Norfolk Southern Plans Mammoth Development in Piedmont and the East

Brook Barkley in Charlotte Observer. Raleigh, Nov. 20.—(AP)—The Norfolk Southern railroad, under new management and adequately financed, has plans in the making for a mammoth program of development and expansion, looking to the extension of its lines into industrial areas of both Carolinas and the eventual electrification of the entire system.

It was learned today upon dependable authority that the road, which changed hands recently, is now under the control of the Duke interests, and that they plan the expenditure of a vast sum, the amount not disclosed, on the present system and the acquisition of new lines.

The road serves a great area of eastern North Carolina and has its main line running from Norfolk through Raleigh to Charlotte. Development plans are understood to contemplate physical connection the Piedmont and Northern electric line, controlled by the Duke interests, which runs from Charlotte to Gastonia and into the textile region of South Carolina, and involve the movement for the construction of an electric railroad from Charlotte to Winston-Salem.

The Norfolk Southern may become a bidder for the Atlantic and Yadkin running from Sanford through Greensboro to Mt. Airy, if that road is sold under receivership, as is now expected. It was indicated that a decision as to bidding on this road is not yet definite, but is being seriously considered.

Its acquisition would enable the Norfolk Southern to reach Greensboro and the territory beyond by connecting with the Atlantic and Yadkin at Sanford.

BLAMES CREW MEMBERS FOR WRECK ON A. C. L. Conductor and Engineer Blamed in Reports Submitted to Interstate Commerce Commission.

Washington, Nov. 20.—(AP)—Responsibility for the head-on collision of two Atlantic Coast Line passenger trains near Mango, Fla., on October 10th has been placed on Conductor Monger and Engineer Sasses of the Southbound train No. 89, in the report of the director of the Bureau of safety, as made to the Interstate Commerce Commission. One person was killed and 31 injured in the wreck.

The misreading of a "smet" order by the engineer was considered the direct cause of the wreck. NO INTERFERENCE IN BUSINESS, SAYS COOLIDGE

President Promises Business No Interference if Activities Be Confined to the Legitimate.

New York, Nov. 19.—President Coolidge tonight held out a promise to business that it need fear no interference from his administration, so long as it confines itself to legitimate activities.

Addressing one thousand New York business executives at the 15th annual banquet of the state chamber of commerce, he emphasized the desirability of the "largest possible independence between government and business"; declared that business should be "unhindered and free"; admitted that "proper regulation and control" of business are "disagreeable and expensive"; and expressed belief that, judged by its conduct during the last few years, business can be trusted to keep its own house in order.

Carrying out his thought that government and business "each ought to be to sovereign in its own sphere," the President said:

"When government comes unduly under the influence of business, the tendency is to develop an administration which closes the door of opportunity, becomes narrow and selfish in its outlook, and results in oligarchy.

"When government enters the field of business with its great resources, it has a tendency to extravagance and inefficiency, both having the power to crush all competitors, likewise closes the door of opportunity and results in monopoly."

Repeatedly during his address the President was applauded his audience giving approval to his expressed attitude toward business; to his appeal for continued government economy and efficiency; to his appeal for American adherence to the world court.

"I can think of no more assuring action," said Mr. Coolidge, "than the declaration of America that it will wholeheartedly join with others in the support of the tribunal for the administration of international justice which they have created."

Citing George Washington as a leader who did not hesitate to meet peril, encounter danger or make sacrifices, the President, appealing for support for world court adherence, declared that "we must meet our perils; we must encounter our dangers; we must make our sacrifices; or history will recount that the works of Washington have failed."
