

Why We Say "Buy Goodyears Now"

Goodyear quality is at the peak—never so high as it is today! Goodyear prices are low—in many cases, way down below the prices asked for ordinary tires.

"RAMSHACKLE HOUSE" ENTERTAINING FILM

Betty Compton as the Best in Hubert Footner's Mystery Story.

By the Press Agent: "Ramshackle House," which opened last night at the Concord Theatre is one of those pictures that fits every one's penchant whether it be for romance, mystery or adventure in strange settings.

Betty Compton was never more appealing. She can wear an old pair of overalls and a rickety hat and look positively ravishing.

Some good characterizations were given by William Black as Kessing, the detective; Henry James as Pendleton Broome, the heroine's father, an amiable incompetent; Duke Pelzer as Spike Talley, a professional killer, and Josephine Norman as Blanche Paglar, Spike's sweetheart.

Mother of Jacob Stirewalt Buried Yesterday

Funeral services for Mrs. Ella Stirewalt, who died Tuesday at her home in Mooresville, were held yesterday afternoon and interment was made in the cemetery at Poplar Tent.

Mrs. Stirewalt was the mother of Jacob Stirewalt, superintendent of the Brown Mill, of this city, and Dr. Neal Stirewalt, of Kannapolis. She was widely and prominently known throughout this county, where she formerly lived.

Does Your Face Reveal Your Character?

That the intelligence of a person can be judged by his appearance, the shape of his head or the features of his face has been disproved by experiments conducted by Professors Donald A. Laird and Herman Remmers, of Colgate University, Glen U. Cleaton, of the Carnegie Institute of Technology, and F. B. Knight of the University of Iowa.

In one test, pictures were submitted to 576 persons and their estimates of the intelligence and abilities of the ten subjects were compiled. The results showed that in attempting to arrange the pictures according to relative intelligence they could have done as well with their eyes closed.

In another experiment, two groups of sorority girls, ten in each group, and one group of ten fraternity boys were selected as subjects. Friends of the thirty then gave their opinions

their appearance were given a look at the thirty, one at a time, and their impressions compared. Their opinions agreed very well with each other, but did not agree with the estimates of the friends who really knew the subjects.

The only possible conclusion is that a peculiarly shaped head, an odd ear, close-set eyes, a hooked nose, wide mouth, receding chin, or any other unusual feature about your head has nothing to do with whether you are intelligent or dumb, honest or criminal, or whether you would be a success in one line of work but not in another.

Windshield Map Holder

The popularity of the strip map for auto tourists makes the holder shown in the illustration a great help. Take a piece of composition wallboard or heavy cardboard a little larger than one strip of your map. Near each corner, at one end, punch a small hole and push a short length of stiff wire through it, bending each end to form a hook. Now get two rubber bands for the ends of the board to hold the map in place.

Planes Gather Mail in Flight from Rope between Poles

Mail bags are pulled aboard with a

as to intelligence, frankness, will power, ability to make friends, leadership, originality and impulsiveness of the subjects under observation. These opinions were found to agree very closely except in the cases of frankness and ability to make friends.

Next a large number of business men, school teachers, employment managers and others used to meeting strangers and judging them from

grapple without halting the planes at nonstop points on a German airline. The pouch is attached to a rope suspended between two poles in an open field. The pilot flies between the uprights and as the plane roars past, the anchor, which already has been dropped, catches the cross rope and the pouch, jerked from the ground, is pulled up to the cockpit as the plane soars to higher levels.

Kill Disease by Disease

That paralysis may be cured by infecting the sufferer with malaria fever was the belief expressed at a recent medical convention. The treatment, in which one disease is made to cure another, is said to have been tried with success. Blood taken from a malarial patient is injected into the veins of the paralytic who then has attacks of high fever. After eight or ten of these attacks, the patient is given quinine to kill the malarial germs which killed the paralytic bacilli.

More than 119,000,000 animals were slaughtered for food in this country last year, according to government figures.
