## IN FINE CONDITION

Manufacturers Highly Pleased  
With Outlook

## BANQUET AT HOTEL BRUNSWICK

Many Important Papers on the Cotton Industry—President Maccoll of the Association, Presides, Delivering Address on Production—Manufacture and Export of the Staple.

Boston, Special.—The 82d annual meeting of the National Association of Cotton Manufacturers opened in Huntington Hall, Mass., Institute of Technology. Many important papers on the cotton industry have been prepared and for the chief social event of the gathering a banquet was arranged for the evening at the Hotel Brunswick.

The first session was called to order by President James R. Maccoll, of Providence, R. I. President Maccoll's address followed, and among the other speakers were Everett W. Burdett, of this city, who spoke on "Cooperation and the Public Welfare;" Harvey Stuart Chase, Boston, on "The Cost of Maintenance and Depreciation in Cotton Mills;" and Henry K. Rowell, also of this city, whose topic was "Taxation and Valuation With Reference to Industrial Plants."

Condition Seems World-Wide.  
In his address, President Maccoll said:

"I am glad to congratulate you upon the continued activity and prosperity of our industry. This condition seems to be world-wide. There is adequate consumption or at least demand to employ every spindle and loom. A year ago we recorded England's increase of 6,250,000 spindles. The latest reports show 10,000,000 spindles added or projected within five years, which equals the growth of the previous 30 years. In our own country there has been a normal addition of spindles; imports of cotton manufacturers have increased during 1906 as compared in 1905, \$14,500,000, or 26 per cent.; exports have diminished \$13,500,000, or 24 per cent.; yet there is no evidence of over-supply or glutted markets. Extension of foreign trade is for the moment ignored, on account of the home demand absorbing all the output.

"Everything that enters into the cost of production is getting on to an excessively high level. It is hardly to be expected that the present tariff can prevent large importations of foreign goods unless we can maintain our lead in the use of labor-saving methods and devices. But the fact is that our foreign competitors are keenly alive to the situation and are rapidly adopting American improvements, and there are already many mills abroad that are fully equipped with every American device. As soon, therefore, as there is a reaction here."

## Grieved Over Dowie's Death.

New York, Special.—Grieving, it is thought, because of the death of "Prophet Elijah III" Dowie, Mrs. Lydia Staley, threw herself from the front window of her home on the fifth floor of an apartment house in East one seventy-fourth street and died later in a hospital from a fracture of the skull. The Staley's were leading member of the Dowie Cult in this city. Staley told how his wife had grieved after the "Prophet's" death and said she had worn herself almost to a shadow through enforced fasting.

## Big Packing Plant Burned.

Pittsburg, Pa., Special.—Zoeller Packing Company, occupying two acres of ground on Spring Garden avenue, Allegheny, was destroyed by fire, causing an estimated loss of \$300,000. The origin of the fire has not been ascertained. It burned rapidly and for a while adjacent property was threatened.

## Stack Crashes Through Roof.

Millville, N. J., Special.—Three young women employed at T. C. Wheaton & Co.'s glass factory in this city were killed Wednesday by the collapse of a smoke stack which crashed through a room in which they were working. The dead:

Lena Doughty.  
Lydia Thurston.  
Sylvia Galligher.  
The accident occurred during a wind storm.

In the Game.  
Once there was a man who thought Uncle Russell Sage ought to stop work. He spoke to him about it. "Why get together any more money, Mr. Sage? You can't eat it; you can't drink it. What good will it do you?"

"Ever play marbles?" Uncle Russell asked.  
"Yes, when I was a boy."  
"Couldn't eat 'em, could you? Couldn't drink 'em, could you? No use to you, were they? What did you play marbles for?"—Harper's Weekly.

## RECIPES.

A Good Sandwich—A nice sandwich is made as below: Slice graham bread very thin; spread it thinly with "made" mustard; over this, on one slice, put a layer of cottage or sour milk cheese; on the other side, spread thickly finely-chopped olives mixed with mayonnaise, and place the slices together. For another, slices of rye bread are buttered, spread with mustard, then with cottage cheese, and put the slices together.

Ham Muffins.—Cream one-fourth cupful of butter, add gradually nearly three-fourths of a cupful of cold bell-pepper ham, chopped fine, also a well beaten egg; then alternately one cupful of Graham flour and one cupful of white flour, sifted, with three teaspoonfuls of baking powder and a cupful of milk. Bake in a hot, well buttered muffin pan about twenty-five minutes.

Cheese Fritters—Cheese fritters can be concocted with a chafing dish and they are very toothsome to any cheese lover. Mix four tablespoonfuls of grated Parmesan cheese with two tablespoonfuls of stale bread crumbs. Beat four eggs well and add to first mixture. Season with salt and paprika. Drop from tip of spoon in small cakes on a hot, buttered blazer. Brown on one side, then turn and brown on the other side.

## To Be Fat: Drink Chocolate.

In an obscure but picturesque little village of far off Germany there is a place called the "Chocolate Cure," where thin people go to become stout. The patients eat and drink cocoa and chocolate all the time while they rest, admire the scenery, gossip and grow fatter every day. The true secret of the great success of the treatment is the happy way chocolate has of fattening just the right places, settling in the hands, the arms, the neck and the shoulders, making the fair patient prettier and plumper all the time. The really effective part of this cure may be tried at home by any persevering woman, and the medicine is so palatable and the method so simple that there is actually, it seems, no reason why all should not be of just the desired weight.

## SELF-CONFESSED LIAR.

Slangey—Yes, I tramped through Switzerland once.  
Newitt—Come off! You never did.  
Slangey—Sure I did; on the level.  
Newitt—That proves you're lying.  
It's simply impossible to tramp through Switzerland on the level.—Catholic Standard and Times.

A Kentucky Congressman says the Wall street man is a bull today, a bear tomorrow, but always a hog. That man will not be called to fill the chair of high finance zoology in a tainted-money college, prophesies the New York American.

## APPENDICITIS

Not at all Necessary to Operate in Many Cases.

Automobiles and Appendicitis scare some people before they are hit. Appendicitis is often caused by too much starch in the bowels. Starch is hard to digest and clogs up the digestive machinery—also tends to form cakes in the ceum. (That's the blind pouch at entrance to the appendix.)

A N. H. girl had appendicitis, but lived on milk for awhile—then Grape-Nuts and got well without an operation.

She says: "Five years ago while at school, I suffered terribly with constipation and indigestion. (Too much starch, white bread, potatoes, etc., which she did not digest.)

"Soon after I left school I had an attack of appendicitis and for thirteen weeks lived on milk and water. When I recovered enough to eat solid food there was nothing that would agree with me, until a friend recommended Grape-Nuts.

"When I began to eat Grape-Nuts I weighed 98 lbs., but I soon grew to 115 lbs. The distress after eating left me entirely and now I am like a new person."

(A little Grape-Nuts dissolved in hot water or milk would have been much better for this case than milk alone, for the starchy part of the wheat and barley is changed into a form of digestible sugar in making Grape-Nuts.) Name given by Postum Co., Battle Creek, Mich. Read the little book, "The Road to Wellville," in pkgs. "There's a reason."

## YOUR-GRANDMOTHER USED IT.

But She Never Had Sulphur in Such Convenient Form as This.

Your grandmother used Sulphur as her favorite household remedy, and so did her grandmother. Sulphur has been curing skin and blood diseases for a hundred years. But in the old days they had to take powdered sulphur. Now Hancock's Liquid Sulphur gives it to you in the best possible form and you get the full benefit.

Hancock's Liquid Sulphur and Ointment quickly cure Eczema, Tetter, Salt Rheum and all Skin Diseases. It cured an ugly ulcer for Mrs. Ann W. Willett, of Washington, D. C., in three days.

Taken internally, it purifies the blood and clears the complexion. Your druggist sells it.

Sulphur Booklet free, if you write Hancock Liquid Sulphur Company, Baltimore.

It is vain to learn wisdom and yet to live foolishly.—Spanish.

The walls are the books of the poor.—Punch  
So. 17-'07.

Include six cans of Argo Red Salmon in your next grocery list. It will keep for twenty years.

We lessen our wants by lessening our desires.—Laburnus.

Itch cured in 30 minutes by Woolford's Sanitary Lotion. Never fails. At druggists.

Use can almost change the stamp of nature.—Shakespeare.

Take Garfield Tea in the Spring—it will save you many days of headache, lassitude and general ill health! This natural laxative purifies the blood, cleanses the system and establishes a normal action of liver, kidneys and bowels.

## ORIGIN OF THE PEARL.

Secretion Formed for Defense, Thinks M. Seurat.

The origin of the pearl in the shell of the oyster, or other bivalve or mollusk, has been the object of a considerable amount of investigation and speculation. Among the more recent studies of the subject may be noted those of M. Seurat recorded in the "Comptes Rendus." This naturalist finds that in pearl oysters from the Gambia lagoons, in the South Pacific, the pearls are due to a small worm—a sort of tapeworm. In cysts on the body and mantle of the oyster he has found true pearls surrounding a nucleus which he has shown to be one of these worms. Like other tapeworms, this one, concerned in the production of pearls, requires a second host in which to complete its development. And M. Seurat considers that the ray is the second host in this case, for he has found in the spiral intestine of this fish small tapeworms, which he regards as the adult form of the larval worm of the pearl oyster. The author has named this new species of tapeworm Tylocephalum margaritiferae. The view has been held that the pearl is a secretion formed, as it were, in self-defense for the surrounding and isolation of an injurious foreign body.

## THIS PEEKABOO GIRL 'NOT FOOLISH.

Inconsistent and baffling as ever, the peekaboo shirtwaist girl is tempting bronchitis and kindred ills, for she still clings to that much-discussed article of dress, unmindful that the frosty air calls for union suits and furs. The combination of the peekaboo and loosely hung coat, cut off just below the shoulder blades with a bit of fur draped across was seen in a street yesterday, and an elderly woman, evidently a friend of the girl's mother, was overheard to remonstrate with the girl for her exposure of neck and chest. "Pshaw!" replied the girl. "There isn't any danger. I have a peekaboo chest protector especially provided for peekaboo waists."—New York Press.

## Do You Open Your Mouth

Like a young bird and gulp down whatever food or medicine may be offered you? Or, do you want to know something of the composition and character of that which you take into your stomach whether as food or medicine?

Most intelligent and sensible people now-a-days insist on knowing what they employ whether as food or as medicine. Dr. Pierce believes they have a perfect right to trust upon such knowledge. So he publishes, broadcast and on each bottle wrapper, what his medicines are made of and verifies under seal. This he feels he can well afford to do because the more the ingredients of which his medicines are made are studied and understood the more will their superior curative virtues be appreciated.

For the cure of woman's peculiar weaknesses, irregularities and derangements, giving rise to frequent headaches, backache, dragging-down pain or distress in lower abdominal or pelvic region, accompanied, oftentimes, with a debilitating, pelvic, catarrhal drain and kindred symptoms of weakness, Dr. Pierce's Favorite Prescription is a most efficient remedy. It is equally effective in curing painful periods, in giving strength to nursing mothers and in preparing the system of the expectant mother for baby's coming, thus rendering childbirth safe and comparatively painless. The "Favorite Prescription" is a most potent, strengthening tonic to the general system and to the organs distinctly feminine in particular. It is also a soothing and invigorating nerve and cures nervous exhaustion, nervous prostration, neuralgia, hysteria, spasms, chorea or St. Vitus's dance, and other distressing nervous symptoms attendant upon functional and organic diseases of the distinctly feminine organs.

A host of medical authorities of all the several schools of practice, recommend each of the several ingredients of which "Favorite Prescription" is made for the cure of the diseases for which it is claimed to be a cure. You may read what they say for yourself by sending a postal card request for a free booklet of extracts from the leading authorities, to Dr. R. V. Pierce, Invalids' Hotel and Surgical Institute, Buffalo, N. Y., and it will come to you by return post.

A blow threatened was never well given.—Italian.

Argo Red Salmon is just the thing for unexpected company. There is nothing better to serve from the can. At all grocers.

Don't buy everything that's cheap and you'll escape being taken in.

## Protective Paint

Pure White Lead Paint protects property against repairs, replacement and deterioration. It makes buildings look better, wear better—and sell better. Use only Pure Linseed Oil and Pure White Lead made by the Old Dutch Process, which is sold in kegs with this Dutch Boy trade mark on the side.

This trade mark protects you against fraudulent White Lead adulterations and substitutions.

SEND FOR BOOK  
"A Talk on Paint," gives valuable information on the paint subject. Sent free upon request.

All leads packed in 1907 bears this mark.

## NATIONAL LEAD COMPANY

In whichever of the following cities is nearest you:  
New York, Boston, Buffalo, Cleveland, Cincinnati, Chicago, St. Louis, Philadelphia (John T. Lewis & Bros. Co.) Pittsburgh [National Lead & Oil Co.]

So 17-'07.

## SWEET BLOODHOUND CORN AND JUICY BREAD

NOT IN A TRUST

Brown & Williamson Tobacco Co. WINSTON-SALEM, N. C.

The Original "Break Plug" Tobacco. The Only "Advertised Brand" of North Carolina Flue-Cured Tobacco. Showing a GAIN EVERY YEAR since introduced. "IMITATED IN STYLE BUT NOT IN CHEW"
