

## You Need a Tonic

There are times in every woman's life when she needs a tonic to help her over the hard places. When that time comes to you, you know what tonic to take—Cardui, the woman's tonic. Cardui is composed of purely vegetable ingredients, which act gently, yet surely, on the weakened womanly organs, and helps build them back to strength and health. It has benefited thousands and thousands of weak, ailing women in its past half century of wonderful success, and it will do the same for you. You can't make a mistake in taking

# CARDUI

## The Woman's Tonic

Miss Amelia Wilson, R. F. D. No. 4, Alma, Ark., says: "I think Cardui is the greatest medicine on earth, for women. Before I began to take Cardui, I was so weak and nervous, and had such awful dizzy spells and a poor appetite. Now I feel as well and as strong as I ever did, and can eat most anything." Begin taking Cardui today. Sold by all dealers.

Has Helped Thousands.

We reorganized our business and enlarged same by adding a full line of building material and supplies about the middle of July.

Everywhere else, the prices on building material is advancing.

On our market, SINCE THE MIDDLE OF JULY, prices have been declining steadily until now lumber and building material is cheaper than it has been for a number of years.

There must be a reason why prices began to drop about the MIDDLE OF JULY.

ASK YOURSELF WHY.

## Investment

Perhaps you have saved up a few hundred dollars which wish to invest where the principal will be absolutely secure, always available, and at the same time pay you a fair rate of interest. Deposit your money in this bank, taking an interest-bearing

CERTIFICATE OF DEPOSIT

Your principal will be well secured and subject to your demand when you need it.

The interest is more than you would receive on a Government Bond and the money will be just as safe.

We Pay 4 Per Cent

On Time Deposits

**Bank of Roxboro**

Capital Stock \$2,000.00 Surplus \$10,000

## DON'TS

1. Overvalue your property when placing insurance.
2. Start fires in stoves, furnaces or fireplaces unless you are sure the flues and chimneys are clean.
3. Allow a stovepipe to come in contact with wood. Use cement, tin or galvanized iron where the pipe goes through.
4. Leave your home with a lamp burning or turned down low.
5. Wash clothing or other articles in gasoline, benzine or naphtha, nor allow it kept in your house.
6. Throw water on flames caused by burning gasoline, benzine, naphtha or coal oil, as it spreads the flames. Smother it with a rug or covering of some kind.
7. Use any, but the safety match, and others are dangerous.
8. Permit children to play with matches or start bonfires.

## WORKMEN'S COMPENSATION SPREADING.

Workmen's compensation legislation will necessarily lead to an increase in the reported number of accidents, particularly those of less serious character, involving a comparatively short incapacity for work; but it may also be expected to bring about notable reductions in the actual number of accidents by causing the installation of accident-prevention appliances.

An important section of the bulletin is devoted to the progress of reporting and classifying accidents, initiating for the purpose of securing uniformity of practice in the reports of the various states.

More than half the states have adopted workmen's compensation laws and it may be expected that before very many more years the idea of compensation for industrial accidents will become universal throughout the United States.

## SAFETY BY CO-OPERATION

Well said: "We must have co-operation in the great work of safety. Not only is this true of the men in the organizations that are giving the best that are in them to the work at hand, but the same spirit should be manifested by the safety departments of the various plants and railroads. 'Safety First' is something that we should not permit to be commercialized. Anything that stands for the conservation of human lives, limbs and happiness is too sacred to be dragged in the dust of contempt and ridicule or made sport of commercialized bargains."

## TYPEWRITER REPAIR STATION

A great deal of the work done in these stations is cleaning typewriters, and a common method for doing this is to immerse the machine into a tub or vat of gasoline and wash or brush out the parts. This should never be allowed inside of a building, but should be done on the outside or in a room separate from any other and well ventilated.

## "THINK FIRE" BEFORE IT HAPPENS

DON'T allow children to play with matches.

DON'T lock the fire escapes; you may need them yourself tonight.

DON'T leave everything to the landlord; inspect your own house from cellar to garret and locate all exits.

DON'T throw away lighted matches, cigars, or cigarettes.

DON'T go into dark closets, bed rooms, or cellars, using matches or candles to light your way.

DON'T use insecticides in the vicinity of open flame lights. Many such compounds contain volatile inflammable oils.

DON'T use kerosene, benzine, or naphtha in lighting fires, or to quicken a stove fire—it may result in death.

DON'T use gasoline or benzine to clean clothing near an open flame, light or fire.

DON'T use alcohol lamps, especially if made of glass; they often break and the fluid is ignited at once.

DON'T fill any lamp with gasoline, kerosene or other oils while the lamp is lighted. Keep the burners of all oil lamps thoroughly clean.

DON'T fill kerosene lamps after dark or within 15 feet of the lights or fire.

DON'T put ashes in wooden boxes or barrels. Keep ashes away from boards. Don't place them on dumb waiters or in closets. Hot ashes will take fire by themselves as they frequently have small bits of coal mixed in with them.

DON'T use oils with a low flash point.

DON'T accumulate rubbish in premises, cellars or workshops, and don't deposit such material on dumb waiters unless it is to be removed at once; while awaiting removal, keep such material in covered metal-lined receptacles.

Thirty-one buildings at Youngstown, Ohio, were condemned recently by the attaches of the State Fire Marshal's office, co-operating with the city officials and residents in the annual spring clean-up of the city. It is expected fifty more buildings will be ordered torn down in a few days.

## SAFETY FIRST

Don't kid about safety; you may be the goat.

"It doesn't cost anything to be courteous" is an old saying. But it does not pay to shake hands with danger, just to show you are a good sport.

While busy making yourself safe, take a little time to make your fellow workman safe, too.

Look before you leap, "Safety First." Don't get hurt first and then try safety. Try "Safety First" and you won't get hurt.

It is easier to try "Safety First" than to try to walk with crutches.

An ounce of prevention is worth a pound of cure. Let us prevent accidents and avoid the necessity of compensation for them.

So long as our eyes are the windows of our souls we may all look out for ourselves. By the use of goggles we can save risk of not being able to do this.

Every man is the sole proprietor of his own shoes. But he wants to keep on the good side of safety to be able to wear a pair.

The man who will not listen to safety rules, may have to listen to the sound of the ambulance gong.

A bed at home is worth two in a hospital.

Employees must not trust to the care exercised by another when their own safety is involved.

## DANGEROUS STOVE POLISH

In a special bulletin on "Benzine Stove Polish," the fire marshal of Wisconsin says that many benzine stove polishes are manufactured of practically the same ingredients, the only difference being in the name, and that all the polishes are equally hazardous. In the past eight years there have been more than 400 serious accidents in the United States on account of the use of the benzine stove polish compound.

Benzine polish is usually found on the shelves of the grocery stores which have as their customers the poorer class of people. This would appear to be due to the fact that the over-busy housewife, having in most cases no domestic help, is constrained by force of circumstances to economize on time in every possible way. The benzine causes the polish to dry quickly, and this fact, of course, entailing less work, recommends it to this class of householders.

We would caution all householders to use only fire proof stove polish, whether in liquid, powder or paste form. All stove polishes other than benzine polish can be safely used, and just as satisfactory results can be obtained, especially if a few additional minutes are given to this duty. And is it not worth our while to devote a little attention to this matter and thereby save this enormous sacrifice of human life? In short, is it not good to preach that it is better to be safe than sorry?—Hartford Agent.

## Agent Must Inspect Property—Policy Now Stamped.

There shall be printed, stamped, or written on each fire policy issued in this State the basis rate, deficiency charge, the credit for improvements, and the rate at which written, and whenever a rate is made or changed on any property situated in this State, a full statement thereof, showing in detail the basis rate, deficiency charges and credits, as well as rate proposed to be made, shall be delivered to the owner or his representative having the insurance on the property in charge, by the company, association, their agent or representative, with a notice to the effect that said rate is promulgated and filed with the Insurance Department. Every agent of a fire insurance company shall, before issuing a policy of insurance on property situated in a city or town, inspect the same, informing himself as to its value and insurable condition.—Laws 1915, c. 109, s. 3.

## A HINT TO THE FARMER

Do not neglect to plough a fire guard around your buildings and see that it is kept free from weeds and grasses. By using this precaution you may save a preventable loss.

Allow no one to smoke around your buildings.

Do you not know that the fire waste throughout the country has reached a proportion that the people should unite and give some attention to fire prevention and thus lessen the loss? Cleanliness and reduction of the fire waste will bring results; won't you try and help and also get your neighbors interested.

## WHO PAYS THE COST?

Knowledge in fire prevention means the saving of life and property. Don't that appeal to you? If not, there must be something lacking. What is it? You can do your part, no matter how little that may be. It keeps and means encouragement to others and helps reduce the fire waste, which means a saving to the individual. You are taxed to pay the fire losses of others. You may think you are not, but as a matter of fact you are, and you can readily learn this truth if you will study the fire loss in your own locality.—Mutual Insurance Journal.

## Thrifty Saving Lead to Fortune

Every great fortune had its origin in small savings. Wealthy men have repeatedly risen from the ranks of newsboys and bootblacks.

The first savings bank abolished poverty in the little Scotch village, which was its birthplace, by making it possible for people to save small amounts. Previously the banks would not accept a smaller deposit than \$50.00.

The flexibility of the modern bank accommodates itself to every class of people. Even the little child who saves his pennies until he has a dollar to deposit, has all our facilities at his command.

"DESPISE NOT THE DAY OF SMALL THINGS".
