## TURN ON THE LIGHT

IN halls of science; in little homes; in great industrial buildings; along city streets; in colleges; on battleships; in parks; in offices; in hospitals; in palaces; up and down the roadways of the country; in the rooms of rich man or poor man—turn on the light!

It all seems so simple—A button pressed—a switch turned—and then: dark corners gone, hours utilized, beauty enjoyed, fortunes made, lives saved!

"Turn on the light!"

Did your thoughts ever go behind those words? Did they ever go back to the huge dams and water turbines, where water power is used, or the stupendous steam boilers? Or back to the turbines, engines and generators, wires of high-tension transmission lines and the innumerable smaller wires, all of which, in a sort of endless chain, link up with your reading lamp?

Roxboro Light and Power Co.

Ask this agency for "My Property" a valuable Farm Inventory booklet. It is free to all owners.

How would you answer your neighbor's questions

IF your dwelling and barns should burn tonight, how would you answer your neighbor's questions? "Was it insured?" That is the first thought in the mind of every one who sees valuable property going up in smoke. What would you say? Perhaps you have an insurance policy but is it adequate? Is it so arranged that it fits your needs and the special requirements of your farm? Insurance must be adapted to the property that it covers. Call on this agency of the Hartford Fire Insurance Co.

Make sure now that your insurance is right! Tomorrow may be too late!
