Of course, there is no truth to such a false report and the Power Company is willing for you to make any examination of their plant at any time if you should be inclined to believe such a report.

## UNITED STATES TAKES STAND ANENT MEXICO

### Government Will Prosecute Vigorously All Violations of Neutrality Laws.

Washington, June 28.—The United States has determined that so far as it can prevent there shall be no more revolutionary movements in Mexico and that American territory, anyhow, shall not be used as a base for such expeditions. This, it became known today, led to the arrest of Gen. Victoriano Huerta and Gen. Pascual Orozco at El Paso Sunday and forms the ground for strict surveillance now being maintained on Gens. Felix Diaz, Mendragon, Blanquet and Felipe Angeles and other prominent Mexicans living in the United States.

The government's intention to prosecute vigorously all violations of neutrality laws was revealed today after a conference between Secretary Lansing and Assistant Attorney General Warren.

According to information thus far gathered there are at least four distinct groups, apart from the Villa and Carranza supporters in the United States active politically in the Mexican situation. Whenever such activity reaches the point of setting on foot a military expedition from the United States arrests will follow, according to Mr. Warren, who is handling the cases.

Information gathered by government agents discloses that all the groups oppose Carranza and Villa, but are working independently.
