Dyspepsia

Makes the lives of many people miserable, and often leads to self-destruction. Distress after eating, sour stomach, sick headache, heartburn, loss of appetite, faint, all gone feeling, bad taste, coated tongue, and irregularity of the bowels, are some of the more common symptoms.

Headache

These effects of the disease, banishes the headache, and restores the tired mind.

Heart-burn

Little good. In an hour after eating it would experience a faintness, or tired, all-gone feeling, as though I had not eaten anything.

Sour Stomach

I took three bottles. It gave me an immense amount of good. It gave me an appetite, and my food relished and satisfied the craving I had previously experienced.

Hood's Sarsaparilla

100 Doses One Dollar

PROFESSIONAL CARDS

J. T. Winstanley, L. M. Warlick, Roxboro, N. C. Milton, N. C.

STRATHORN & WARLICK

ATTORNEYS AT LAW. Practice in all the courts of the State and in the Federal courts.

GRAHAM & WINSTON

ATTORNEYS AT LAW. Practice in all the courts of the State.

WINESTEAD & TERRY

ATTORNEYS AT LAW. Practice in all the courts of the State.

LUNSFORD

ATTORNEY AT LAW. Practice in all the courts of the State.

J. W. GRAHAM, Thos. Ruffin

ATTORNEYS AT LAW. Practice in all the courts of the State.

J. S. MERITT

ATTORNEY AT LAW. Practice in all the courts of the State.

W. A. KITCHIN

ATTORNEY AT LAW. Practice in all the courts of the State.

D. R. J. FULLER

PRACTISING PHYSICIAN. Residence, place formerly occupied by Dr. C. E. Bradsher.

D. R. T. FRAZIER

PRACTISING DENTISTRY. Office in Merchants Bank Building.

D. C. G. NICHOLS

Offers his PROFESSIONAL SERVICES to the PEOPLE of Roxboro and surrounding country.

DR. C. W. BRADSHER

DENTIST. Offers his services to the public. Calls promptly attended to in Person and adjoining counties.

DR. J. C. BRADSHER

PRACTISING PHYSICIAN, ROXBORO, N. C.

DR. R. A. MORTON

PRACTISING PHYSICIAN. Offers his professional services to the people of Roxboro and surrounding country.

LADIES' PEERLESS EYES

Do Your Own Eyeing, at Home. Do not let anything, they are sold every where.

PAINLESS CHILD BIRTH

THE SIN OF OMISSION.

It isn't the thing you do, dear. It's the thing you leave undone. When given you a bit of heartache at the setting of the sun.

CONFUSION OF TITLES.

"And so Fields had a wife and six children." Mr. Scott smiled gently to himself as he thought of it.

"I wonder if he made love," said Mr. Scott to himself, and again he smiled.

"A counter irritant," said Mrs. Fields, who considered much with doctors.

"She must be pretty," replied his friend, summing up the matter.

"That night Philip Fields was the subject of two midnight conversations.

"I do not know," said Mrs. Fields, who considered much with doctors.

"I think she wished me to bring you, replied Phil, boldly; and so, not wishing to expose their quarrel to the public,

"I do not know," said Mrs. Fields, who considered much with doctors.

DISCOVERY OF SACCHARINE.

An Interview with Dr. Fahlberg—A Very Interesting Account.

In a recent interview with Dr. Constantin Fahlberg, the discoverer of this new sugar, extracted from coal tar, he said concerning his relation to this new product: "I had worked a long time upon the compound radicals and substitution products of coal tar, and had made a number of scientific discoveries that are as far as I know, of no commercial value."

"One evening I was so interested in my laboratory that I forgot about supper until quite late, and then rushed off for a meal without stopping to wash my hands. I sat down before a piece of bread and put it to my lips. It tasted unexpectably sweet. I did not ask why it was so, probably because I thought it was some cake or sweetener. I rinsed my mouth with water, and then, to my surprise, the sugar tasted sweeter than the bread. Then I was puzzled. The sugar again raised my goblets, and as fortune would have it, I applied my mouth where my fingers had touched it before. The water seemed astringent. It flashed upon me that I was the cause of the singular universal sweetness, and I accordingly tasted the end of my thumb, and found that it surpassed any confectionery I had ever eaten. I saw the whole thing at a glance. I had discovered or made some coal tar substance which out-sugared sugar. I dropped my dinner and ran back to the laboratory. There in my excitement, I tasted the contents of every beaker and evaporating dish on the table. Luckily for me, none contained any corrosive or poisonous liquid."

"One of them contained an impure solution of saccharine. On this I worked for weeks and months until I had determined its chemical composition, its characteristics and reactions, and the best modes of making it scientifically and commercially."

"When I first published my researches, some people laughed as if it were a scientific joke; others, of a more skeptical turn, doubted the discovery and the discoverer, and still others proclaimed the work as being of no practical value."

"When the public first saw saccharine, however, everything changed. The entire press, European and American, described me and my sugar in a way that may have been edifying, but was simply amusing to me. And then came letters. My mail ran as high as sixty a day. People wanting samples of saccharine, my autograph or my opinion on chemical problems, desiring to become my partner, to buy my discovery, to be my agent, to enter my laboratory, and the like."

"How to Extinguish Fire. An intelligent physician said to me a few days ago, 'I think I can give you a good item.' I replied that I was not at home on the looking-out for such things. He then said that he had studied the subject very carefully and was convinced that it would be well for every house to keep its own fire extinguisher, and it could be easily done. It would certainly be invaluable to persons living in the country and far from their neighbors. The doctor then told me that he would give me the exact recipe of the solution now used in the fire extinguishers now being offered for sale: Take twenty pounds of common salt and ten pounds of sal ammoniac, (sulfate of ammonia), to be had of any druggist, and dissolve in gallons of water. When dissolved it can be bottled and kept in each room in a glass jar, to be used in an emergency. In case of a fire occurring, one or two bottles should be immediately thrown with force into the burning place so as to break them, and the fire will certainly be extinguished. This is an excellent and very successful remedy, certainly worth a trial. We give it, hoping it may prove successful to any who may take the trouble to try it.—Atlanta Constitution.

"On the Isle of Malta. The people must be very frugal and industrious; no doubt they are both ingenious and persevering as well, for it is said that out of every seven seed of passengers that arrive at Malta, only one is from India or Constantinople; they make not less than £200, even though the ship remains in port but six or eight hours. They certainly seem to have the happy faculty of casting corroding care to the winds, as they are always ready for a siesta after their frugal lunch on a crust of black bread, or an onion, or garlic, whichever the nocturnal overtake them. We found them asleep on the steps of public buildings, in shaded doorways, even on the crowded sidewalk, happily as unconcerned of the passing throng as are the dogs of Constantinople. How slumber thus indulged in can refresh one is a mystery; but the fact is, they are cheerfully resigned their toil.—Cor. San Francisco Chronicle.

"Getting Something for Nothing. A short time ago in counting up the coin in one of the boxes at the exposition in which you drop a nickel and take out a package of gum, no less than 120 one-cent pieces were found. Now the immutable law of these devices is that nothing goes except a genuine nickel of the real, the inside arrangements being such that coins of all other denominations slip through into the money box and no gum responds. Consequently all these one-cent pieces were pure gain and just so much ahead of the game. This shows quite distinctly the universal desire of the human race to get something for nothing, and it also exemplifies the old adage that 'cheaters never prosper.'—Pioneer Press 'Listener.'

"A Doctor's Delicate Charity. As delicate a charity as I remember was the act of a gruff, taciturn old physician in a Colorado mining town. A poor, aged person was carefully attended by the irritable doctor. When the patient had sufficiently recovered to dispense with further medical attention he asked for his bill. 'Your bill? Here it is,' said the doctor, opening his pocket book and handing the minister's wife a \$10 bill.—America.

"The greatest events of an age are its best thoughts. Thought finds its way into action.—Spencer.
