PLEASE PAY ME.
I do not want to be rough but I must insist that those who are owing me come in and settle. Some of you I have carried for 2 years and I need the money. Owing to some large expenditures I am in debt, money borrowed at the bank, and it is absolutely necessary for me to collect. Don't force me to take harsh measures and go after you, but come in and pay us—don't put it off, for I mean business and must have what you are owing me.

Reduce Your Production Costs

Farming, like every other business, must cut down the overhead.

It is not a question of being able to afford a Fordson; it is a question of being able to continue farming on the old too-costly basis.

The farmer's problem is not all a sales problem; it is also a production problem. He must cut down the cost of production.

The Fordson does more work at a lower cost and in less time than the old hand methods.

Let us give you the proof. Write, phone or call today.

CALORIC
PIPELESS FURNACE

Radical price reduction puts the cost of a Caloric so low that no family with a home to heat can afford to be without this modern heating plant.

At the new low prices the Caloric costs less than stoves necessary to heat the building.
Costs less than a good piano.
Costs less than a good home water system.
Costs less than twice the price of a good washing machine.
Costs less than twice the price of a phonograph.

Order a Caloric now because it is the greatest comfort and convenience you can have in your home. Because it protects the family's health and thereby the family's pocketbook. Because it pays every dollar of its cost in the fuel it saves.

Order now because prices cannot be lower—and by ordering now you will enjoy the comfort and save a good percentage of its cost this winter.

Do not delay. Winter is here in earnest. Every blizzard is an argument for Caloric comfort now. You take no risk. Our guarantee—your satisfaction or money back.

PROTECTION THROUGH THE CENTURIES

YOUR desire to protect the remains of your loved ones finds comforting assurance in the Clark Grave Vault. It is constructed on a law of Nature—the "diving bell" principle, which is the only practical "seal" known to science.

The Clark Grave Vault affords permanent protection because it is least affected by rust, or deterioration of any kind. It is airtight, water-tight—built to last for centuries.

Even though the Clark Grave Vault is completely covered with water for years, there will be no water inside. Twenty years of use prove this statement. It is made entirely of twelve gauge Keystone copper-bearing steel. (Stone, brick and concrete vaults let water in and hold it.)

We supply the Clark Grave Vault because we realize a vault is worth while only when it permanently protects.
