

THE CONCORD NATIONAL BANK

Will Open For Business In It's

NEW, MODERN, FIRE PROOF BUILDING

Saturday Morning, May 29

We extend a cordial invitation to all friends, old and new, to visit us.

Our bank is equipped with every modern convenience known in banking. The latest design of safe deposit boxes have been installed in the vault. These are protected from fire and burglary by walls built of rivet grip steel, six inches in thickness, and filled with 18 inches of concrete.

The vault door is latest type of drill and burn-proof steel, 18 inches thick and weighing 25,000 pounds. This is further protected by O. B. McClintock latest model Burglar Alarm system.

The chime clock that has been missed by so many is again giving service on the same old corner.

Owing to unavoidable delays, part of the movable furniture and draperies have not been placed. These will be in shortly. But the Bank is fully prepared to take care of all business.

The officers, directors and employees extend you a hearty welcome, and an invitation to visit us at any time.

GO BELOW SURFACE FOR FACTS, WARNED DR. H. RONDTHALER

(Continued From Page One)

why we should be optimistic of the future," he said, "for it covers the uncertain and at times almost hopeless conditions through which we have lived. From history should come and stay a substantiated Christian optimism in the progress of the world."

Science, and particularly mathematics which Dr. Rondthaler called the hand-maiden of science, should teach us much, the speaker said. "Mathematics," he said, "teach us orderly government, exactness, well reasoned procedure. The study shows us the certain results of a consistent and faithful life. There is no hit and miss business with mathematics. This study should teach us patience, and the certainty of results from an organized procedure."

Literature is filled with disciplines, Dr. Rondthaler said, for it shows the heart and mind of great men and women who have handed down their masterpieces in prose and poetry. "We can learn from these people the habits of their day, the mistakes they made and the trials and temptations they met," said Dr. Rondthaler. "We can read their very heart and mind."

To his query, "What are you going to read this summer?" Dr. Rondthaler offered the suggestion that his hearers study the English dictionary.

"You will find there much to interest and hold you. The subject matter changes constantly. You can stop and start at any point in the book and before you realize it hundreds of pleasant surprises will be opened to you. You will find there romance, history, pathos, chivalry and love. It will prove a delightful research."

"Whatever you study, whatever you do, try to get beneath the surface. Scratch on down until you come to the worthwhile things."

Marshals for commencement, chosen on their class records, were:

Net Fleming Harris, chief; Gladys Biggers, Frances Boger, Lila Bost, Mary Cannon, Sarah Davis, Mabel Henry, Irene Long, Nell Price, Delphia Propst, Violet Propst, Elizabeth Ross, Julia Rowan, Margaret Talbirt,

Bicycle racing is one form of athletic sport in which size and weight do not appear to count for much. Jimmy Michael, the "Welsh rarebit," who was the premier pedaler of a generation ago, was a mere midget in comparison to the present world's champion, Ernest Kaufman, who stands 6 feet 2 inches and weighs 220 pounds.

IT MADE A WELL MAN OUT OF HIM

Was Hardly Able to Do Any Work Before Taking HERB JUICE—Now He Is Enjoying Good Health and Gained 20 Pounds in Weight.

"I was in such poor health that I was hardly able to do any work at all before using HERB JUICE and after taking five bottles I am an able bodied man once more. This is what HERB JUICE did for me and I want to recommend it to others, for I feel confident that all who use it will be benefited by its use," said Mr. W. L. Clemmer, well known carpenter, who resides in Mt. Holly, N. C. in a recent statement to the HERB JUICE man. "I saw my friend's statement in the paper telling about this medicine and what it had done for him. I had suffered for years with rheumatism, constipation, indigestion and sluggish liver. I knew my friend had been bothered with these ailments, so I thought if HERB JUICE would help him surely it would give me some relief. I stopped using other medicines and began taking HERB JUICE, and I noticed a great improvement from the first bottle, and after using five bottles I am well and hearty. I can say to any one that it is the greatest medicine I have ever used and the only one to give me real satisfaction. Today I feel like a different person, my bowels act regularly, also my liver, and I never have any more trouble with indigestion and gas pains in my stomach. I have been completely relieved of constipation, my kidneys are in fine shape and I feel one hundred per cent. improved in every way. I have found HERB JUICE to be a wonderful medicine for toning up the stomach and since I have used it I can eat and enjoy my meals more than I have for years. I have found this medicine to be just what it is advertised to be and I can recommend it to anyone."

They Just Don't Happen To Be Good

You hear a lot about Goodyear Tires. They have a fine reputation all over the world. Did you ever stop to seriously figure out why they are so well thought of? You can't tell much about tires by merely looking at them. They all look pretty much alike. But you know, Goodyear tires don't just happen to be good. They are good for very definite reasons. Most of the reasons why Goodyear tires are good are due to patented processes—materials and methods not found in any other tires. The All-Weather Tread, the Goodyear Bead, the remarkable new Cord material—SUPER-TWIST—the group ply construction—these and many other things are the reasons why more people ride on Goodyear tires than on any other kind. And the beauty of it is—you can buy these superb, quality tires for no more, frequently less, than you pay for the general run of tires.

Two bedrooms are usually required in a home, and many families prefer to eliminate the dining room and utilize its space for the extra bedroom.

In a four-room home, by proper arrangement, the kitchen can be made to serve both as kitchen and dining-room.

This idea has been developed in Lind. The exterior is designed in the southern-cottage type so popular now in the middle states and in the western section. There is no heavy cornice or clumsy projections to spoil the restful appearance. A dainty front porch with tasteful wood mountings and shutters, and the wide sliding all lead their influence in carrying out this charming design.

The house is only 30x30 feet in size—just right for the average city lot. The basement is the full size of the home, and contains the usual layout of laundry room, storage, etc.
