THREE HUNDRED PERSONS ARE DROWNED IN ITALIAN VILLAGES

Lake Dam Near Bergamo—Bursts and Lets Loose Avalanche of Flood VILLAGES WIPED OUT

Red Cross Organizes Relief—Dispatches Say Tragedy Happened Forty Miles From Milan

Milan, Dec. 5.—The huge artificial lake at Dezzo, near Bergamo, has overflowed and broken through the dike the water sweeping down through the valleys, overwhelming villages, and drowning inhabitants by tens. The number of victims is expected at 3 hundred or more by some of the authorities.

The heavy rains which have been falling for the past weeks caused the stream to overflow and filled the lake to the bursting point. Millions of cubic yards of water were let loose and the terrific force of the flood swept everything before it. The village of Dezzo, originally containing 600 inhabitants, and the adjacent villages of Menaggio and Teveno, were directly in the line of the rushing waters and were inundated. Many of the people, however, were appraised of the break in the dike and fled, together with hundreds of other refugees to the hills.

Red Cross relief has been organized and the government is using all efforts to aid the sufferers.

A dispatch from Rome says it is believed the number of casualties due to the bursting of the Lake Gleno dam will exceed three hundred. An avalanche of water from the lake was precipitated four thousand feet destroying many villages.

The artificial lake was situated in the fertile valley of Camonica, about 500 feet above sea level. The bursting of the dike was followed by tragic scenes. The whole valley of Dezzo is devastated and eight villages, at least, have been blotted out. Dezzo itself was completely destroyed by the waters, which covered every house. Only the church steeple can be seen. Five generating plants were so badly damaged that the city of Bergamo is without lighting power.

The stricken people number into the thousands and army units have been dispatched to the devastated zone to open up kitchens. Army engineers will give every possible aid in the reconstruction work.

The dike was 50 feet in height.
