Hobby-Horse Chair on Springs Kept Cromwell in Training

One of the reasons for Oliver Cromwell's fame is the fact that he successfully developed the cavalry unit of his army to a high degree of efficiency.

...demonstrating the value of horses in many battles. An interesting sidelight on this phase of his career has attracted attention recently in a curious armchair with a seat spring on high springs extending over the bottom frame. When home campaigns and too busy to take regular exercise on his mount, Cromwell is said to have exercised in this chair, bouncing up and down for a short period each day to keep himself accustomed to the motions of horseback riding. The relic is now in the possession of Premier Baldwin of England and was demonstrated by him when friends visited him at his residence.

Radio Control on Railways to Start and Run Trains

A radio system capable of operating railway trains, throwing switches, and providing means of communication with passengers, all from a central point, has been described by G. Allen, of the Westinghouse Electric and Manufacturing Company. It is entirely possible, he said, through a combination of electric and radio supervisory control, to start a train without a crew from a station, operate it at full speed, or to slow or stop it, automatically in compliance with automatic block signals, permitting a central dispatcher to control and supervise completely all movement of trains on a system. The carrier-current of signaling and communication, as the process is called, is based on the principle that wireless waves will practically follow along the course of wires without leaving them, if propelled in a certain way.

ORNADOES MEET HEAD-ON AND SMASH UP A VILLAGE

Rockwood, Calif., Whipped Off Its Foundations by Collision of Twisters.

Rockwood, Calif., Aug. 10.—Damage estimated at from \$125,000 to \$75,000, resulted from the tornado which late yesterday whipped this little Imperial valley town off its foundations.

A check of property losses and casualties revealed tonight that only two of the town's approximately twenty buildings were resting upon their original sites and that five of the 500 residents were nursing minor injuries.

Streets are still under water as a result of the cloudburst which accompanied the twisters and the sky is black at sunset as a howling gale beset most trouble tonight and not most residents within easy jumping distance of irrigation ditches.

...was the ditches, eye witnesses of yesterday's disaster relate, that saved hundreds from serious injury and permanent death. "By taking to the treacherous...

Making Crystals at Home

Good crystals can be made at home. Crystal set users are always anxious to try new crystals, and many of these now on the market are not as good as they should be. The ingredients used are powdered lead and sulphur, and when properly made will equal in clearness and volume, many of the best commercial types.

Lead shavings can be melted on an iron plate over a gas stove, but if the crystal maker is equipped with a porcelain crucible and Bunsen burner the lead can be handled more easily.

Making Giants Out of Mice and Men

Rats as large as raccoons and guinea pigs as big as badgers are possibilities as a result of a discovery by a scientist of the University of California, while its application to cattle, sheep and hogs, as well as to geese, ducks and chickens, would result in such an increase in size and rapidity of growth that one-half the live stock now produced would furnish the same quantities of foodstuffs as those raised today.

The discovery was made, after nine years' work, by Dr. Herbert M. Evans, who also announced that he had found that barren animals may be made capable of producing young by feeding them with a certain food. The first of these findings is that the extract of the pituitary gland, a tiny organ hidden in the base of the brain, when injected into the tissues of living creatures, no matter what their age, starts a period of growth limited in time, amount and rapidity only by the quantity administered and the duration of administration.

Rats born in the same litter and treated daily with "pituitrin" extract outgrew by fifty per cent other rats of the same litter reared under the same conditions but without pituitrin.

Dr. Evans says he does not know when it will be possible to apply this...

Methods of Melting Lead and Sulphur on Iron Plate and in Crucible for Making Synthetic Crystals

When the lead is molten, sprinkle powdered sulphur over it and stir with an iron wire. The lead, if hot enough, will then burn with a blue flame, and the result is a synthetic form of lead sulphide, which, when cool, will act as a good detector.

per cent, are brought for that alone. Imitation plays an important part in the formation of habit and character.

If one baby hears another crying, or making odd sounds, he will do likewise. We had recently in the nursery training school an Indian baby who had so closely imitated the fog horn, which he had heard on shipboard coming to England, that the hotel proprietors here refused to keep him in their rooms. Another baby was brought to us because he made a noise like the whistle of a locomotive, a habit he had picked up because his parents lived near a railway station.

Two colored men were standing on the corner discussing family trees.

"Yes, sah, man," said Ambrose, "I can trace my relations back to a family tree?"

"Chase 'em back to a family tree?" said Mose.

"Naw, man—trace 'em—trace 'em—get get?"

"Well, they ain't but two kinds of things dat live in trees—birds and monkeys—and you sho' ain't got no feathers on you."

CRYING UNNATURAL IN BABY, SAYS AUTHORITY ON INFANTS

Bellowing Habit Due to Imitation of Other Little Fellows, He Claims.

London, Aug. 10.—There is no need for a healthy, well-managed baby to contract the habit of crying, in the opinion of Dr. Eric Pritchard, medical director of the Infants' Hospital, who is an authority on infants.

"It always strikes me as strange," said Dr. Pritchard, "that while nearly everybody is able to tell why a lamb bleats, very few persons seem to have any idea why a baby cries."

"More than 60 per cent of the babies brought to my clinic," he added, "have this complication, while 20

High Blood Pressure Often Brought On by an Unhealthy Liver

Diseases of heart, kidneys, blood vessels due to body poisons.

Medical science knows that poisonous waste in our bodies would actually cause death in a few days if not eliminated by Nature's processes. Because it destroys these deadly poisons, the liver is our most important organ—the body's wonderful purifier.

The liver prevents the formation of body poisons that cause diseases of the heart, kidneys, blood vessels and are chiefly responsible for premature old age.

When the liver becomes weak, the poisons are sucked up by the blood and health is broken down. Physicians know that the liver cannot be regulated by drugs, but a safe Nature substance has been discovered which will at once increase the vital bile supply. The discovery is purified ox gall.

Get from your druggist a package of Dioxol. Each tablet contains ten drops of purified ox gall. In 24 hours the poison toxins will be removed. Your liver will be regulated. Blood purification will begin. Sal-low skin will clear. You will feel so much better you will know you have found the cause of your ill health. Dioxol tablets are harmless, tasteless and cost less than two cents each.

These genuine ox gall tablets are prepared only under the name "Dioxol." If any tablet is offered you under another name, refuse it. Accept only Dioxol in the original, genuine package. Test Dioxol free. Mail this coupon now.

Without Payment Ca. 98 Madison Ave. New York, N. Y. I want to try Dioxol.

COUNTRY CORRESPONDENCE

GEORGETOWN. The Community Club held its regular meeting on last Saturday night. A feature of the program was a debate by the men. The question being, "Resolved, That the Motor Vehicle Has Been a Greater Blessing Rather Than a Curse to the World."

The affirmative was upheld by W. M. Teeter, Robert Mabrey and A. I. Shinn. The negative was upheld by Harry Barrier, A. J. Little and A. M. Krimminger. The debate was very interesting. After a decision of the judges the question was given to the negative.

T. E. Shinn gave a very interesting outline on the "Manice Peach Orchard." Another number on the program was a trio by the Misses Shinn. The club adjourned to meet again on Saturday night, September 5th.

The No. 9 Township Convention met with St. Martins E. L. Church on last Thursday. Reports of the Sunday schools were heard. Rev. Mr. Counts, pastor of St. Martins, made a fine and inspiring address. Rev. Mr. Lingley, of the Methodist Protestant Church, Concord, made a splendid talk in the afternoon. Rev. Mr. Tibbs, of the Baptist Church, at Concord, also made a talk. The next convention will meet with St. Paul's.

Numbers of our people attended the camp meeting at Bethel on last Sunday.

Mr. and Mrs. Floyd Eudy and little daughter, of Denton, were the guests of relatives for several days last week.

Misses Inez and Laura Mae Shinn spent last Wednesday night in Concord.

Mr. and Mrs. John Eudy and children spent last Wednesday night and Thursday with Mrs. Eudy's parents, Mr. and Mrs. Dry, near Norfolk.

They were accompanied home by Fleet Dry, who spent until Sunday with them.

Curtis Black and Miss Todd, of Kannapolis, were guests of Mrs. M. F. Barrier on last Thursday afternoon.

Mrs. D. W. Turner and Mr. and Mrs. Glenn Turner, of Locust, spent a while last Thursday with Mr. and Mrs. A. I. Shinn.

M. F. Teeter, who holds a position in Charlotte since the post office, is spending a few days at the home of his parents, J. H. Teeter.

Mr. and Mrs. A. Eudy and Miss Elma Eudy spent last Friday in Concord.

Mr. and Mrs. Lee Shinn and children, of Kannapolis, spent the weekend with relatives here.

Mr. and Mrs. L. O. Barrier spent Sunday afternoon with relatives in Stanfield.

Mr. and Mrs. Adolphus Thies, of Charlotte, and Mrs. M. A. Beger, of Albemarle, spent last Sunday afternoon with T. J. Shinn.

FAITH.

Venus attended the Lutheran picnic at the fair grounds at Concord on August 5th, which was a great success. Those going from Faith were: R. A. Roney, Venus, J. C. Lingle, Miss Pearl Bowers, and a lady visiting Miss Bowers. The table at the picnic was one hundred and sixty-seven steps long. If we step three feet at a step, how many feet long would that table be? What little girl or boy can figure it out? Eighty-one steps of this table was filled full of good things to eat. Next year they expect to have the biggest turnout ever known in this country. This was the first annual picnic of this kind and they expect to have it every year from now on. That's the way to do, consolidate and let everybody come from all the different counties. We heard Mr. Fisher, the cashier of the Wachovia Bank in Salisbury, make a fine address. We never knew before that he was such a good preacher or speaker. We thought he was just a banker and nothing else. He is a fine speaker. Here are the names of some of the people we met at the Concord Lutheran picnic: Rev. J. H. C. Fisher, of Mt. Pleasant; Miles Wolff, Tribune Reporter; Mr. and Mrs. D. L. Ridenhour, of Charlotte; Rev. C. L. Fisher, Mt. Pleasant; V. L. Norman, Mr. and Mrs. McAllister, of Mt. Pleasant, and their pretty little daughter, Virginia, who says she reads the items by Venus regularly and likes them fine; Prof. S. A. Wolff, and wife, of Concord; J. B. Moose, Mr. and Mrs. W. V. Ritchie, of China Grove, Mr. F. C. Ritchie, of Concord; Mrs. P. J. Cress, of China Grove; M. E. Brown, of Concord; Mrs. J. W. Roberts, Mrs. L. B. Cress, Mrs. C. D. Watkins, Mrs. B. L. Roberts, of Concord, who says they read the items by Venus in the Concord Tribune and Times and like them fine; Maybelle Upright, China Grove and many others too numerous to mention.

The Roberta correspondent who who signs "Sweet Dreams," must be a pretty girl by the way she writes. She says Clifford Yates found an old piece of money which is two hundred and one years old and says can you beat it? We give it up.

The correspondent at Locust has found a curiosity for Venus. They had a fine lot of items in last issue of The Concord Times. VENUS.

BUS LINE CONTROVERSY TENTATIVELY SETTLED

Charlotte-Concord Line Gets Two, Dixie Four and Kirk Line Seven Trips.

Raleigh Aug. 8.—The corporation commission today tentatively settled the Charlotte and Greensboro bus line controversy by awarding to Kirk's Auto and Bus Service six of the 13 daily through trips, four to the Dixie Motor Coach lines, two to the Charlotte and Concord Bus line and one to the Blue Star Bus line. An extra trip, which must be broken at Salisbury, is given the Kirk line.

"On June 30, 1925," the commission's order said, "a tentative order was issued requiring the Dixie Motor Coach lines, incorporated, to show cause on August 1, 1925, why its temporary permit should not be withdrawn. This tentative order was made because the Dixie was the evenest operator of the line and with the view that if the number of operators were to be reduced that line should, for this reason, be eliminated."

"On the date assigned, the Dixie Motor Coach lines, incorporated, appeared and presented reasons which have been convincing to the commission that it should not be required to retire from this service. While it is the oldest operator in the line in giving through service between Greensboro and Charlotte. It has equipment that is new and of high standard quality. It operates buses of 24 seating capacity. From the testimony at the hearing, the commission is convinced it would not serve convenience to eliminate Dixie Motor Coach lines, incorporated, from this service."

New Schedules. The local service is divided, according to petition, between the Royal Blue Transportation company, incorporated between Greensboro and High Point; the Blue Star Bus line, which also gets one of the 13 through trips, between High Point and Lexington; the White Bus line, between Concord and Kannapolis, and the Charlotte, Concord Bus line between Charlotte and Concord.

The through schedules fixed by the commission are:

The Charlotte-Concord Bus line leaves Charlotte at nine and 12 o'clock and Greensboro at three and six o'clock.

The Blue Star line leaves Greensboro only at three in the morning and Charlotte only at three in the afternoon.

The Dixie Motor Coach lines, Inc., leaves Greensboro at 8, 11, 2 and 5 o'clock and leaves Charlotte for Greensboro at 8, 11, 2 and 5 o'clock.

The Kirk line leaves Greensboro at 7, 10, 12, 1, 4, 7, and 8 and leaves Charlotte for Greensboro at 7, 10, 1, 4, 6, 7, and 8 o'clock. It also gets an extra trip from Greensboro to Salisbury at eight in the morning and the same hour from Salisbury to Charlotte. An eight o'clock schedule from Charlotte to Greensboro and Salisbury to Greensboro is allocated this company.

DR. LONG'S GRANDSON REGISTERS FOR 1940

Charles D. Benbow III All Fixed to Enter Duke University.—Now 10 Years of Age.

Durham, Aug. 10.—A short time ago the two-year-old nephew of former Secretary of State Robert

Lansing was registered at Duke university, to enter in 1940. The registrar at Duke received a letter from Dr. John Wesley Long, of the Wesley Long hospital at Greensboro, requesting that Dr. Long's grandson be admitted to the class of 1934. The letter follows:

"In view of the fact that it is sometimes difficult to enter a boy in the college or university of one's choice at the first one wishes to, I desire to ask whether or not we may register our grandson, Charles D. Benbow, III, to enter Duke university in the year 1934? Being a loyal Methodist I want him to receive his college training at your university.

"The boy is 10 years old now and will have finished high school in eight years more, but to be sure we will make it nine years, at which time he will be ready to enter the university.

"Thanking you in advance for your consideration and advice touching this matter, I beg to remain, Sincerely yours, JOHN WESLEY LONG."

Young Benbow's application has been filed by the Duke registrar.
