**DO YOU BET? THEN READ.
41 ACRES OF BUGS.
IF YOU LOVE YOUR CHILD.
WOMEN—AFTER 50.**

Federal income tax officials investigating "hand bookmakers" discover a bookmaker who deposits between \$15,000,000 and \$19,000,000 a year in Cincinnati banks.

A bookmaker can deposit only what the little betting fools lose. Let them think it over.

A zoological garden for insects only, and occupying forty-one acres, will furnish a national object lesson.

It will show the good done by some insects, the harm done by others.

Without insects, for instance, there would be no blackberries.

Without bumble bees, as the Australians discovered, with amazement, you cannot have clover for your sheep. It would be easy to destroy all the insects in an orchard, but if you did that you would ruin the fruit crop. With insects, as with other animals, the dangerous kinds are in a minority. But the dangerous ones are very dangerous.

The insect zoological garden is much more important to human beings now than the old-fashioned kind. Man's dangerous enemies are no longer the wolves, lions, catamounts and snakes. Where wolves at their worst might kill 500 people in a year, one little demon of a microscopic life, the colon bacillus, carrying with it Asiatic cholera, will destroy millions of lives.

German scientists, fighting contagious diseases, adopt this motto: "Don't let your children be kissed by strangers."

A better motto would be: "Don't let your children be kissed by ANYBODY."

Kissing children that do not belong to you is offensive and dangerous stupidity, and that applies to politicians, and all others. You need not be diseased to be a carrier of disease. Your own system may resist germs that would be fatal planted on the delicate mucous membrane of a child.

The automobile industry is now greatest in the United States, totalling more than \$3,163,000,000. The steel industry comes second, about \$100,000,000 behind the automobile. Third comes the business of slaughtering and selling animals, more than \$500,000,000 behind steel. We have reached the age of billions, our first ten industries being above the billion mark. This is to be a great automobile year. April produced 420,373 cars. May is expected to go 20,000 higher.

If you believe that every man's death is fixed in advance, this interests you. William Frie, working underground in Missouri, might have said that, with all its disadvantages, working in a mine at least kept you safe from lightning. But lightning struck the steam boiler at the top of the mine shaft, knocking over Roy Frie, followed a steam pipe 150 feet to the ground and killed Frie.

"No man can escape his fate," says a German proverb, and superstition, which has frequently stimulated courage, has carried on the theory.

The ancient gentleman, warned by the oracle that he would be killed by a house falling on him, did not save himself by sleeping out of doors. A flying eagle dropped a huge turtle, crushing the man's head. The turtle's shell was its house.

Miss Rose Maretta, in private life Mrs. Gerber, and a grandmother sixty-six years old, recovering from a long illness, returns to bareback and trapeze work in the circus.

A woman should be healthier at sixty-six than at any younger age, says this determined grandmother, and she is right.

Women have one advantage, with all the hardships that have followed them since the episode of the apple and the snake.

Once they pass fifty their chance of long life is much better than that of a man past fifty. For this there are several reasons, the most important, that they behave themselves and thus give themselves a chance to live. Many old men don't do that.

Incubation of Eggs of Various Fowls on Farm

The eggs from all but Muscovy ducks will hatch in twenty-six to twenty-eight days. Muscovy duck eggs require from thirty-three to thirty-six days. Guinea eggs take from twenty-six to twenty-eight days to hatch. Turkey eggs hatch on the twenty-eighth day, but it varies on an egg hatch on the twenty-seventh day and the hatching continues until the twenty-ninth or thirtieth day.

Duck eggs in an incubator require a temperature of 102 degrees. This is also satisfactory for turkey eggs. The guinea eggs will hatch at 102 to 103 degrees. Incubators are very satisfactory for duck eggs. Turkey eggs are seldom hatched in incubators. Neither are guineas.

A mixture of equal parts of bread crumbs and rolled oats, and a sprinkling of about 3 per cent sand is a good starting feed for ducklings. Bread and milk is also satisfactory. Stale bread soaked in milk and squeezed nearly dry is a good first feed for poult. When three weeks old they can be worked over to rolled oats and fine chicks' scratch feed, and larger grains added as the birds develop. There are many good rations for turkey poult but do not use sloppy mash. Guineas like bread crumbs and rolled oats and can soon eat fine chick feed. They are great foragers and insect eaters and will soon gather most of their ration.

Iowa Ration No. 11

Here is Ration No. 11, recommended by the Iowa experiment station. The mash is as follows: Two hundred pounds ground oats, 100 pounds ground corn, and 100 pounds of 60 per cent tankage. This is fed with scratch feed composed of 200 pounds shelled corn and 100 pounds oats. It is considered one of the lowest priced and one of the most practical rations, the college states, that can be recommended for farm conditions.

Southern Railway System

J. S. Bloodworth, D. P. A. RALEIGH, N. C.

PROGRAM COMPLETED FOR FARM GATHERING

Raleigh, N. C., July 20.—At least one thousand farmers and about 500 farm women are expected to attend the annual State Farmers' Convention to be held at State College during the three days of July 28, 29, and 30. The program has about been completed and indications are that the meeting will be both profitable and pleasant to those who come, states Assistant Director of Extension, J. M. Gray who is secretary of the Convention.

Mr. Gray states that Governor A. W. McLean will speak on the opening day and that Dr. E. C. Brooks, President of the College, and Commissioner of Agriculture, W. A. Graham, will deliver words of welcome. Hon. O. Max Gardner, President of the Convention, will make the annual address of the presiding officer dealing with the practical problem of how farmers in Cleveland County are lighting their homes by electricity. Mrs. E. Y. Lovelace, President of the home bureau section, will deliver an address of value to the farm women.

Mr. Gray states that C. A. Cobb of the Southern Ruralist and Judge Robert W. Bingham will be two of the evening speakers. Some attention will be devoted to farm forestry and W. W. Ashe and J. B. Collinwood of the United States Forest Service will present some facts about handling forests on the farm. Mrs. Jane S. McKimmon states that the farm women will do their own talking. The sessions of the

home bureau section will be largely an experience meeting at which farm women will give and take ideas found practical and valuable in the farm home.
Mrs. McKimmon urges the visitors to bring their own bed linen and toilet accessories. Rooms will be provided free by the college and meals will be served for 25 cents each in the College Dining Hall.

Cramped and Suffered

"My back and head would ache, and I had to go to bed," says Mrs. W. L. Ennis, of Worthville, Ky. "I just could not stay up, for I would cramp and suffer so. I was very nervous. My children would 'get on my nerves.' It wasn't a pleasure for me to try to go anywhere, I felt so bad. My mother had taken

CARDUI

For Female Troubles

at one time, so she insisted that I try it. I took four bottles of Cardui, and if one should see me now they wouldn't think I had ever been sick. I have gained twenty pounds, and my cheeks are rosy. I feel just fine. I am regular and haven't the pain. "Life is a pleasure. I can do my work with ease. I give Cardui the praise." Cardui has relieved many thousands of cases of pain and female trouble, and should help you, too.
Take Cardui.

A Man Sorting Seed Corn

If we were put in a corn bin and assigned the task of picking the best seed corn — we would fear the results.
When we have need of seed corn we go to the man most experienced in that business — and our returns are naturally more satisfactory.
So it is with every line of labor or business. The Shoemaker can select the best piece of leather; the Baker can "feel" the best flour; the Butcher knows the tenderest meats; and the Agriculturist can easily tell the richest and most fertile soil.
Now our business in MONEY. It has to do with savings, investments and in making money grow. It is a business wherein experience is just as essential to good results as in the sorting of seed corn.
No doubt you are a specialist in your line of labor — but it may not be in financial fields. Therefore, such service as we offer you can be turned to a greater profit to you — if you will but take advantage.
Almost instinctively we can pick the good investment offer from the doubtful one. This comes of experience. When you bank with us — and have acquired a fund for investment, we gladly offer suggestions as a means of making your money grow.
We pay 4 per cent interest on Time Deposits

You'll be surprised at the many ways we can serve you, once you have opened an account here
