

CARROLL IS FOUND GUILTY OF HAVING BATH TUB AT PARTY

Tried on Four Counts He Was Found Guilty of the Two Referring to the Bath Tub Incident.

SENTENCE NOT BEEN PASSED

Will Be Sentenced Next Week and Was Freed on Bond of \$5,000 Demanded by the Court.

New York, May 27.—(AP)—Earl Carroll was found guilty today of perjury in connection with the grand jury investigation of the bath tub party in his theatre in which Joyce Hawley, a nude show girl, served drinks from a bath tub.

Carroll was on trial on four counts: two referring to the bath tub incident and two to his testimony that no liquor was served at the party. The jury found him guilty on the first two, and not guilty of the second two.

The jury returned its verdict at 12:20 o'clock, just an hour and five minutes after Judge Goddard had given it the case.

Judge Goddard field Carroll in \$5,000 bail, twice the amount he had been held in previously, and deferred sentence for one week.

Case Went to Jury at 11:15.

New York, May 27.—(AP)—The case of Earl Carroll, Broadway theatrical producer charged with perjury growing out of a grand jury investigation of his "bath tub party" in which Joyce Hawley, a chorus girl, bathed nude in alleged liquor, was given to the jury at 11:15 today.

TWINS ARE FASTENED TOGETHER AT BIRTH

Two Babies Linked Together Facing Each Other Appear to Be Normal in Other Respects.

South Bend, Ind., May 26.—Two girl babies, perfect in every respect, were born here Saturday, one being sustained by bottle feeding and gave every indication that they were growing like normal babies.

"The babies are here; a doctor's duty is to do what he can for them," was the comment of Dr. Thomas A. Strantz, attending physician for the twins, Lucy and Bessie Medich. He said an operation to separate them would prove fatal.

Mr. and Mrs. Nichols Medich are deeply shaken by the strange birth. The mother, torn between motherly love and the anguish of the handicap of her daughters, has expressed the hope that the babies will pass from the mortal scene to which they are so ill adapted.

Unlike the famous Siamese twins who were joined in such a way as to permit locomotion, these twins are joined at the pelvic girdle, and never would be able to walk or move in anything like a normal manner.

The babies seem to live separate lives. Sometimes one sleeps, while the other is feeding. Physicians say that should illness come to one it would affect the other. Similar twins, however, have been known to survive for years.

X-ray studies show that each child is complete as to heart, lung, stomach, and other internal organs, except that they share one colon.

Ross Wants to Die As Soon as Possible. (By International News Service) Warren, N. C., May 27.—Torn between mingling emotions of dread and remorse, W. L. Ross, convicted slayer of Mr. and Mrs. Sydney Odum, wants to die in the electric chair as early as possible.

After maintaining a stoical silence throughout his long trial here Ross "broke down" after the jury found him guilty and Judge E. H. Cramer sentenced him to die in the electric chair.

When Miss Sallie Ross, the defendant's daughter-in-law and only eye-witness to the slaying, was called to the prisoner's dock after his conviction, the doomed man fell to his knees and said, "I'm sorry for what I have done."

Flood of Old Bonds Being Dug Up. Tribune Bureau Sir Walter Hotel Raleigh, May 27.—A flood of old bonds are being dug up out of old boxes, trunks and musty books and being brought or sent in to Ben R. Lacy, state treasurer, as the result of the payment of more than \$12,000 by the State last week on some old State bonds issued before and immediately after the Civil War.

All of the bonds submitted so far have been those of private corporations, and not of the State, Mr. Lacy says, and hence valueless.

Two Killed by Bomb. Muskegon, May 27.—(AP)—William Frank, 22, of Chicago, was killed instantly, and August Krumbach, 48, was so severely injured that he died two hours later, when a bomb received by mail exploded in the lobby of the Three Lakes Tavern, operated by Krumbach. Jeannette Krumbach, 19 year-old daughter of Krumbach, and fiance of Frank, is not expected to live.

New Hampshire Boy Holds Record For Being Saved; Nearly Dead 8 Times

Clarendon, N. H., May 27.—Eight years old and he has been saved from death eight times, once for every year of his life.

This is the record of Harry Carey. His last escape took place a few days ago when Harry fell into Sugar River, was carried by the swift current 1,000 feet, and pitched, in full view of a score of horror-stricken people, over a dam twenty feet high to the erags below.

A group of men pulled young Carey from the water and he was found to be not seriously hurt. "Well, I thought that was the last of me," Harry gasped, when revived after being over the dam. A year ago Harry was struck by an automobile, but soon recovered.

Two years ago he was rescued from a swampy hole into which he had fallen. Neighbors recall how he broke his collar bone, sliding down the veranda steps to the street. And others remember when he was almost scalded to death and doctors and nurses only gave him a few hours to live.

Rosy-cheeked and sturdy, it is difficult to believe that Harry has had every contagious disease that came to town. But he has, and he always recovers.

His mother says she thinks the boy was born under an unlucky star, but the Lord has been good to him, because he has given him as many lives as a cat.

CHAUTAQUA OPENS NEXT MONDAY NIGHT Much Interest Being Taken in the Excellent Program For Five Days.

The Chautauqua will open in the big ten on the primary school grounds next Monday night with a concert by the Greenfield Orchestra Quartet, to be followed by a lecture "The Science Story" by R. B. Ambrose, the electrical wizard.

The quartet has made a big hit everywhere it has appeared, and Mr. Ambrose is the talk of the town everywhere he goes.

Each member of the Greenfield Orchestra Quartet, notable Chautauqua feature, is an artist of outstanding individual attainments, while ten years of playing together have produced a perfection of ensemble playing rarely attained.

Max Greenfield, violinist, saxophonist and manager, has been associated with the orchestra of the Chicago Civic Opera Company, and with the St. Paul Symphony Orchestra.

Edith Greenfield, violinist, has appeared extensively in recital and concert, notably in New York and Chicago, and has scored distinctive successes always.

Mollie Greenfield, pianist has also a goodly number of New York and Chicago appearances to her credit in the course of many recitals and concert engagements the country over. She has been soloist with the Chicago Philharmonic Orchestra.

1. Greenfield, clarinetist, saxophonist and bass viol artist, has, like the other members of the quartet, an exceptionally successful record of appearances.

With first-rank artistry the quartet presents classical and semi-classical ensemble selections, varying with popular numbers.

"The Science Story," as thrilling as an evening of magic, Electricity is Mr. Ambrose's subject, and he holds his audience spellbound with his astounding demonstrations.

Mr. Ambrose carries with him a remarkable collection of electrical instruments and devices. With these instruments he produces many of the most magical effects. He does not rely on trickery, but makes application of little known physical and electrical laws that lend themselves well to interesting demonstrations.

Among the feats he performs is the welding of nails by electricity, passing the current to pass through his body.

He holds two carbons in his hands to form an arch light. A cannon is fired and a flag sent up the flag pole by use of rays from an ordinary flashlight.

Yet, during all his elusive and puzzling exhibitions, Mr. Ambrose explains each step clearly and concisely, and shows how each is based in scientific facts and reasons.

CHILD WAGE EARNERS BECOMING PROBLEM William Green Says Wages of Children Greater Than of Adults.

Atlantic City, N. J., May 27.—(AP)—The competing products of 2,000,000 child wage earners form a much greater menace to adult workers than to those of 20,000 convicts, Wm. Green, president of the American Federation of Labor, today told the general Federation of Women's Clubs.

States which voted for the prohibition, income tax and woman suffrage amendments, he remarked, have voted against the Federal child labor proposals. He held it was ridiculous to contend that the proposed child labor amendment would prohibit a girl from helping her mother to do house work, or a boy from assisting his father in farm work.

"While employer's associations and chambers of commerce strangle to say, are fighting the Federal legislation which will take children out of the workshops and factories, they are at the same time fighting against the sale of prison-made goods on the open market," he said.

Boston-New York Flier Wrecked, 25 Hurt

This picture shows the wreckage resulting when the "Owl" New York to Boston flier, ran into a freight train at Mansfield, Mass. One trainman was killed and twenty-five persons were injured.

NEW NORTH CAROLINA MARCH SONG BEING HEARD Composed by Paul M. Hendricks, of Asheville.—Adoption Is Strongly Urged.

Raleigh, May 27.—An audition is being held here today of the new North Carolina March Song, composed by Paul M. Hendricks, of Asheville, with a view to its adoption as the official song of the state, particularly to be used in connection with North Carolina's part in the July fourth celebration at the Sesqui-centennial in Philadelphia.

Charles Picquet, of Pinehurst, who has been asked by Governor McLean to take charge of organizing musical talent over the state for participation in July fourth festival at the exposition, was present for the audition. All those who were interested were invited. No announcement as to the ultimate decision has yet been made.

Adoption of the song was strongly urged upon Governor McLean by the Federated Women's Clubs of Asheville, who sent a telegram warmly commending Mr. Hendricks' song.

"The state needs a song of this nature and we recommend it be endorsed and adopted by the state," the wire read which was signed by Mrs. C. C. Lentz, chairman State Federation of Women's Clubs, and a long list of Asheville club women prominent in musical circles.

PASSENGER PLANE IS FORCED TO HALT TRIP Broken Water Connection Forced Capt. Roscoe Turner to Seek Landing at Abbeville, S. C.

Atlanta, May 27.—(AP)—A broken water connection in one of the motors forced Captain Roscoe Turner to make an emergency landing near Abbeville, S. C., today an hour and half after he had taken off from Atlanta in his big Sikorski plane on a proposed one-day flight to New York City.

The plane came down at a farm house just outside Abbeville. The skip jumped several ditches and came to a stop with one wing resting in an apple tree.

Repairs to the motor will be necessary before the flight is resumed, and just when it will hop off is not determined. The plane carried representatives of the Atlanta, Jr., Chamber of Commerce and the municipal government.

Vote of Confidence. Paris, May 27.—(AP)—The Briand government today was given a vote of confidence by the Chamber of Deputies, 320 to 209.

The Briand cabinet thus survived the first onslaught of the socialists, communists and part of the radicals who had determined to provoke immediate debates on France's finances and foreign debts.

The government put the question of confidence squarely on the demand that these matters be postponed until after the discussion of the electoral reform law bills.

The Briand cabinet was saved by the nationalists opposition which after some hesitation finally decided not to vote against the ministry.

A Novel Liquor Container. (By International News Service) Asheville, May 27.—"The last word" in a rum runner's armament, which was confiscated by police here together with fifty gallons of bottled in bond liquor, was even the admiration of officers for cleverness.

Beneath the floor of the sedan was a small sheet metal trough with approximate dimensions of four feet by two feet and a half by six inches, while the rear seat covered a similar trough nearly ten inches deep. The box-like arrangement ran even behind the rear seat.

Filled to capacity the automobile probably would hold between two and three hundred quarts of liquor, it was said.

Briand Government Wins. Paris, May 27.—The Briand government today was victorious in the chamber of deputies in its demand that debate on financial matters and foreign debt settlements, including the Washington agreement, be postponed.

Unofficial figures give the government a majority of 100.

OIL CONSERVATION DISCUSSED BEFORE WASHINGTON GROUP

Charles E. Hughes Says Science and Not Politics Must Be Used to Save Oil Supplies.

POLITICAL ACTION IS NOT ENOUGH

Too Often It Proves Difficult and Unsuccessful, the Former Secretary of State Says.

Washington, May 27.—(AP)—Encouragement of scientific effort rather than political regulation of production was suggested as the best oil conservation policy for the government by Charles Evans Hughes in an address today before the Federal Oil Conservation Board.

The former Secretary of State represented the American Petroleum Institute.

"Political action" he asserted, "is superficially attractive but difficult and unlikely to succeed. Something might be accomplished by removing legal obstacles to intelligent operation."

Scientific effort holds the promise of the future.

The cracking process has done more for conservation than any legislative schedule could do under our constitution.

He cited figures to show that the cracking process by which crude oil is made into gasoline has doubled the nation's potential gasoline resources.

ALL OF SOUTH IS NOT IN NEED OF RAIN NOW North and South Carolina and Georgia Suffering Worst From Lack of Rain.

Southeastern Florida was the wet spot on the Southern weather map today.

With North Carolina, South Carolina and Georgia generally suffering from lack of rain, and high temperatures, Miami and Southern Florida were being drenched with cool showers every few hours.

North Carolina and Georgia felt a serious need of rain, and South Carolina have been conducting special prayer services for a heavy rain to break the drought.

Central Tennessee and Southern Alabama also reported dry weather, and showers are needed in western Tennessee, but the backwardness of crops there and in northern Alabama are attributed largely to the untoward Spring weather.

Eastern Tennessee, Louisiana and western Florida farmers were not troubled with the dry weather, although there, as well as in Mississippi and Kentucky more rain might be beneficial. Virginia with general rains yesterday was content.

Temperatures ranged from 76 at Tampa to 86 at Atlanta and upward to 93 at Nashville. South Carolina and southern Georgia temperatures hovered slightly above 95.

Money Washed and Returned. (By International News Service) Miami, Fla., May 27.—Police Inspector Gibson today had "sworn off" stuffing his bank roll in his pillow before retiring.

He stuffed \$107 in currency in his pillow and went to sleep. The next morning he was aroused to answer an emergency call and forgot the roll.

A maid sent the pillow-slip to the laundry. The laundry washed and returned it. The money was there. "All I had to do was iron it out," he said.

Makes Example of This State. Atlantic City, May 27.—(AP)—William Green, president of the American Federation of Labor, in a plea to the eighteenth biennial convention of the General Federation of Women's Clubs for increased activity for the adoption of the federal child labor amendment, singled out North Carolina as typical of objectionable conditions of child labor.

Earthquake Causes Dam to Break. London, May 27.—(AP)—The Tokio correspondent of the Evening News says a sharp earthquake today at Hakoda, northern Japan, burst the dam near the town, washing away fifty houses and drowning eighteen persons.

Mount Iwo, which erupted Monday, has resumed its rumblings and minor earthquakes are terrifying the survivors of the eruption disaster.

TODAY and TOMORROW "Three Paces East" With Jetta Coudal And Many Others One of the Best Dramas Inspired by the Greatest of All Dramas

JARGES TIGHTENING OF VOLSTEAD ACT AT PRESENT TIME

In Talk Before the House Committee Sec. Andrews Urges Material Tightening of the Law.

STALKER BILL IS FINDING FAVOR

Mrs. Mabel Walker Wilberbrand, Assistant Attorney General, Favors Enactment of the Bill.

Washington, May 27.—(AP)—Material tightening of the Volstead act so that the country "may know what national prohibition means" was urged today by Assistant Secretary Andrews, of the treasury, national dry chief, before the House judiciary committee.

He spoke in favor of a bill drafted by the treasury to give the prohibition unit power to inspect at any time a factory, manufacturing cereal beverages.

"It is common knowledge," he said, "that in wet areas beer is being sold. It can be stopped, and should be stopped, if for no other reason than that the people throughout the country may know what the national prohibition law may mean."

Mr. Andrews testified after Mrs. Mabel Walker Wilberbrand, assistant attorney general, had endorsed the Stalker bill to make prison sentences mandatory for first conviction for sale, manufacture and transportation of intoxicating liquor.

PISGAH FOREST AGAIN IS MENACED BY FIRE Reported to Be Sweeping Along North Frong of Big Ivey Creek—Another Blaze Under Control.

Asheville, May 26.—Fire was sweeping through the holdings of the United States government along the north fork of the Big Ivey creek in Pisgah national forest late today, according to reports received at the forestry offices in Asheville. No definite information could be obtained by the foresters here as to the extent of the blaze. Another fire that broke out two days ago near Pisgah was placed under control this morning after fire wardens had fought and guarded it for two days.

M. A. Mattson, supervisor of Pisgah national forest, today issued an appeal for care on the part of those living in forested areas or passing through them. The dry weather that has held sway in western North Carolina has again caused the menace of fire to loom in the section, he said.

Lumber companies have placed their trains on night schedule in cooperation with the foresters, it is said. Sparks from the engines ignite the forest more readily when the sun is shining than at night when there is a protective humidity and dew noticeable in the mountains.

One Can Make and Possess Five Gallons of Wine. (By International News Service) Gulfport, Miss., May 27.—As a result of the Mississippi Supreme Court's decision that it is lawful for persons to make and possess five gallons of wine—provided it is for home consumption and is not sold—the fruit and berry industry along the Gulf coast is fast being developed.

It is blackberry season along the Gulf in this time of year, and hundreds of persons are engaged in picking them. And most of the berries are going into wine.

Pears, since it has been discovered here that they make an excellent grade of wine, are gaining in popularity. One reason for this, it was pointed out, is because they furnish more juice than grapes. That means more wine.

During the past autumn season, it was said, growers used the small fruit for making orange wine. This, it was claimed, had a remarkable resemblance in taste and effect to champagne.

The granting of the people of the right to make wine for home use has created an oasis in the Mississippi delta, and is making the fruit and berry industry more flourishing than ever.

None of the fruit growers, it is claimed, ever sell their home-made wine, but keep it strictly for home consumption.

Forced to Return to Miami. Miami, Fla., May 27.—(AP)—Flying into a violent rain and wind storm about 100 miles northeast of Miami, Bernardo Duggan and his two companions in the seaplane Buenos Aires were forced to make a hurried return to Miami at 9:45 o'clock this morning.

British Champ No Match For Bobbie. Muirfield, Scotland, May 27.—(AP)—Bobbie Jones, American champion, eliminated the British title holder Robert Harris, from the amateur championship tournament this afternoon by a decisive score of 8 up and 6 to play.

THE WEATHER Mostly cloudy tonight and Friday, local showers tonight and in southern portion Friday; somewhat overcast tonight. Moderate to fresh northeast winds.
