OPINIONS OF THE PRESS.

WHAT THE PRESS OF OUR STATE HAS TO SAY ABOUT MEN AND MEASURES.
As it Appears to Our Brethren of the Quill in North Carolina—On Political and other Questions.
President Cleveland caught a forty-pound "drum" fish at Hog Island, Va., Wednesday last. He's a trump any how it can be fixed, far and away ahead of your small fry anglers as he is of microscopic Republican statesmen.—Ex.

HOW SHOULD WE BEST DEVELOP THE SPIRIT OF MISSION IN OUR CHURCH?

Much is being said, at the present day, about missions so let us notice first: Why should we develop this spirit? We should develop and have the spirit of missions in our church, 1st, because we cannot have the spirit of Christ without that of missions. He, himself was a missionary; He preached missions; He talked missions; He worked for missions, and He lived missions. A part of His last command was: "Go ye into all the world and preach the gospel to every creature, and, lo, I am with you always, even unto the end of the world." Is that not mission doctrine? We can work for missions and help to send others if we know not in person. Although Paul is known as one among the greatest of missionaries, yet, we can be as great a missionary as Paul and stay at home.

'twould be a profitable way in which they could spend their time, for they would be educating and fitting a soul for heaven as well as 'gaining' intellectual information.

Another of the best means for developing the spirit of missions in our church is for a missionary to go out from among us.
If a person whom we have known for sometime, one, who has lived and labored among us, leaves and goes to some distant home we are always much interested in their success. When we see or hear anything about the place to which they have gone we are pleasantly entertained by it. It is the same way in the missionary work. If God should raise up and send out a missionary from among us, to some foreign field we would ever be entangled in the missionary from among us.

Highest of all in Leavening Power.—Latest U. S. Gov't Report.

TERrible TRAGEDY.
A Crazy Mother Murders Four Children and Herself.
PARSONS, W. Va., June 14.—Mrs. Phillips Kerch, the wife of a well-to-do farmer near Pleasant Hill, this county, murdered four of her children yesterday and then committed suicide. Mr. and Mrs. Kerch had eight children, the oldest of whom Mollie, was 17 years of age. For some time Mrs. Kerch had been melancholy, and frequently said that she was afraid she would die and leave her children.

Two of Randolphs Charges.

Mr. S. Wittkowsky has just returned from a business trip to Randolph county and according to his account the poor house there is something of a museum: (1) He was told by reliable citizens that it has an inmate, a creature which to all appears as half dog and half man. He (or it) goes on all fours and has the face of a dog but the body of a man. (2) Not long ago a citizen of the county was ordered by the commissioners to the poor house. The officer's fee for the delivery of an inmate at that institution is \$2. This gentus took himself there and then made out a bill against the county for \$2 in his own favor: "County of Randolph, due John Smith for delivering self to the poor house, \$2."—Charlotte Observer.

RIBBONS! FLOWERS!

Our stock in these lines are complete. We have everything that is new and stylish. Cheapest and best line of Lace to be found in the State.

Southern Plants for

NOTICE!

There are more strange rumors about the situation in Hawaii. Minister Blount is reported as having changed his mind concerning the revolution and now thinks the action of ex-Minister Stevens, in placing that country under the temporary protection of the U. S., was justifiable. Blount may recommend the establishment of a protectorate over the Hawaiian Islands by our government.—Free Press.

The "little dollar"—the little eighty-five cent dollar—that Brother William A. Graham receives a thousand dollars a year to take care of—verily it is an object lesson in itself. The Legislature was none too soon in looking after the interest of the Business Agency Fund of "our noble order." If it had been left alone till the next Legislature, there is no telling to what small proportion it would have shrunk. It would perhaps have evaporated.—Lenoir Topic.

The latest benefaction of Joseph Pulitzer editor of the New York World is the gift of \$100,000 to Columbia College. The income from this fund is to be used in aiding the education of poor boys.

There is no telling how much good will be done by this fund, says the Atlanta Journal. Many a poor boy in New York will bless the name of Joseph Pulitzer in the coming years. He has set an example for the men in New York who are wealthier than he, but who do not know how to turn their money loose.—Mecklenburg Times.

The jury in the Borden trial is described as being an "unusually intelligent body of men," and their pictures reproduced in the Boston Post, would bear out that impression. Let it be hoped that this remarkable investigation into the charges against Lizzie Borden may be the end of empanneling fools or men "without opinions" upon petty juries to try criminal cases. Miss Borden's fate is certainly safer in the hands of well-educated and rational men than it possibly could be in those of the regulation jury of our day.—Goldsboro Headlight.

Our congratulations are hereby tendered Editor Jerome Dowd, of the Charlotte Times; and the trustees of Trinity College, upon his election as one of the faculty of that institution.—Instructor in Economics and Mercantile Science, commercial department. While gratified at this recognition of his talent and fitness for the position to which he has thus been called, we very much regret Mr. Dowd's retirement from journalism. While Trinity College gains a valuable acquisition to its faculty the State press loses one of its brightest and most worthy members.—Gold

Miss Willie T. Hall.

"Victor Flyers" as Usual in the Van.
Cycling has become such a universal pastime as well as a healthful recreation and business expedient that some of the largest workshops in the country are devoted to the manufacture of the Modern vehicle. But there is only one establishment in the United States in which an entire machine is made, including the steel parts, leather work, rubber tires, nickel-plating, tools, etc., and on this account nicety of adjustment, smoothness of bearing, lightness and strength are ensured, all of which are essential elements in a perfect wheel. This factory is located at Chicopee Falls, Mass., and bears the name of the Overman Wheel Company, familiar to cyclist the world over. This company introduced the safety bicycle in America, and on that account as well as by superlative merit "The Victor" has steadily held first place in popular favor. It is universally preferred because its makers are known to be masters of improved construction. The "Victor Flyer" has undoubtedly attained the highest plane of perfection. The Overman Company has the handsome exhibit in the balcony of the Transportation building at the World's Fair. This exhibit is built mainly of solid mahogany, elaborately carved and ornamented with gold. It far surpasses any other display in this department, was designed by one of Boston's best architects, and built by the most artistic cabinet-makers of that city. The display of "Victor" catalogue for 1893 covering every feature of their splendid machines, as well as cycling in general. The work is as fine as the printer's art can make it, and gives much useful, valuable, and interesting information. Visitors to the exhibit can obtain copies of this catalogue on request. "The Victor" fully deserves its reputation for the reason that it is made with as much skill and care as the finest piece of mechanism. The vest factories built by the Messrs. Overman were intended expressly and solely for its manufacture, and with the express object in view of turning out the best and highest grade bicycles in the world.

After having noticed "Why" we should do this work, let us now consider "How" we should awaken an interest in it.
I believe the first and most essential thing toward awakening, arousing, and developing the spirit of missions in any church or among any people is for that church or people to be informed about missions—their origin, object, needs, different fields, countries etc. We cannot be interested in any work, I care not what, if we know nothing of it.

Who is most interested in the present and future history of our country? Who is most interested in the medical associations, new medical discoveries etc? The doctors of course, because they know most of such things. So it is in all occupations in life. We find the farmer most interested in agricultural crops, markets and etc. The mechanic in machinery, the educator in schools and just that way in every vocation of life.

Then if we must know something of missions to be interested in them, how shall we learn of them?
1st. Study God's word and see what he says, and what he did in regard to missions. There we will learn of missionary work for ages; of great missionaries and their towns, their labors, and dark as well as bright hours.

2nd. By reading missionary literature. There is not a man or woman, boy or girl, living in this country, but what can get some missionary literature read. If they want it. And

World's Fair Financing.

CHICAGO, ILL., June 14.—Auditor Ackerman made a statement to financiers of the World's Fair to-day that almost took their breath away. He told them that the salary list for May reached a total of \$850,000 and that more than 6,000 were on the payroll during that period. There was a general exclamation that the running expenses were at least \$400,000 a month too high, and the announcement was made that Director of Works Burnham had decided to drop 3,000 men from the rolls this week.

Another Building Falls.

KEOLUX, IOWA, June 14.—With but a moment's warning the three-story dry-goods business building which fronts on Ninth and Main streets fell about 7 o'clock this evening. It was occupied by J. Burrows, groceries and provisions; Shepherd & Real, saloon, and Andrew Wiley, flour dealer. Burrows found a portion of the cellar wall giving away and gave warning to his family and all escaped. He then notified the occupants of the saloon, but before they could get out the building fell with a crash, burying several men in the debris. Three men were taken out badly injured and one man and four children are missing.

La Grippe.

During the prevalence of the Grippe the past seasons it was a noticeable fact that those who depended upon Dr. King's New Discovery, not only had a speedy recovery, but escaped all of the troublesome after effects of this malady. This remedy seems to have a peculiar power in effecting rapid cures not only in cases of Lagrippe, but in all Diseases of Throat, Chest and Lungs, and has cured cases of Asthma and Hay Fever of long standing. Try it and be convinced. It won't disappoint. Free Trial Bottles at J. De Morris' Drug Store.

Is Life Worth Living?

That depends upon the Liver. If the Liver is inactive the whole system is out of order—the breath is bad, digestion poor, head dull or aching, energy and hopefulness gone, the spirit is depressed, a heavy weight exists after eating, with general despondency and the blues. The Liver is the housekeeper of the health; and a harmless, simple remedy that acts like Nature, does not constipate afterwards or require constant taking, does not interfere with business or pleasure during its use, makes Simmons Liver Regulator a medical perfection.
