## WOULD CO-OPERATE WITH CITY OFFICIALS

INSURANCE COMMISSIONER HAS HEART TO HEART TALK ON SOME MATTERS.

### FOR UPBUILDING OF TOWN

Commissioner Young Seeks to Protect Citizens From Loss of Property by Fire.

In the effort to get in more direct touch with and to secure the close cooperation of city and town officials throughout the State, Insurance Commissioner Young has sent the following letter to those officials:

"Gentlemen: The Insurance Department desires to help you in your work for the upbuilding of your city and the protection of its citizens and their property. Let's have a heart to heart talk on some matters.

#### Building Permits.

"Our laws require that before a building (in or out of the fire-district) is commenced a permit must be obtained from your building inspector, and that it must be erected in compliance with the requirements of the law. This is a most important law. If you wish to avoid fires in your city. Is it complied with? If not, your building inspector is subject to indictment. You can appoint a building inspector or the chief of the fire department becomes ex-officio such officer.

#### Inspection of Buildings.

"Does your inspector go over the fire district—every building—once each quarter and inspect every building in city at least once a year? The law requires this. Nothing will do more to protect your citizens and their property than this inspection. No money spent will pay better than salary paid a good man as city building inspector. Try it. We will help you.

#### Electrical Inspections.

"Electricity furnishes power and the best light. It is the safest light, when properly installed; but when not, nothing furnishes a greater menace. How are your electrical contractors? Do they understand the business? If not, they should not be allowed to endanger the lives and property of your citizens. If they understand doing the work there is no excuse for poor work, and such as is dangerous and against the law. What is your electrical inspector doing in making inspections and requiring compliance with the law?

#### Dangerous Conditions.

"In many places I find the local inspectors are worried because while places are cleaned up on notice, no further attention is paid to them, and in a few days the conditions are just as bad. The remedy is plain. It is just as much against the law to allow your premises to become dangerous because of trash, etc., as it is not to clean up on notice. In inspecting and giving notice to clean up, also notify the parties who are accustomed to pay no attention to the condition of their premises, except on notice, that the next time their premises are found in bad condition a warrant will be taken out. This will do the work and insure a clean, safe town.

#### Fire Departments.

"This is one of the most necessary departments of your city government. What is its condition? What attention are you giving to its equipment and organization? How is the apparatus? What is the condition of the hose? No time to make preparations or get ready after the fire bell rings. Do you take care of your firemen? Do they practice regularly? Do they inspect to clean out conditions likely to cause or feed a fire and to know how to get at and fight a fire? I would like to help you and your fire department. I will send an expert to examine your apparatus and drill your men. The cost to you will be nominal—nothing where he simply visits, and cost of board where he spends several days.

#### Inspectors.

"Under the present law it is no longer the duty of the mayor and board of aldermen to pass on individual cases of permits for building. They are relieved of this 'worry'; but it is still their duty to select and compensate good men for inspectors and see that they do their duty. It is for this reason I appeal to you. Have you good inspectors? Are they doing their duty? Are their salaries such as to call for and demand the best efforts of good men?

#### Conclusion.

"There are many other things of mutual interest we might discuss with profit—in fact, things pertaining to your water supply, fire department, fire alarm system, building ordinances, inspections of buildings, and electrical installation. Write to me about them. Let's talk it over and see how my department can help you. It is a pleasure to serve you and your people.  
Yours in the work,  
"JAMES R. YOUNG,  
Insurance Commissioner."

As between dry cleaning at home with gasoline and fighting in the European trenches there isn't much choice, so far as safety is concerned.

## Best way to refinish Buggies and Fords

This is the way: Wash off all dirt and grease from the surface with warm water and soap; smooth the rough and glossy spots with sandpaper. Then you are ready to apply an even coat of
