

1,200,000 Chevrolet Sixes Now On Road

Detroit, Oct. 7.—The Chevrolet Motor Company announced here today that more than 1,200,000 of the new six cylinder Chevrolet cars have been placed on the road since the first of the year.

This achievement accomplished in little over nine months, is three times the best showing of any other manufacturer of six cylinder cars in a calendar year and tops Chevrolet's record total for the entire year of 1928.

It is now certain that six cylinder production will set a world record this year, surpassing for the first time in the history of the industry the output of four cylinder cars. This leadership of the sixes will come about chiefly because of Chevrolet's record showing this year.

Chevrolet factory officials declare that the dominating reason back of the leadership of the six is the public preference for the advantages which this type of construction affords. They point out too that the influence of great volume production, which has enabled the industry to get six cylinder prices down to the lowest on record and has made it possible for Chevrolet through maximum volume to offer six cylinder performance at a price that formerly bought only a four.

With the new yearly record already assured, Chevrolet factories are continuing on the biggest Fall production program ever undertaken by the company. Nine assembly plants and seven large manufacturing plants are facing the busiest final quarter that Chevrolet has ever known.

The heavy Fall factory program was made necessary, it was explained, to bring production up to the level of the demand and make possible quicker deliveries to owners.

State School News

Raleigh, Oct. 7.—That the teachers and school officials of the State are interested not only in perfecting their own professional improvement but also in giving to boys and girls superior opportunities for learning is evidenced by the facts that more than 500 studies of various kinds relating to various phases of education have been carried on within the past two years. In 1927-28 there were 136 projects conducted, and in 1928-29 385 additional subjects were studied.

A bulletin containing a brief summary of the studies made in 1928-29 has just been issued by the State Department of Public Instruction. The compilation of these projects as listed in this publication has been done by

SOME OUTSTANDING FEATURES OF NORTH CAROLINA'S PROGRESS

	1900	Today
Population	1,893,810	3,000,000*
Estimated value of all property	\$681,000,000	\$5,000,000,000
Capital employed in industry	68,000,000	1,250,000,000
Value of manufactures	94,220,000	1,154,617,000
Value of farm products	89,310,000	304,000,000
Spent on public school education	1,000,000	36,000,000
Value of public school property	2,712,112	100,000,000
(1905)		
Number of miles of paved highways	00	5,188
Installed power (horsepower)	216,622	1,372,615
(1904)		
Institutions of higher learning	40	45
(1893)		
Number of automobiles	00	483,770
Motor busses for schools	00	3,225
*Estimated.		

Dr. M. C. S. Noble, Jr., of the State Department.

The bulletin contains reports on projects from six school divisions: county school systems, special charter schools, State Department of Public Instruction, North Carolina Education Association, White Institutions of Higher Learning, and Colored Institutions of Higher Learning.

According to a statement made by State Superintendent Allen and printed in this bulletin, "The rapid growth of this movement indicates that the schools of the State are being studied more intensively than ever before. The mere listing of the studies appears to have produced a most desirable effect."

"It is hoped," he continues, "that this list will give further stimulation to studies of this type from which will finally be developed a spirit of research and investigation of sufficient momentum to cause needed reform to come from within rather than from without."

Paving Poultry Flock Is Developed Carefully

Developing the spring-hatched pullets from the time the chicks leave the incubator until the pullets are placed in the laying house is the pathway to profits in the poultry industry.

"The object of this development is to have pullets of stamina, bone and vigor and fully up to the standard weight of the breed," says R. S. Dearstyne, poultryman at State College. "At first the proper mash is needed until finally the laying mash containing 2 per cent of protein is given. The young pullets must have an abundance of succulent green feed especially as the grass on the range gets

old and tough. When placing birds in the laying house, do this about two weeks before they start laying so that they may become accustomed to their surroundings. The house should be made ready for occupancy, however, before the birds are brought in."

This means new nesting material, runs cleared of litter, perch poles scraped and freed of mites and the birds examined for internal parasites. A minimum of four feet of floor space to each bird is needed in the house and at least two feet of perch pole for each three birds. Dampness in the house and damp litter is to be avoided if the birds are not to have roup and colds. Fresh, clean water is necessary and the mash hoppers are to be kept filled at all times. Oyster shell and grit needs to be kept before the birds and grain fed twice each day with the heaviest amount at evening.

Mr. Dearstyne says that the poultryman will do well to spend about ten minutes each day in general observation of his flock. This will help him to find any lack of thriftiness or any indication of disease. Birds roughly handled, irregularly fed and watered, infested with parasites or neglected in other ways will not prove profitable.

Trustee's Sale Of Land

Under and by virtue of the power contained in a certain deed of trust, executed on the 14th day of December, 1925, by Sidney Pettiford, and wife Blanche Pettiford, of record in Register of Deeds Office of Person County, in Deed of Trust Book No. 3, page 444, the bond secured thereby having been not paid at maturity and the holder having requested that the power of sale be exercised, the undersigned trustee will on Monday, October 28th, 1929,

at 12 o'clock noon at the Courthouse door in Roxboro, N. C., sell at public sale to the highest bidder for cash the tract of land conveyed by said Deed of Trust, and described as follows: to-wit:

Lying and being in Flat River Township, Person County, North Carolina, and described as follows, viz: Beginning at a rock, it being the Southwest corner of R. A. W. Pettiford's in R. W. Clayton's line 1295 feet to a rock the Southeast corner of R. A. W. Pettiford, in the Blalock Estate line; thence with the Blalock Estate line 8 1/2 degrees West 538 feet to a rock Northeast corner of T. L. Pettiford's lot or lot No. 4; thence with T. L. Pettiford's line West 1341 feet to a rock Northwest corner of T. L. Pettiford's lot in R. W. Clayton's line; thence with said Clayton's line N. 2 1/2 degrees East 538 feet to the beginning containing 16.80 acres more or less, and being lot No. 3 of the subdivision of Emily Pettiford land, as surveyed by W. R. Cates.

W. W. Whitfield, Trustee.
