IN fever the pores of the skin are closed. Excess heat is being produced in the body, but is not being carried off in the usual way, by perspiration, because of the closed pores.

# Fever

Chiropractic adjustments reduce in a natural way, by causing the pores of the skin to open, so that the cooling perspiration carries off the excess heat. You can prove this for yourself the next time you "run a fever" with a cold, sore throat or bilious attack.

**MADE ENTIRELY OF TWELVE GAUGE RUST-PROOF STEEL**  
THE heavy twelve gauge Keystone "copper-bearing" steel used in the Clark Grave Vault is the most perfect rust-proof steel or iron known. The protection is absolute, because the Clark Grave Vault is built on the "diving bell" principle, the only scientific way of sealing a vault water-tight and air-tight. It is guaranteed for fifty years and will undoubtedly last for centuries. (Stone, brick and concrete vaults allow water to seep in and hold it.) The supplying of the Clark Grave Vault is typical of the conscientious service rendered to the public.

## TURN ON THE LIGHT

IN halls of science; in little homes; in great industrial buildings; along city streets; in colleges; on battleships; in parks; in offices; in hospitals; in palaces; up and down the roadways of the country; in the rooms of rich man or poor man—turn on the light!

It all seems so simple—A button pressed—a switch turned—and then: dark corners gone, hours utilized, beauty enjoyed, fortunes made, lives saved!

"Turn on the light!"  
Did your thoughts ever go behind those words? Did they ever go back to the huge dams and water turbines, where water power is used, or the stupendous steam boilers? Or back to the turbines, engines and generators, wires of high-tension transmission lines and the innumerable smaller wires, all of which, in a sort of endless chain, link up with your reading lamp?

## How would you answer your neighbors' questions

IF your dwelling and barns should burn tonight, how would you answer your neighbors' questions? "Was it insured?" That is the first thought in the mind of every one who sees valuable property going up in smoke. What would you say? Perhaps you have an insurance policy but is it adequate? Is it so arranged that it fits your needs and the special requirements of your farm? Insurance must be adapted to the property that it covers. Call on this agency of the Hartford Fire Insurance Co.

Make sure now that your insurance is right! Tomorrow may be too late!
