Be Well As well as this help can make you

All medical science has lately had to confess a very grave mistake. For generations it has been supposed that cathartics stimulated torpid livers. Now all physicians know that they don't.

But a new science has developed. It relates to gland secretions. That research has revealed the fact that ox-gall—a gland secretion—does make the liver active.

There is no doubt. Ox-gall has stood all the clinical tests. Physicians the world over prescribe it. And countless people everywhere rejoice at its effects.

Torpid liver causes millions of ill conditions. Among them are these: Indigestion, Constipation, Impure Blood, High Blood Pressure, Lack of Youth, Kidney and Heart Troubles, Bad Complexions.

Torpid liver means scanty bile. And that lets poisons form in the intestines. Those poisons affect the health and vitality of perhaps half the people you meet.

Now ox-gall comes in tablet form, called Dioxol. Each tablet contains 10 drops of purified ox-gall. All druggists supply them.

Learn what Dioxol does. Find out what it means to really stimulate your liver. It may change your whole life and career. You are welcome to do this at our expense. Mail us the coupon now.

Anti-Knock Gasoline Adds to Joy of Gypsying Over Summer Trails.

CHICAGO — Announcement by the Sinclair Refining Company that it has developed an anti-knock gasoline containing no ingredient that does not come out of an oil well, is pleasant news for car owners in this summer season when thousands of motor gypsies are crowding the nation's trails. This development, it is said, is the result of more than a year of experimentation in the research laboratories of the company's East Chicago refinery. Many automobile motors knock, especially after carbon has accumulated, and even new motors that developed high compression are subject to this trouble with ordinary commercial gasoline. The average automobile motor now in use develops a compression of about 55 to 60 pounds. The new Sinclair product, it is said, has been tested under a compression as high as 90 or 95 pounds without developing a knock. Several large institutions have conducted these tests, including the Armour Institute of Technology at Chicago. The product is the result of a modification of the company's cracking process and involves only a slight change in equipment. Marketing, it is announced, will be started in the company's service stations in Ohio, and it is understood will be extended rapidly as volume of output increases.

POPLAR TRAFFIC PATROLMAN REGAINS HIS HEALTH

Intense Indigestion Pains Immediately Checked by HERB JUICE—Recommends It to Others

V. T. McGINNIS

"There is nothing in the world as nice as to be able to sit down to the table and know that you can eat anything placed before you and yet suffer no ill effects immediately afterwards. Were it not for your great medicine, HERB JUICE, I could not possibly make such a statement at the present time as I was a sufferer from indigestion for years." The above statement was received by the HERB JUICE representative a few days ago from Mr. V. T. McGinnis, who is one of Charlotte's best known and most popular traffic policemen, residing at 411 East Twenty-second Street, Charlotte, N. C. He added: "Anyone who has known the discomfort of gas pains, heartburn, constant nausea, constipation, difficult breathing and sleeping nights can appreciate my condition. Lack of proper rest and sleep made me extremely nervous and I felt at times I would be compelled to give up my job on account of my weakened condition. I would take two or three doses of soda each day to stop the gas pains. A friend had urged me for some time to try HERB JUICE, said it had helped him so much he believed it would help me, so acting on advice I bought a bottle,

started taking it immediately. As my condition improved I continued taking it until I had used the second bottle and then felt like an entirely different person. I was completely relieved of the gas pains, heartburn and bloating after eating, now I can eat anything I want and digest it, and the best part of it is I do not suffer afterwards with indigestion. Another thing I can say for HERB JUICE is, that it is the greatest system regulator I have ever used; through its effective action on the liver and bowels I have been relieved of constipation and my whole system is in excellent working order. I am most pleased to recommend HERB JUICE as the greatest medicine I have ever used, and feel sure it will help all who use it, even as it has helped me." Hundreds are now calling daily to see the HERB JUICE man at his headquarters at the Glenn Drug Co., giving statements for publication and praising HERB JUICE that their friends may be induced to try this great remedy which is relieving so many sufferers in Concord. HERB JUICE is also sold by F. L. Smith Drug Co., in Kennesawville and leading druggists everywhere.

Body Blows For Community Agitators. The Pathfinder. A solar plexus wallop has been dealt the reds in America by the supreme court in denying that "free speech" gives radicals the right to preach revolution and anarchy. Decision was made in the case of Benjamin Gitlow, socialist agitator, who claimed that the New York law under which he was convicted violated the federal constitution guarantees. By a vote of seven to two the court upheld the right of states to protect themselves and the public from firebrand orators. It is not essential, the court ruled, that acts of violence be advocated in definite terms, or that their immediate execution be urged, or that the advocacy be addressed to specific persons. "A single revolutionary spark," it warned, "may kindle a fire that, smoldering for a time, may burst into a sweeping and destructive conflagration." In dissenting, Justices Holmes and Brandeis claimed their associates took a narrow view of constitutional rights. They think the law should be invoked only in cases where radical talks "create a clear and present danger." Gitlow, who was convicted for writing inflammatory articles in the Revolutionary Age in 1920, served 30 months of a 5 to 10 year sentence. He is now out on bail and will apply for a pardon. His defense was taken up by the Civil Liberties Union on the ground that New York's "anarchy law" makes expression of political views a criminal offense. About the same time the supreme court made its decision, Secretary of State Kellogg at the Norse-American centennial celebration sounded warning of peril from foreign propagandists. "I doubt if you are aware," he commented, "of the amount of destructive, revolutionary propaganda which is being secretly distributed in this country by foreign influence." He asserted that "a considerable body of our citizens, who in the name of liberty and reforms are impatient of the constitutional restrictions, by insidious approaches and attacks would destroy our guarantees of personal liberty." "We are blessed with what I believe to be the best form of government that the wit of man has devised," he continued. "If people are not satisfied with our government and our institutions, let them go where they can find a government which does satisfy them. This is no place for them." That Cured Her. This story is told of a young lady named Jessie, living near Correctionville, Kansas, who went away to a boarding school. About the third letter home she signed her name Jessica, and her brother Tom answered it thus: "Dear Jessica, Dadica and Monica have gone to visit Aunt Lillian. Uncle Samica is talking of buying a new machine, but doesn't know whether to get a Fordies or Buicka. Old Brindlica has a new callica, and I was going to call it Nellica, but had to change it to Jimica. Your loving brother, Tomica." The cornerstone of the present State Capitol at Raleigh was laid on July 4, 1833. Blessed are the peacemakers, but cursed are the pacemakers.
