

WAISTCOAT ADDS TO SUIT

Accessories Are Used Alike on Formal and Informal Costumes—Cotton-Homespun Neckwear.

Spring is to see the waistcoat or gilet established as an essential accessory to the smart suit costume.

The neckwear trade is talking sport neckwear strongly, and consequently is showing fabrics of appropriate weave and in exceedingly smart color effects.

What promises to be one of the successful fabrics of the season for this purpose is "cotton homespun," which comes in plain colors and in good looking stripes, and is smartest when severely mannish, or decorated with hand drawn work.

Some embroidery in colors is used as well. New models in this material have been brought out. One has a characteristic roll sport collar and pockets in the turned up bottom.

A collarless model, with hand drawn revers at the front, is effectively worn with a coat having a black collar.

There are mannish waistcoats in this same material, collarless and pocketed, in narrowly striped homespun.

VARIETY IN SPRING VEILS

Many Interesting Face Coverings Are Now Being Shown for the Season at Hand.

In the lineup of spring accessories and for the season at hand many interesting novelties are shown. The long, narrow scarf or panel veil is one of the chic bits of face covering, and it may be worn in ever so many ways.

This scarf veil is frequently draped across the hat and allowed to fall over the shoulders, giving a soft, becoming framing to the face.

Among the new veils may be mentioned the large square one with a fine mesh section woven into one side, this section forming a tight face veil, while the veil proper with its more heroic pattern drapes the hat and shoulders.

FASHIONS IN BRIEF

Kasha cloth makes charming costumes for country wear.

Black jet nail-heads are used a great deal as trimming.

Conservative silhouettes lead in blouse styles, with the peasant outline much modified.

In cottons, dimity keeps its place; voiles are steadily growing in popularity, and cotton crepe appears as a novelty item.

Suede pockets and wigwag fringes on tweeds; velvet backs to peaked revers collars and topcoats; fur or duxetyn linings have also been seen.

Felt hats with soft bell-shaped crowns have the brims slashed in one way or another and overlapped to stimulate quilts, the edges bound in ribbon.

Lace is playing a large part in the making and trimming of hats, and some dainty smart little models of hair braid are trimmed almost wholly in softly draped lace veils.

Chamois gloves are made with trimmings of kid. Sometimes the cuff of the chamois gambler is made with cut-work, beneath which shows a pattern in the darker kid.

CHIC FOR THE LITTLE GIRL

Striking even for the "littlet girl" is a frock of white or ecru, worn with a large black miller hat with long streamers—a combination that is always good.

DOES NOT UNDERSTAND GIFT

Frenchman Absolutely Without Education Is Unable to Explain His Mathematical Powers.

Jacques Inaudi is in Paris. Nightly he demonstrates his extraordinary feats of calculation. He displays always the same assurance, the same accuracy, and when, occasionally, he gets too self a question, for just a second he presses his hands to his wide forehead before answering—exactly the same gesture he had forty-two years ago when he came to the capital for the first time.

That was in 1880, observes La Petit Parisien, Paris (translated for the Kansas City Star). Inaudi was then 11 years old. The son of poor Piedmontese peasants, he knew neither how to read nor write, but after a few minutes of the intense abstraction of the savant he could solve the most complex mathematical problem.

Wandering about the world, displaying a trained monkey in cafes for a livelihood, it was a custom to ask his audience to put arithmetical problems to him, and his fantastical ease in solving them finally attracted the attention of a Marseilles merchant, who brought him to Paris.

He completely amazed the scholars and in a few days was celebrated. He could never explain the mechanism of his calculations. He simply possessed the mysterious power with which certain human beings are sometimes gifted. Broca, who measured his skull, found the head abnormally developed on the right side. That was all. Inaudi has remained ever since a marvelous calculating machine, a living prodigy, but has made no new contributions to the progress of mathematics.

CAN SEE GROWTH OF METALS

Interesting Experiments Conducted by Ohio Professor Recently Made Public by Scientific Monthly.

When a piece of iron wire is placed in a solution of potassium ferricyanide (2 to 4 per cent), containing some egg-white or gelatine to act as protective colloid, and a little sodium chloride, delicate blue-green vesicles and tubules of ferrous ferricyanide are quickly formed; the tubules grow out rapidly into the solution, and within half an hour or less the whole wire is covered with a dense filamentous growth resembling blue green algae, writes Prof. Ralph S. Lillie of Nela research laboratory, Cleveland, O., in the Scientific Monthly.

Iron is an especially favorable metal for such experiments apparently because of the presence of numerous local electric couples between different areas of the metallic surface, and filaments several centimeters long are readily obtained. These often exhibit delicate and regular cross-striations and other appearances suggestive of organic structure.

If instead of iron the related metals, cobalt and nickel, are used, a different type of growth is obtained, coarser and more vesicular in structure and with finer tubules; many of the latter follow a characteristic, tortuous or zig-zag course.

Ballet Among Soap Bubbles

Beautiful scenes are common in the motion picture studios, and many mechanical effects are produced which fairly dazzle the eye of the onlooker. As a climax to an unusually gorgeous "set," a director recently called for a dance in the midst of soap bubbles. Accordingly, since a space 20 by 40 feet had been designated to be filled with the frothy substance, a metal sieve of this size was fitted in the floor. A soap solution, made with 200-barrels of the product and mixed in the same manner as plasterers prepare lime, was piped to the porous floor, and steam forced through it. The immediate transition into bubbles began, and these soon rose to a huge scintillating mass, in which the dancers performed, the whole presenting, according to illustration and description in the Popular Mechanics Magazine, a scene of fairy-like splendor.

The Country of Mothers-in-Law

China until recently was the country of mothers-in-law, where they reigned and used their power to make martyrs of their daughters-in-law. One cannot imagine to what point this ferocious authority was carried. But their good time is nearing an end; the young wives have liberated themselves in the Chinese republic.

Forest Fires in Quebec

The establishment of a permit system whereby all sportsmen, surveyors, trappers, prospectors, lumbermen and others intending to pass over, land leased by the provincial government as timber limits, should be obliged to obtain a permit, was one of the subjects discussed at the forestry conference of the Quebec Forestry Protective association, held at Montreal recently.

The Route to Heaven

Show me the man who would go to heaven alone, and I will show you one who will never be admitted there.—Feltman.

Be Satisfied

Rest satisfied with doing well, and leave others to talk of you as they please.—Pythagoras.

Dampness of Error

There is nothing so true that the dampness of error has not warped it.—Dwyer.

LESSON FOR JUNE 4

JEREMIAH TRIES TO DESTROY GOD'S WORD

LESSON TEXT—Jeremiah 24. GOLDEN TEXT—The Word of our God shall stand forever.—Isa. 40:8. REFERENCE MATERIAL—Isa. 40:8-11; Matt. 23:35.

PRIMARY TOPIC—The Burning of a Good Book.

JUNIOR TOPIC—Jehoiakim Burns the Prophet's Book.

INTERMEDIATE AND SENIOR TOPIC—A King Who Scorned God's Word.

YOUNG PEOPLE AND ADULT TOPIC—How to Meet the Forces Antagonistic to God's Word.

1. The Book Being Written (vv. 1-4).

1. The Time of (v. 1). In the fourth year of Jehoiakim, Jeremiah had been exercising the prophetic ministry some thirty years.

2. Against Whom Spoken (v. 2). They were directed against Israel, Judah and all the nations.

3. The Purpose of (v. 3). The grand object of the Lord in sending this message by the prophet was Judah's repentance.

4. Method of (v. 4). Jeremiah dictated the words of the Lord to Baruch the Scribe, who wrote them upon a roll of a book.

5. The Book Being Read (vv. 5-21). Jeremiah was unable to speak the message of the Lord to the people, as he was "shut up" (v. 5). "Shut up" most likely means a royal ban against Jeremiah's proclamation of God's Word to the people or against his entering the temple.

6. To the People (vv. 6-10). The occasion which brought the people together was a day of fasting (v. 6). Because of the threatening of the Babylonians, Jeremiah directed Baruch to read to the people the words of the Lord which he had dictated to him, with the hope that the people would present their supplication before the Lord and return every one from his evil way.

7. To the Princes (vv. 11-19). While the reading of the book unto the people seemingly created no great impression, yet Micahiah was so deeply moved that he went to the scribe's chamber where the princes were assembled and declared unto them all the words which he had heard Baruch read. The princes sent for Baruch to come and bring the roll with them. Baruch came and read to them with the result that (1) they were aroused with fear (v. 10), (2) they inquired as to how he had written the words (vv. 17, 18). To this he replied that he had written in the book the words which Jeremiah had dictated to him. (3) Their concern for the safety of Jeremiah and Baruch (v. 19). They were instructed to hide themselves from man's sight.

8. To the King (vv. 20, 21). The princes regarded the words of the Lord to be of such importance that they should be read in the hearing of the king, for he was mainly involved in the judgments pronounced. Upon their report of the matter to the king, he had Jehudi bring the roll and read it to him in the presence of the princes.

9. The King Destroying the Roll (vv. 22-23). Instead of becoming penitent and afraid he became enraged and cut the roll leaf by leaf and threw it into the fire until it was consumed. This he did against the intercession of some of the princes. When the roll was destroyed he ordered Jeremiah and Baruch arrested.

10. The Roll Rewritten (vv. 27-32). The burnt roll was reproduced by the command of the Lord, and many like words were added unto them. We should learn from this incident—

1. The Indestructibility of God's Word. Men may cut it to pieces and burn it, but the Word of God shall stand forever. It comes to light again with woes added to be visited upon its would-be destroyers.

2. The reason men attempt to destroy God's Word, it is because of the authoritative rebuke of their sins. The Bible arraigns man for his pride and wickedness and asserts God's sovereign power over man and his demand for a personal surrender unto Him and worship of Him.

3. The Method of Attempted Destruction of God's Word. It was part by part. "When Jehudi had read three or four leaves he cut it with a penknife." The rationalist today cuts out the biblical conception of God as a being whose essential nature demands punishment of sin; therefore he cuts out the Bible teaching of man as created of God in His likeness and image. Instead of that he makes man a product of evolution; therefore he explains away the fall of man.

4. The Route to Heaven. Show me the man who would go to heaven alone, and I will show you one who will never be admitted there.—Feltman.

5. Be Satisfied. Rest satisfied with doing well, and leave others to talk of you as they please.—Pythagoras.

6. Dampness of Error. There is nothing so true that the dampness of error has not warped it.—Dwyer.

MOTHER'S FIRST THOUGHTS WAS OF HER LITTLE GIRL

Mrs. J. T. Alley Tells How Alarming Stomach Trouble From Which They Both Suffered Was Completely Overcome By Tanlac.

"Tanlac has done much for me it seems I just can't praise it enough," said Mrs. J. T. Alley, Box 448 Schoolfield, Va.

"I suffered so from indigestion and stomach trouble I couldn't eat a thing without intense pains. Gas formed and caused such awful pains around my heart I could hardly stand it.

If I ate anything with acid in it like tomatoes, it almost drove me to distraction. I didn't know what was to get a good night's sleep and could find nothing to help me.

"My little girl, nine years old had been suffering so dreadfully from indigestion I tried Tanlac in her case and it so completely relieved her I started on it myself. Since taking 4 bottles I feel well and happy all the time, my appetite is just fine and I have gained ten pounds I think Tanlac is the grandest medicine in the world."

Tanlac is sold by all good druggists.

HOUSE PARTY AT BEREA

In honor of Miss Mildred M. Day of Roanoke, N. C., and Miss Helen B. Elliot of Berea, route 4, Mrs. S. L. Vaughan of Berea gave a house party last week. Miss Day and Miss Elliot are charming young ladies with a host of friends and admirers. Miss Elliot being an expert pianist and Miss Day with her wonderful trained voice, entertained their friends and visitors with numerous musical selections. The amusements of the day were motor rides, fishing, kodaking, and visiting. The arrangements at night being social parties with refreshments served by the hostess and her daughter, Miss Magnolia.

The young people of the community were delighted to have the charming young ladies in their midst and they regret very much that the party is over. The much enjoyed party was ended by attending Oxford College Commencement exercises, Misses Day and Elliot having friends in school there.—D.

TO THE DEMOCRATIC VOTERS OF PERSON COUNTY

I respectfully announce my candidacy for the nomination as Solicitor of the Tenth District, subject to the action of the Democratic primary on June 3rd, 1922. I appreciate the support given me heretofore by the good people of Person County and I trust to have your continued favors.

Very respectfully,  
S. M. GATTIS.

Dr. S. Rapport OF DURHAM, N. C. WILL BE AT ROXBORO, AT THE HOTEL EVERY

FIRST WEDNESDAY in each month to examine eyes and fit glasses. Glasses fitted that are easy and restful to the eyes. Headaches caused by eye strain relieved. My next visit will be Wednesday June 7th 1922.
