

Summer days are here. Glorious days, but warm. And even more glorious when the day's work has been done. The old, old, round of household tasks has been finished. Time for relaxation with not a care but to enjoy the gentle breezes.

And then callers. Members of your club dropping in for an afternoon chat. Or friends from the neighboring city who motored over for the day. What is to be done? How best to entertain them as you yourself would want to be entertained.

Frigidaire solves the problem. A dainty salad prepared during the cool hours of chilly confines is ready for serving. An ice has been frozen in the freezing trays. And there is always a supply of ice cubes.

Hospitality begins in the kitchen. And Frigidaire is of real assistance to the hostess who takes pride in the quality of her hospitality, especially the quality of the food she places before her guests. For Frigidaire never fails her. It is as dependable as her electric lights and is always on the job.

Frigidaire

ELECTRIC REFRIGERATION

MORE THAN 200,000 BOOSTERS

A REPORT

of the Electric Refrigeration Commission 1924-1925 Commercial National Section National Electric Light Association, proves Frigidaire consumes less current and has the least per cent. time in operation than any other well known electric Refrigerator.

An analysis of Frigidaire value, from the standpoint of Construction, Finish, Capacity, Dependability, Economy and Service reveals at once why

The out of doors is calling. It's cook's day off. An afternoon on the tennis courts or on the golf links is the program. But there is an obligation to be filled. The summer appetite is light, but it is an appetite and must be satisfied.

This modern ice man calls once—with Frigidaire—and the ice stays always

How best to solve the problem? Let Frigidaire do it for you. Prepared or not prepared, the foods left to its care will be in just the condition you would most desire when needed. No worry, no care, no bother. Frigidaire is the ideal refrigerator.

The summer days call for light lunches of chilled foods. All of those things that go to make up the hot weather menu are best when served from the cold, dry, penetrating atmosphere of Frigidaire. They are always crisp and wholesome.

Meats and vegetables retain their original flavor. In fact, the quality in many instances is actually improved. Butter, milk and eggs are as you would have them. And best of all is the assurance that Frigidaire sweeps away danger of harmful bacteria growth with no danger of contamination.

Any model Frigidaire may be purchased on the General Motors time payment plan. A small down payment makes it unnecessary to wait until Frigidaire can be paid for in full before enjoying the benefits of electric refrigeration.

117 DIE AS TRAIN IS BURIED BY LANDSLIDE

Passenger Coaches Covered by Mountains of Earth in Bosnia—49 Persons Are Drowned.

Vienna, July 17.—One hundred and seventeen were killed by a great landslide which buried a railroad train near Sarajevo, Bosnia, according to latest reports. Masses of earth had been loosened by the tor-

rential rains, and the passenger coaches were caught up in the avalanche, and swept along with mountains of earth on top of them.

Further advices from Belgrade report that 49 persons were drowned July 15 in the region of Ipek, which is flooded. A family of ten, surprised by the rising waters in an open field, were drowned. Lightning killed 2,000 sheep and various wild animals. Beasts of the forests, driven

by the floods, sought refuge in the sheepfolds, but did not molest the terrorized peasants' sheep.

The foreign minister, the minister of war and the minister of agriculture are proceeding to the flooded districts. The Danbe is expected to attain its maximum within the next two or three days.

Croquet is probably the only truly amateur sport in the world.

CHERRYVILLE GIRL KILLED IN ACCIDENT

Two Others Injured When Cars Try to Pass in Lincoln.

Lincolnton, July 18.—Miss Lillian Beatty, 15-year-old daughter of James Beatty, who live near Cherryville, in Cleveland county, was instantly killed in an automobile accident on East Main street in this city Saturday night at 11:20 p. m. Her companions, Lewis Johnson, of Gastonia, and Miss Brunie Larmon, of this city, were injured and were carried to the local hospital for treatment for minor injuries following the accident.

The accident occurred when the car driven by Johnson attempted to pass the Ford touring car occupied by Rush Foster and Roscoe Smith, negro farmers of the county. Both cars were traveling west along the highway. The death car, following the collision, turned over several times, spilling the driver and companions out and landing 30 yards from the point of collision in a badly smashed condition.

The negro men escaped injury. Their car, driven by Foster, was reversed in the road and broken up. The negro men left the scene following the accident, but returned this morning, and they with Johnson are being held for a hearing by the sheriff. Coroner Warlick had the body of Miss Beatty removed to an undertaking establishment, thence to the home of the parents at Cherryville. The funeral will be conducted Monday morning at 11 o'clock at Bethel Church in Cleveland county.

Big Black Bear Left in Charge of Tobacco Barn.

Kinston, July 18.—Major Hodges, residing near Dover, had a strange visitor while curing tobacco on his farm on a recent evening. Hodges was attending a barn in which several hundred pounds of tobacco was drying out when a bear strolled up and inspected him with interest. The bear appeared to be friendly, but Hodges was not sure of its amiableness. He quit work and left the barn in charge of the bear.

Bears are more numerous than in many years in the Pocosin country between Dover and Trenton, according to reports from Jones and Craven counties. Dover swamp is said to be overrun. As many as a dozen have been trapped since spring in one Jones county community. Aleck Wetherington and D. J. Donnerson caught two in traps near Dover recently. One of the animals is kept chained to a tree, spending most of its time among the branches.

The wild berry crop in the swamp failed, due to cold weather in the spring, and the animals have been seeking sustenance outside of their accustomed haunts.

In her first appearance in competition an English girl athlete, Miss Phyllis Green, leaped into fame with a broad jump of 17 feet 2 1/2 inches, only one-quarter of an inch short of the world's record.

A Boon for the Flapper.

New York, July 17.—One of the greatest disadvantages possessed by the fashionable, light-colored stockings is the rapidity with which it is marked by every splash of rain or mud. Now, however, a new kind of artificial silk has been discovered. It is waterproof, and stockings can be made from it that will be absolutely impervious to the ravages of the weather.

Stockings made of this material can be dyed to any shade, and look

exactly like any other artificial hose. Another recently invented process in the artificial silk industry is a method whereby the bright lustre of the material can be dimmed to that dull sheen which is the characteristic sign of a genuine silk stocking.

Charles O. Messinger, a Minneapolis machinist, has perfected a new process for hardening cutting steel, which University of Minnesota engineers declare will increase the cutting efficiency from 400 to 500 per cent.

GOODYEAR TIRES

We used to sell Three or Four different lines of TIRES. And we believe they were good ones. But we were asked many times, "Do you think that Tire is as good as the Goodyear?"

So we figured if our customers made Goodyear their standard of value—why try to sell them any other kind. And for that reason, we are now selling Goodyears exclusively.
