O. Max Gardner Speaks in Greensboro

Greensboro, Nov. 11.—(AP)—"We must all move, but we must move together, as no progress which does not lift all ever permanently lifts any," declared O. Max Gardner, of Shelby, former Lieutenant Governor of North Carolina, in addressing a large audience at Armistice Day exercises, concluded in the National Theatre under the auspices of Henry K. Burton Post No. 53, American Legion. Mr. Gardner was introduced by John Hall Manning of Raleigh.

Mr. Gardner declared that "the boasted scepter and crown of a free people is the untrammelled ballot, and I am convinced that the time has come in our state when we should stand abreast of our sister commonwealths and offer to the electorate of North Carolina a secret ballot in conformity with the Australian law."

Continuing Mr. Gardner said "My feeling is that we should maintain an election law so fair and free and just that it will secure beyond the shadow of a doubt, unchallenged expression of popular will. I will therefore urge the American Legion to throw its weight of its powerful influence to the support of our General Assembly of the Australian ballot."

"If it were right to enter a world war for the safety of America and the preservation of civilization, I ask in good faith, why it is not now right for us to enter into some contract of world covenant in order to garner the fruits of our victory and forever outlast national and international murder," Mr. Gardner asserted, adding "I was for Wilson with the league of nations; I am likewise with Coolidge for the world court."

THE COTTON MARKET

Renewed Buying Featured Opening Trading, Active Months Being 22 to 29 Points Higher.

New York, Nov. 11.—Renewed buying featured the opening trading in the cotton market today, unchanged by relatively steady Liverpool cables and unfavorable features in the weekly report of the weather bureau. After opening firm at an advance of 5 to 24 points, active months sold 22 to 29 points net higher. The bulk of the demand was attributed to covering, but some trade or speculative and investment buying also was reported. January sold up to 19.51 or 114 points above the low level of bureau day.

Cotton futures opened firm, Dec 20.00; Jan, 19.60; March 19.75; May 19.60; July 19.00.

OVERMAN ASKS JARDINE TO DELAY ROAD DECISION

N. C. Senators Take Interest in Proposed Federal Road to Salisbury.

Salisbury Post, 10th. Senator Lee S. Overman has sent the following telegram to Senator F. M. Simmons at Washington: "Delegations from Mount Airy, Winston-Salem, Lexington, Salisbury and Concord do beg you to wire Jardine, secretary of agriculture, to withhold his signature to highway map until hearing can be had before the state highway commission, which will be as soon as Page returns, in about two weeks. Will be glad if you can do so. They are not fighting the routes already approved, but want this as an additional route." (Signed) "LEE S. OVERMAN."

At a meeting held at the Robert E. Lee Hotel in Winston-Salem last Friday night in the interest of having the federal government designate the route from Wytheville, Va., to Hillsville in the same state and on the Mt. Airy, Winston-Salem, Lexington, Salisbury and Concord on to Charlotte, as a federal road and so mark it on government maps, and which meeting was attended by a delegation from this city, a resolution was adopted to the effect that Senator Overman be asked to request Secretary Jardine of the agricultural department, and who is also at the head of the federal roads bureau, to withhold final action on the federal road across North Carolina until the citizens along the proposed route could present their case to the North Carolina highway commission, which would be asked to endorse this route and request the federal government to designate it on maps along with the route already tentatively agreed on, that being the one by way of Independence, Va., Sparta, Elkin, Statesville and Mooresville on to Charlotte.

In reply to Senator Overman's resignation Senator Simmons was wired the latter that he would of course resign if the message to Secretary Jardine and made an appointment for a conference with the secretary for today. A Washington special stated that Senator Simmons had understood that it was not necessary to hold up the approval of the inter-state routes already tentatively adopted, but that consideration could be given to applications for new routes without interference with prompt action in the approval of route 51, which is the Sparta, Statesville to Charlotte route.

Sees No Advantage in 40-Play System in Football Games

Philadelphia, Nov. 10.—Head Coach Lou Young, of the University of Pennsylvania football team, as opposed to the 40 plays per period for gridiron contests as tried out last Saturday by Brown and Boston universities. "I think that instead of speeding up the game," said Young, "it will lose much time. I grant you it puts a halt to stalling which a team is apt to do when there is a few minutes remaining to play but that does not help any. To complete the 40 plays would bring the game into darkness long before it is over. It is bad enough now. A team can take as much time as it wants to complete a play. I cannot see any advantage in the plan."

SEVERE WINTER IS PREDICTED FOR U. S. BY METEOROLOGIST

Abnormal Condition Pointed to by Many Factors Including Record Breaking Colds.

NEXT SPRING WILL BE LATE

Predictions Are Based on Study of Ocean Surface Temperatures Indicated by the Sun's Heat.

Washington, Nov. 11.—(AP)—A severe winter for the United States with heavy snowfall and long continuing cold waves broken by warm periods of brief duration is predicted by Herbert J. Browne, widely known ocean meteorologist. An abnormal condition, he holds, is pointed to by many factors, including the record breaking cold in many sections of the country this fall, beginning with the first snows in the northwest on September 18th, four days before the official close of summer. The winter, he believes, will be followed by a late spring. Primarily the predictions are based upon a study of ocean surface temperatures, as determined by the amount of the sun's heat reaching the earth. This solar radiation for more than three years has been below normal. The present winter situation, he says, indicates that the world is facing a condition which will interfere seriously with crops, the cold fall and winter in prospect being but forerunners of the next two years. A serious situation developing in the southern hemisphere in the crop year of 1926 to 1927, and the northern hemisphere in 1927 is predicted.

Then new subpoenas were issued for 36 persons residing outside of Washington, all summoned by Colonel Mitchell in an effort to prove the accusations against Colonel Mitchell.
