.
25 To vend.
26 An alkali.
27 Unit of weight for precious stones.
29 Half a donkey.
30 Consumption.
31 To become diminished.
32 Beer.
34 Principle.
36 Organ of sight.
39 Nothing more than.
41 Drone bee.
42 Silk worms.
48 To sew temporarily.
45 Establishes.
46 Half an em.
47 Thigh of a hog.
48 Combustible fluid.

VERTICAL

- 1 Strings of beads used in counting prayers.
2 Hebrew name for God.
3 Faced (on inside of coat).
4 Image.
6 Particle.
7 Values.
8 Standard type measure.
9 Divisions of the calyx.
10 Skeleton of an animal of the sea used for beads.
12 Ledges.
13 Spectators.
19 Distant.
21 Merchants.
23 Liked.
24 Thin biscuit.
27 House pet.
28 To make lace.
32 Resin used for pipe stems.
33 Inclined against.
35 At the present time.
37 Submits.
38 Theme.
40 The clear sky.
42 Artist's frame.
44 Devours.
45 Nude.
51 Therefor.
53 Preposition of place.

CROP OBSERVATIONS BY AIRPLANE ROUTE

Mr. Parker Declares the Photographs Make a Most Interesting Study. Raleigh, N. C., June 23.—A total of 102 pictures, 7 by 9 inches, were made during the first airplane trip for official crop observation in North Carolina, reported Frank Parker, agricultural statistician, today.

"As was natural," continued Mr. Parker, in his official announcement today, "most every one was skeptical of this method of crop observation, especially when informed that the first flight was made at an elevation of 4,000 feet. As Lieutenant Lynch, photographic staff officer at the Pope Field, stated, 'these pictures show everything on the ground.'"

"Cotton plants with only two to four leaves can be seen. The cultivated land, although dry conditions existed, can be readily distinguished following each plow in the field. The cleanness of cultivation can be followed to the exact row. The degree of grassiness in crops is clearly evident. The number of missing hills or the percentage of stands can be gained at a glance for the entire field. Pasture land, whether clear or with more or less stubble and grass, is clearly evident. Terraces and direction of rows are dead give-aways of land contour. Soil colors tell immediately whether the soil is loose sandy loamy or red clay. Fields with dewberries, peaches and such crops can be observed at high elevations."

Mr. Parker declared that the photographs offered made a very interesting study as to the type of cultivation given orchards in Moore county.

Mr. Parker was the official observer. He is agricultural statistician for the United States Bureau of Agricultural Economics, with offices in Raleigh. He said he was surprised to find so much cultivated land through Chatham, Lee and Moore counties, where it was generally thought that only a small part of the land was cultivated. "Crops wheat found to be unusually clean, due to the dry, hot weather," he said. "The series of photographs," said Mr. Parker, "included groups north of Dunn, from Holt's Lake at Smithfield; east and west of Clayton; from the Southern Railway south of Raleigh to Method, Apex, Sanford, Lakewood towards Southern Pines and East of Aberdeen into Hoke county. The group of pictures west of Raeford showed the best details of any, for the reason that the growth was more advanced there than elsewhere."

"Pictures showing the same area, near Manchester, Cumberland county at 1,000, 2,000, 3,000 and 5,000 feet elevation offered interesting and valuable studies and comparison looking to the best elevation advisable for photographic and detailed crop growth observation studies."

Mr. Parker is preparing a mosaic fashioned group of pictures which he proposes to hand to responsible and interested persons near any of the points mentioned. "I am sure their seeing the picture will impress them with this type of agricultural research," he said.

Negotiations are under way for further airplane trips and it is planned to make a second set of pictures over the same territory in July and a third in September, Mr. Parker announced today. "These," he said, "will offer valuable records for detailed study in comparing the three stages of field crop growth and farm management."

Co-operative Buying by Dairymen. Gastonia, June 23.—Gaston county dairymen are ordering their dairy feed for thirty-day periods, said County Agent L. B. Altman. "They have just placed their fifth order," he said today. "Mr. Altman is advising them as to the kind and quality of feeds to be used. He stated that the farmers were well satisfied with the results."

"Anticipating their demand for feed and knowing the kind of feed they will need, our dairymen are planning and arranging their farm plans so as to take care of as much of their next year's feed bills as possible," said Mr. Altman. "This to my mind," he concluded, "is the greatest argument in favor of co-operative buying."

Optimists and Pessimists. Optimists are buyers. Pessimists are not buyers. Optimists are the spenders. Pessimists are the misers. An optimistic advertisement draws customers. A pessimist advertisement repels customers. Don't write an advertisement when you are in a grouchy mood.

BIBLE CONFERENCES

The Junaluska Conference Will Be Held This Year July 12-18

Nashville, Tenn., June 23.—Dr. Stonewall Anderson, of Nashville, through the Board of Education of the Methodist Episcopal Church, South, is sponsoring two church-wide Bible conferences. Dr. Anderson declared today that "scarcely in the history of the Christian church have Christians been so sharply divided in regard to the proper understanding and the right of interpretation of the Bible."

A conference at Lake Junaluska, N. C., will serve the eastern and one at Mount Sequoyah, Ark., the western area of the territory of the Southern Methodist Church. Pastors and other Christian leaders are invited to attend," said Dr. Anderson.

The Junaluska conference will be held July 12 to 18 and the Arkansas conference July 19 to 24. "These conferences," said Dr. Anderson, "will undertake to show the historical conditions out of which the Bible has come and that a liberal attitude toward the research of the present day is in harmony with the spirit of the Bible because the Bible is essentially a progressive unfolding of the truth."

Dr. Anderson announced that at the approaching conferences two parallel series of lectures, one based on Old Testament teachings and one based on the teachings of the New Testament. Dr. Ivan Holt, pastor of St. John's Methodist Church, St. Louis, will deliver the Old Testament lectures, and Dr. Thomas Carter, of Vanderbilt University, Nashville, will deliver the New Testament lectures. Both courses will be given at Lake Junaluska and the Old Testament course at Mount Sequoyah.

Discussing the conferences further, Dr. Anderson said:

"Within the Church itself the controversy between the modernists and the fundamentalists has rent asunder the household of faith. Those who contend for the acceptance of the Bible as the literal and infallible revelation of the exact mind of God on all problems of life have engaged diligently in the spread of their ideas through Bible conferences held at different places throughout the country."

"In the larger realm of the State," Dr. Anderson continued, "persistent agitations have been conducted to secure legislation against teaching modern science in the public schools. The colossal fallacy has been urged that only about 11,000 acknowledged scientists are responsible for the widespread interest in modern explanations of the universe and man. It may be true that only that limited number of individuals can lay claim to the technical scientific knowledge. But it is just as true, on the other hand, that uncounted thousands of persons through the study of literature, history, philosophy and sociology have been swept away from the ancient traditions of their fathers. In this realm, the situation is so serious as not only to menace the intellectual honesty of teachers and professors but to threaten the very foundation upon which progress rests. In the face of such conditions," concluded Dr. Anderson, "it is imperative that a clearer and more spiritual understanding of the Bible shall be given to as many people as can be reached."

How Does a Farmer Act?

Among its 5,000 employees—the word of the Associated Press for this—the Department of Agriculture failed to find a man who knows how to act the part of a farmer in educational films. Several candidates were tried out, but their antics ruined the picture. Then officials went back to the farm and hired a regular farmer. But when he got before the camera he was over-come by stage fright. Finally the director engaged a professional actor, who has never worked a day on the farm and he played the part perfectly.

When this picture is finished it should be entitled, "Smiling Through Adversity."

Skeletons Afford Clue to Old Race of Giants

Mexico City, June 23.—The Mexican Government is planning to send a commission to the Chobutlan Mountains to investigate the reported discovery of a number of perfectly preserved giant human skeletons measuring 12 feet. They are said to have been found in a newly discovered cave, apparently once used as the burying ground of a race now extinct. The skeletons were found in a sitting position on what once had been a wooden floor, the heads resting on bent knees. The feet are said to be 20 inches long. Mining men who reported the discovery here state the entire district where the cave is located probably once was a city inhabited by a race of giants, as pottery and other signs of human occupancy were found near the cave.

GIRL DIPHTHERIA CARRIER WEDDING IS POSTPONED

Invitations Canceled After Doctors Examine Prospective Bride

Goshen, N. Y., June 22.—A wedding was postponed and 200 wedding guests were hurriedly notified that all invitations had been cancelled when it was discovered today that the prospective bride was a "diphtheria carrier."

Only a few hours before the ceremony was to have taken place a physician who examined Miss Rose DeNarde to see if she had entirely recovered from a recent case of diphtheria, discovered that germs were still lodged in her throat, although she herself was in perfect health. Her marriage to Daniel Leon will take place as soon as the condition is corrected.

Big Increase in Price of Florida Realty

In 1919 a citizen of Greensboro named Umberger bought a lot in a small town in Broward county, Florida, 25 miles from Miami, 50x100 feet for which he paid \$250. The owner died and in Guilford Superior Court, the past week, Judge McStroy signed an order for the sale of the lot to L. T. Hatfield, of Florida, for \$25,000. The lot is unimproved but it is included in a real estate development near Miami. The proceeds of the sale of the lot will go to a minor child.

According to the writings of Tshu-King, the ancient Chinese historian, the very first pair of silk stockings was made some 5,000 years ago, and presented to the Empress Kwang Tsi.

Extra Large Reduction

On the No. 873 Oriole Cabinet

While Our Stock Lasts

Come in and see this beautiful, modern gas range—see how perfectly it answers all requirements of the average home—see what an amazingly big value it is even at the regular price—then you'll recognize an extraordinary opportunity in the EXTRA LARGE REDUCTION on this range during this sale.

All Styles and Sizes Reduced

—during this sale—

Many styles and sizes—to meet every requirement of price, cooking capacity and kitchen space. ALL ORIOLES AT REDUCED PRICES for this month only. Surprisingly low monthly terms—5c can be as bold as a dollar during this sale.

You'll Be Proud of Your Cooking on This Range

Work without pride in the results is sheer drudgery. You'll take great pride in your cooking on this or on any ORIOLE you select. Come in and see them. See all the latest conveniences—the Oriole Raising and Lowering Broiler that does perfect broiling without ever touching the hot broiler. See the Oriole CLEANTOP—keeps the range free of grease and wipes clean and easily as a china dish. Now's the time to get that new gas range!

SUNSHINE TUBERCULOSIS FOE

Infection Combated and Body Condition Improved by Generous Treatment in Sun.

New York, June 23.—New hope for victims of tuberculosis was held out today by scientists attending the 81st annual convention of the American Institute of Homeopathy.

Sunlight, properly applied, can be made the most efficient foe of the disease, Dr. William F. Baker, of the Hahn-Emms Medical college, of Philadelphia, told the National Society of Physical Therapeutics, which is meeting with the institute.

"Nearly 1,000,000 American school children under 10 years were found to have some form of tuberculosis. In a survey two years ago," he said, "one million had spinal curvatures and 6,000,000 had glandular diseases."

"Only recently have clinicians begun to realize the importance of application of the sun, long used in constructive

service, to all animal and vegetable life," he said. "In the treatment of tuberculosis not only is the infection combated but the body condition which made infection possible is strengthened so that it becomes easier to throw off the disease."

The sun light invigorates the skin and causes a marked increase in flow of the general blood circulation, he said.

"However, I do not advance heliotherapy as a cure-all, for without remedial measures a full advantage can not be expected."

A reward of \$100 to any color-blind woman who will submit to clinical observation to determine the cause of the condition, was offered today by Dr. C. A. Harkness, of Chicago, a delegate to the convention.

"A color-blind woman is one of the rarest creatures," Dr. Harkness said.
